MARISA THORNTON

The Doctor's Guide to
Critical Appraisal Oxford
University Press

The 100 Cases series
provides a novel learning
and revision tool that
works by guiding the

reader through each
clinical case in a highly
structured manner. Each
scenario provides details
of the patient's medical
history and the key
findings of a clinical
examination, together
with initial investigation

results data for evaluation. Key questions then prompt the reader to evaluate the patient, and reach a decision regarding their condition and the possible treatment plan, while the answer pages reveal the processes a clinician goes through in such situations. The volumes are designed with the student in mind, and include features to aid self-directed learning, clinical reasoning and problem-solving. 100 Cases in Paediatrics covers the following subject areas:

Respiratory, Cardiology, Endocrinology and diabetes, Gastroenterology, Nephrology, Infections, Dermatology, Haematology, Oncology, Bones and joints, Neurology, Child and Adolescent Psychiatry, Neonatology, Miscellaneous
The Diploma in Child Health Oxford University Press
This concise revision text brings together the fundamentals of the basic sciences required for Obstetrics and

Gynaecology trainees to pass the MRCOG Part 1 exam. A note-style format and over 100 illustrations make this the ideal revision guide to passing the exam. Independently Published
The MRCPCH clinical examination assesses whether candidates have reached the standard in clinical skills expected of a newly appointed specialist registrar, while the DCH recognises the competence of GPs and other health professionals in caring for children. Success in communication

skills is vital to achieve overall success in these examinations. This revised and expanded Second Edition includes over a dozen new scenarios for both examinations, a new chapter on the general approach to effective communication, an expanded clinical exam mark sheet, anchor statements and exam circuit diagrams. Although written to aid candidates for the clinical MRCPCH and DCH examinations, this book will also be useful to paediatric

trainees in their day-to-day clinical encounters. [MCOs for FRCOphth and ICO Basic Sciences Examinations](#) PasTest Ltd Gone are the days when you present to colleagues with hand-drawn overheads. Presenting Health with PowerPoint shows how you can work through PowerPoint to create effective presentations. In an easy-to-use step-by-step format it takes you through the components of the European Computer Driving Licence the basic IT qualification and guides

you through the text by showing what actually appears on the computer using screenshots toolbar icons mouse and keyboard actions. The accompanying CD-ROM provides downloadable resources and useful website links. Presenting Health with PowerPoint is designed for doctors nurses and managers at all levels throughout primary and secondary care who need not have prior knowledge of Microsoft PowerPoint. *MRCPCH Clinical Examination* PasTest Ltd

This title is directed primarily towards health care professionals outside of the United States. The needs of critically ill children are unique and this handy pocket book will be invaluable to anyone who needs a quick account of intensive care procedures. It brings together all the vital information in one source and in an accessible format. The text is organised by body systems and gives helpful hints on managing children with various conditions. Tables of

normal values are included and additional information is provided about equipment needed in a paediatric emergency.

Illustrated Signs in Clinical Paediatrics Lulu.com

Reflecting the latest exam formats, this book provides essential revision for those taking the Paediatric Membership exams - MRCPC Papers 1a and 1b, and DCH diploma. Features over 500 completely up-to-date questions. Includes subject-based chapters for focussed revision.

Includes all question formats likely to be encountered in the exam - BOF, MCQs and EMQs. Contains expanded answers to every question, helping students build understanding and confidence for success. Written by experienced, practising Paediatric Specialist Registrars, and edited by renowned author R Mark Beattie.

 regarded Concise
 Paediatrics for
 postgraduates, Easy
 Paediatrics is a textbook
 specifically written for

medical students. Easy
 Paediatrics is structured
 in a systems-based
 fashion, with additional
 chapters on subjects such
 as history and
 examination,
 development, genetics,
 emergencies and surgery.
 The material is presented
 logically with
 presentations, clinical
 findings, investigations
 and management options,
 and useful boxes covering
 differential diagnoses,
 causes and complications
 are also included to
 complete the picture.
 Clinical photographs and

illustrative diagrams are
 provided throughout to
 help the student visualise
 what they are reading
 about, and the book is
 enhanced by a companion
 website, which contains
 OSCE-style clinical
 scenarios and MCQs for all
 the body systems, so the
 reader can test what they
 have learned. Presented
 in an easy-to-remember
 style, Easy Paediatrics
 gives the medical student
 everything they need to
 succeed in their
 paediatrics modules,
 without bombarding them
 with excess knowledge

that will not be covered in their exams.

1500 Questions for the Dch/ Mrcpch

Foundation of Practice Exam

Createspace

Independent Publishing Platform

This book is “innovative and original in assisting the reader to apply the principles of science to paediatric practice .

Professor Neena Modi, President, Royal College of Paediatrics and Child Health. The Science of Paediatrics, MRCPCCH Mastercourse, provides essential background

preparation for the MRCPCCH Theory and Science examination. It contains an up-to-date review of the application of science to everyday paediatric clinical practice, whether it is interpreting clinical signs or investigations, prescribing drugs or identifying best management. Although this understanding is essential in order to make informed clinical decisions, it is difficult to obtain as it is not usually covered in clinical textbooks. Key features •

MRCPCCH exam-format questions embedded in each chapter to test understanding • Emphasis on embryology to explain many congenital abnormalities • An overview of the relevant anatomy and physiology • Focus on the application and interpretation of investigations • Examples of recent advances in science and clinical research that have benefited the children’s care • All clinical specialties covered by paediatric specialists. • Chapters covering evidence-based

paediatrics, statistics, ethics and quality improvement.
