Our current students are digital natives, born into a world of widespread online sharing. Aligning the technologies we use in our courses with their skills and approaches to collaborative learning is an opportunity we should take. The new media share text, images, audio and video material rapidly and interactively. This volume will provide an overview of these new social media including Skype, YouTube, Flickr, blogging, LinkedIn, Facebook, and Twitter. Examples and cases of how instructors around the world are meaningfully incorporating them into their management, marketing, and other business courses are provided. One of the more robust trends is the use of three-dimensional immersive virtual world interfaces for teaching and learning. The leading one is Second Life. Examples of the use of Second Life in business courses will be discussed. The use of wikis to foster collaborative development of course related material by learners will be presented with case examples. Faculty members are co-creators of course content with their learners. Among the topics covered is how faculty members can be supported in their deployment of social media projects and course structures. How social media can enable the structuring of course activities involving students, prospective students, alumni, employers, businesspersons, and others in rich sharing and support with each other will be discussed. Indeed seeing courses as networking venues beyond learning forums will be parsed.

**The Executive's Guide to Enterprise Social Media Strategy** Rowman & Littlefield

Today, social media have attracted the attention of political actors and administrative institutions to inform citizens as a prerequisite of open and transparent administration, deliver public services, contact stakeholders, revitalize democracy, encourage the cross-agency cooperation, and contribute to knowledge management. In this context, the social media tools can contribute to the emergence of citizen-oriented, open, transparent and participatory public administration. Taking advantage of the opportunities offered by social media is not limited to central government. Local governments deploy internet-based innovative technologies that complement traditional methods in implementing different functions. This book focuses on the relationship between the local governments and social media, deals with the change that social media have caused in the organization, understanding of service provision, performance of local governments and in the relationships between local governments and their partners, and aims to advance our theoretical and empirical understanding of the growing use of social media by local governments. This book will be of interest to researchers and students in e-government, public administration, political science, communication, information science, and social media. Government officials and public managers will also find practical use recommendations for social media in several aspects of local governance

Social media offers an opportunity for people to enlarge their exposure to information; information about important changes and trends in technology,

markets, government policies, or society in general that can facilitate entrepreneurship, business development, and more. Despite the widespread cultural and social effects of social media in the way people communicate and interact, little research has addressed the role of social media in entrepreneurship. This book fills this gap by exploring the influence and consequences social media has on entrepreneurship at the individual level, group level, venture (firm) level and societal level. Specific social media platforms (e.g., Facebook, Twitter, Instagram, etc.) will be explored as well as topics such as gender, education and socioemotional wealth.

This book seeks to draw a comprehensive picture of influencer collaborations from a strategic communication perspective. The contributors tackle strategic influencer communication from multidisciplinary perspectives, from varying actor foci, and from different methodological frameworks and methods. Influencers cross traditional boundaries in many ways and oscillate between intimacy and publicity, authenticity and commercialization, ingratiation and critical distance. From a strategic communication perspective, this variability makes influencers hard to capture: organizations can cooperate with influencers to achieve both marketing and PR objectives. Influencers can act as cooperation partners, integrating commercial content into organic narratives, or as independent critics. Influencers also combine different roles that have traditionally been occupied by separate actors such as intermediary, content distributor, creative content producer, community manager, testimonial, strategic counsellor, and event host. The combination of these roles in just one actor opens new opportunities for strategic communication and can produce appreciated synergy effects. It is therefore hardly surprising that influencer collaborations have become a firmly established instrument in the toolbox of strategic communicators. The chapters in this book were originally published in the *International Journal of Advertising* and the *International Journal of Strategic Communication*.
