A journalist explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

How to attract wealth using the secret science of getting rich Your Practical Guide to Living the Law of Attraction University of Chicago Press

Raising Entrepreneurial Capital guides the reader through the stages of successfully financing a business. The book proceeds from a basic level of business knowledge, assuming that the reader understands simple financial statements, has selected a specific business, and knows how to write a business plan. It provides a broad summary of the subjects that people typically research, such as "How should your company position itself to attract private equity investment?" and "What steps can you take to improve your company's marketability?" Much has changed since the book was first published, and this second edition places effects of the global recession in the context of entrepreneurship, including the debt vs. equity decision, the options available to smaller businesses, and the considerations that lead to rapid growth, including venture capital, IPOs, angels, and incubators. Unlike other books of the genre, Raising Entrepreneurial Capital includes several chapters on worldwide variations in forms and availability of pre-seed capital, incubators, and the business plans they create, with case studies from Europe, Latin America, and the Pacific Rim. Combines solid theory with a practitioner's experience and insights Case studies illustrate theory throughout the book Updated to reflect the realities of the global economic recession

Economics for Business Tata McGraw-Hill Education

The movie The Founder, starring Michael

Keaton, focused the spotlight on Ray Kroc, the man who amassed a fortune as the chairman of McDonald's. But what about his wife Joan, the woman who became famous for giving away his fortune? Lisa Napoli tells the fascinating story behind the historic couple. Ray & Joan is a quintessentially American tale of corporate intrigue and private passion: a struggling Mad Men-era salesman with a vision for a fast-food franchise that would become one of the world's most enduring brands, and a beautiful woman willing to risk her marriage and her reputation to promote controversial causes that touched her deeply. Ray Kroc was peddling franchises around the country for a fledgling hamburger stand in the 1950s—McDonald's, it was called—when he entered a St. Paul supper club and encountered a beautiful young piano player who would change his life forever. The attraction between Ray and Joan was instantaneous and instantly problematic. Yet even the fact that both were married to other people couldn't derail their roller coaster of a romance. To the outside world, Ray and Joan were happy, enormously rich, and giving. But privately, Joan was growing troubled over Ray's temper and dark secret, something she was reluctant to publicly reveal. Those close to them compared their relationship to that of Elizabeth Taylor and Richard Burton. And yet, this volatility paved the way for Joan's transformation into one of the greatest philanthropists of our time. A force in the peace movement, she produced activist films, books, and music and ultimately gave away billions of dollars, including landmark gifts to the Salvation Army and NPR. Together, the two stories form a compelling portrait of the twentieth century: a story of big business, big love, and big giving.

An Institutional Assessment of Antitrust Policy John Wiley & Sons

"He either enchants or antagonizes everyone he meets. But even his enemies agree there are three things Ray Kroc does damned well: sell hamburgers, make

money, and tell stories." --from Grinding It Out Few entrepreneurs can claim to have radically changed the way we live, and Ray Kroc is one of them. His revolutions in food-service automation, franchising, shared national training, and advertising have earned him a place beside the men and women who have founded not only businesses, but entire empires. But even more interesting than Ray Kroc the business man is Ray Kroc the man. Not your typical self-made tycoon, Kroc was fifty-two years old when he opened his first franchise. In Grinding It Out, you'll meet the man behind McDonald's, one of the largest fast-food corporations in the world with over 32,000 stores around the globe. Irrepressible enthusiast, intuitive people person, and born storyteller, Kroc will fascinate and inspire you on every page.

Malaysia's Political Economy Houghton Mifflin Harcourt

This volume represents a real-life case study, revealing the interaction between the McDonald's Corporation - the most famous brand in the world - and the regulatory systems of a number of different European countries.

current franchise owners. Owning a franchise isn't for everyone; in fact, as Joel Libava says, "it's really not for most people." But if it is for you, this book can guide you in starting your own successful franchise business.

Mcdonald's Penguin

Using a series of case studies from five industries, Dicke analyzes franchising, a marketing system that combines large and small firms into a single administrative unit, strengthening both in the process. He studies the franchise industry from the 1840s to the 1980s, closely examining the rights and obligations of both the parent company and the franchise owner. Originally published in 1992. A UNC Press Enduring Edition -- UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.

The Unequal Struggle Sovereignty Education and Defense Ministry (SEDM) WINNER • 2021 PULITZER PRIZE IN HISTORY The "stunning" (David W. Blight) untold history of how fast food became one of the greatest generators of black wealth in America. Just as *The Color of Law* provided a vital understanding of redlining and racial segregation, Marcia Chatelain's *Franchise* investigates the complex interrelationship between black communities and America's largest, most popular fast food chain. Taking us from the first McDonald's drive-in in San Bernardino to the franchise on Florissant Avenue in Ferguson, Missouri, in the summer of 2014, Chatelain shows how fast food is a source of both power—economic and political—and despair for African Americans. As she contends, fast food is, more than ever before, a key battlefield in the fight for racial justice.

Commercial Law Reports 1996 ABC-CLIO
A restaurant critic can tell you about the chef. A menu can tell you about the farm-sourced ingredients. Now who's going to tell you about the people preparing your meal? From 2015 James Beard Leadership Award winner Saru Jayaraman, *Forked* is

an enlightening examination of what we don't talk about when we talk about restaurants: Is the line cook working through a case of stomach flu because he doesn't get paid sick days? Is the busser not being promoted because he speaks with an accent? Is the server tolerating sexual harassment because tips are her only income? As most corporate restaurants continue to set low standards for worker wages and benefits, a new class of chefs and restaurateurs is working to foster sustainability in their food and their employees. *Forked* offers an insider's view of the highest--and lowest--scoring restaurants for worker pay and benefits in each sector of the restaurant industry, and with it, a new way of thinking about how and where we eat.

Franchising For Dummies PediaPress

Aspiring business owners and executives seeking to climb to the next rung, young to mid-career professionals seeking tools for life achievement, and general readers interested in biographies of successful people will like Larry Thornton's "Why Not Win?". The book is a front-row seat to how one man altered his thinking to transform his life. The book begins with his growing up with brown skin in the 1960s in segregated Montgomery, Alabama. A desegregation school pioneer, Thornton was a classroom failure until a perceptive English teacher showed him he had value and encouraged him to go to college. Like the educator who changed his life, Thornton became a classroom teacher. But budget cuts took his job, and he decided to rewrite his story using his artistic talent. Thornton's artistry and work ethic got him attention at Coca-Cola, both for the good and the bad. He had to figure out a way to navigate this new world, where higher-ups praised him but co-workers reminded him of his "blackness" by drawing a noose in his workstation. He persevered by learning to appreciate and embrace diversity, people resources, and conflicting opinions. While his success grew at Coca-Cola, Thornton did the unthinkable: set out to be the first African American to own a McDonald's franchise in Birmingham. This thorny journey was peppered with threats, attempts to thwart his mission and a marriage he could not keep from falling apart. He absorbed the "try, try and try again" motto, and came to see that failure was a prelude to feasting upon the sweet fruit of success. Thornton's own mother never had a checking account, but years after her passing he found himself on the board of directors for a major financial institution. He slowly became a part of a small fraternity of captains of industry and fought past guilt

and insecurity to pave the way for others who look like him to join him at the table. Trying to fit into this new world, he learned that "Thank you," "Please," and "Excuse me" are perhaps three of the most powerful phrases in communication. Thornton made up his mind that he would spend each day on a mission to show his unbending gratitude for his life and its benefits by fostering a supreme attitude and maintaining consistency in vision, purpose, and an unwavering commitment to principles. Thornton's journey from Madison Park, Montgomery, has been a long one. "Why Not Win?" reflects on his most useful lessons and the anecdotes associated with them. If he were a Zen monk, his koan might well be: "Plan your past." By that he means, think ahead one day, one week, one year, even twenty years out, and decide today your desired outcome, and work for it. "Thank God for memories," he says; "Let's plan to make them pleasant ones."

America's Advance Through Twentieth-Century Europe The Law Publisher CC

Basic Strategy in Context centres on real-world firms and managers by giving each chapter's cases a higher weighting in importance and explanation than is normal. Given this emphasis on real-world as opposed to theoretical treatment the book enables the solving of practical business problems like those below. This emphasis on reality is cemented by the book's treatment of diversity as being the norm highlighted through European business cases from different countries. Giving example answers and links from case to theory rams home further the expected usefulness of the book to students about to enter industry. Often theory and cases are treated as different and separated topics; we believe that our integrated didactic treatment is quite unique. Finally we use the basic theories of strategy and then show how these mainly simple concepts can be extended to solve tricky business problems anywhere in any industry. Here is a sample of specific practical problems to which this book can show solutions: Why are resources important and how are they leveraged? Using the case of a British failure (Railtrack) we show the fatal consequences of neglecting existing resources, and then in a completely different country and industry (Carlo Gavazzi Space in Italy) how resources can be utilised from outside the firm to achieve leverage. Given our emphasis on diversity we highlight successful change in a foreign and inflexible environment (Japan and Carlos Ghosn). But can change

be planned? Sometimes events or luck sabotage the best intentions as shown in the Samsung case. The book differentiates itself from the competition in four ways: Cases form the highlight of the book. Taking European and some international cases as the starting point, the objective is to link themes or topics to a description of their effect on the firm. The linkage will occur at the relevant point in the case, not in a separate section or in another book. The author team has used several longitudinal cases spread over a 15-20 year period. The longitudinal cases are supported by some new, non-longitudinal cases selected from award winning cases associated with the LRP Journal and the Gate2Growth Academic Network. We feel such an emphasis on cases is a novel feature. The theory is explained using a range of modern didactic methods not usually found in competitive offerings. Examples include colour coded and highlighted links from the theory to the case, questions inside each theory section with model answers and unanswered questions to test the student's grasp of the concepts. The book features a mixture of cases from short specific to academically challenging ones. Too often, superficial cases are placed at the end of chapters in strategy theory books. They are picked to emphasize the topics of the preceding chapters. The result is spoon-feeding, with little need or motivation to provoke individual thought or learning. The cases in this book are comprehensive, approximately 20 pages in length, with ample quantitative and qualitative data, thus forcing a modicum of effort from the student. Shorter cases are also included for ease of understanding and instructor flexibility. Another differentiating feature is the emphasis on diversity hence the use of European as opposed to US based cases. "Thomson and Baden-Fuller have crafted a highly original and practical strategy textbook covering a wide range of strategic issues, debates, and frameworks. Their work contains a thorough overview of the strategy field, appealing cases of European firms such as Abrakebabra and Your cup of tea, as well as insightful treatises on the Brent Spar ignominy and the weapon industry. The clever combination of mini-cases, theory, questions and full-fledged cases, and a clear overall structure ensure that students obtain a representative image of strategy as it plays out in the 21st century." —Paul W.L. Vlaar, Associate Professor, Vrije Universiteit Amsterdam, Faculty of Economics and Business Management *Black Enterprise* Harvard University Press

Franchise: The Golden Arches in Black America Liveright Publishing
The Development of a Business Method, 1840-1980 Red Globe Press
 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.
Government Identity Theft, Form #05.046 American Bar Association
 Antitrust policy nominally plays an instrumental public interest role. The generally accepted notion is that it is a government instrument designed to intervene in relatively unregulated markets in order to preserve rivalry among independent buyers and sellers. Competition authorities are supposed to restrain business conduct that exercises monopoly power aimed at excluding competitors or exploiting consumers and clients. Thus it can be said - although few pro-market theorists make the insight explicit - that antitrust provisions reveal mistrust of the capacity of markets to promote social welfare. The inner logic, enforcement mechanisms, and practical outcomes of antitrust provisions are all intrinsically contradictory to the natural dynamic course of market functioning. In Dr. De Leon's challenging thesis, this mistrust of the market lies at the root of antitrust policy, giving rise always to a preference towards 'predicting' the result of impersonal market forces rather than interpreting the entrepreneurial behaviour which creates those forces. And it is in Latin America that he finds the powerful evidence he needs to support his case. From the formative years of Latin American economic institutions, during the Spanish Empire, economic regulations - far from being driven by the pursuit of promoting free trade and economic freedom - have been conceived, enacted and implemented in the context of deeply anti-market public policies, trade mercantilism and government dirigisme. The so-called "neoliberal" revolution of the 1990s triggered by the Washington Consensus did not really change the interventionist innuendo of these policies, but merely restated the social welfare goal to be achieved: the pursuit of economic efficiency. Dr. De Leon presents his case against the assumption that consumer welfare orientated policies such as

antitrust do really promote entrepreneurship and market goals. Paradoxically, antitrust enforcement has undermined the transparency of market institutions, in the name of promoting market competition. The author's provocative analysis marshals several sets of facts in support of his thesis, including the actual functioning of antitrust policy as reflected in case law in various Latin American countries, the preference of merger control over other less intrusive forms of market surveillance, the constrained role of competition advocacy against government acts, and the

ineffective institutional structure created to apply the policy. Among the many specific topics treated are the following: government immunity; strategic industries; state-owned enterprises; politically influential groups; measurement of market concentration; the burden of proof of social welfare benefits; the role of joint trade associations and professional guilds; institutional arrangements that favour collusion; selective distribution; sector regulation; erosion of property rights; marginal role of courts in the antitrust system; leniency programs; and privatized public utilities. The growing

significance of Latin America in the context of economic globalization endows this book with huge international interest. Written by a leading authority on the topic, this is the first book that presents a detailed description of Latin American antitrust law and policy as it has been developed through numerous judicial opinions. A wide variety of audiences around the world will find it of extraordinary value: competition law specialists, scholars and students of the subject, policymakers and politicians in Latin America, as well as all interested lawyers, jurists, and economists.
