Are top scorers really the most valuable players? Are games decided in the final few minutes? Does the team with the best player usually win? Thinking Basketball challenges a number of common beliefs about the game by taking a deep dive into the patterns and history of the NBA. Explore how certain myths arose while using our own cognition as a window into the game's popular narratives. New basketball concepts are

introduced, such as power plays, portability and why the best player shouldn't always shoot. Discover how the box score can be misleading, why "closers" are overrated and how the outcome of a game fundamentally alters our memory. Behavioral economics, traffic paradoxes and other metaphors highlight this thought-provoking insight into the NBA and our own thinking. A must-read for any basketball fan -- you'll never view the sport, and maybe the world, the same again.

The Poetics of Conversion

John Wiley & Sons
This comprehensive volume, often called the "HVAC bible," has been thoroughly updated to cover the latest code changes, equipment, and

techniques HVAC Equations, Data, and Rules of Thumb, 3e offers all of the information an HVAC student or professional needs in one resource. The book thoroughly explains the expansion of piping systems and temperature limitations of new materials such as polyethylene, polypropylene, PVC, CPVC, and PEX. Detailed information is included for all types of facilities, including offices, hotels, hospitals, restaurants, commercial spaces, and computer rooms. This practical handbook reflects all the latest code changes—including the ASHRAE standards—and explains how to interpret and put them to use. It includes completely

updated coverage of new pumps, chillers, air handling units, cooling equipment, boilers, and pipe material. You will get complete coverage of sustainability organizations that have become more important since last edition, including LEED, USGBC, Energy Star. Features hundreds of equations and rules for everything from ductwork to air-handling systems Includes a brand-new chapter on sound, vibration, and acoustics Contains an updated list of equipment manufacturers for all products featured

History of the House of P. & F. Corbin Michael Joseph This book constitutes the refereed proceedings of the 8th International Conference on Industrial Applications of Holonic and Multi-Agent Systems, HoloMAS 2017, held in Lyon, France, in August 2017. The 19 revised full papers presented were carefully reviewed and selected from 27 submissions. The papers are organized in the following topical sections: scheduling; knowledge engineering; modeling, simulation and reconfiguration; energy systems; and MAS in various areas.

The Coming of the Maori

Legare Street Press Gives an incisive analysis of and insight into volume & open interest, which have been used as technical indicators of market trends for many years. Shows -- How market sentiment is reflected through VOI indicators -- How to develop a disciplined approach to using VOI -- How to identify discrepancies in market behavior -- How to analyze the behavior of specific markets.

Plunkett's Chemicals, Coatings & Plastics Industry Almanac: Chemicals, Coatings & Plastics Industry Market Research, Statistics, Trends & Leading Comp Lulu Press, Inc

Africa's Power Infrastructure: Investment, Integration, Efficiency is based on the most extensive data collection exercise ever undertaken on infrastructure in Africa: the Africa Country Infrastructure Country Diagnostic (AICD). Data from this study have provided new insights on the extent of a power crisis in the region, characterized by insufficient capacity, low electricity connection rates, high costs, and poor reliability and on

what can be done about it. The continent faces an annual power sector financing gap of about \$21 billion, with much of the existing spending channeled to maintain and operate high-cost power systems, leaving little for the huge investments needed to provide a long-term solution. Meanwhile, the power crisis is taking a heavy toll on economic growth and productivity. This book asserts that the current impediments to economic growth and development need to be tackled through policies and investment strategies that renew efforts to reform state-owned utilities, build on the lessons of private participation in infrastructure projects, retarget electrification strategies, expand regional power trade, and mobilize new funding resources. Further development of regional power trade would allow Africa to harness larger-scale and more cost-effective energy sources, reducing energy system costs by US\$2 billion and carbon dioxide emissions by 70 million tons annually. But reaping the promise of regional trade depends on a handful of major exporting countries

raising the large volumes of finance needed to develop generation capacity for export; it also requires a large number of importing countries to muster the requisite political will. With increased utility efficiency and regional power trade in play, power costs would fall and full cost recovery tariffs could become affordable in much of Africa. This will make utilities more creditworthy and help sustain the flow of external finance to the sector, which is essential to close the huge financing gap.

New Haven : Human Relations Area Files P As globalization explodes, so has international business scholarship. This second edition of the Oxford Handbook of International Business synthesises all the relevant literature of the last 40 years in 28 original chapters by the world's most distinguished scholars. Reflecting the changes and development in the field since the first edition this new edition has a changed structure, all the chapters have been updated to take account of the latest scholarship, and five new

chapters freshly written. The Handbook is divided into six major sections, providing comprehensive coverage of the following areas: · History and Theory of the Multinational Enterprise · The Political and Regulatory Environment · Strategy and International Management · Managing the MNE · Area Studies · Methodological Issues These state of the art literature reviews will be invaluable references for students in business schools, social sciences, law, and area studies.

My 1998 World Cup Story Irwin Professional Publishing

The critical situation in which our planet finds itself is no longer in doubt. Some things are already collapsing while others are beginning to do so, increasing the possibility of a global catastrophe that would mean the end of the world as we know it. As individuals, we are faced with a daily deluge of bad news about the worsening situation, preparing ourselves to live with years of deep uncertainty about the future of the planet and the species that inhabit it, including our own. How can we cope? How can we project ourselves beyond the

present, think bigger and find ways not just to survive the collapse but to live it? In this book, the sequel to *How Everything Can Collapse*, the authors show that a change of course necessarily requires an inner journey and a radical rethinking of our vision of the world. Together these might enable us to remain standing during the coming storm, to develop a new awareness of ourselves and of the world and to imagine new ways of living in it. Perhaps then it will be possible to regenerate life from the ruins, creating new alliances in differing directions - with ourselves and our inner nature, between humans, with other living beings and with the earth on which we dwell.

Proverbs-Isaiah Plunkett Research, Ltd.
Handbook of Energy Economics and Policy: Fundamentals and Applications for Engineers and Energy Planners presents energy engineers and managers with analytical skills and concepts that enable them to apply simple economic logic to understand the interrelations between energy technologies, economics, regulation and

governance of the industry. Sections cover the origins, types and measurement of energy sources, transportation networks, and regulatory and policy issues on electricity and gas at a global level, new economic and policy issues, including innovation processes in the energy industry and economic and policy implications. Final sections cover state-of-the-art methods for modeling and predicting the dynamics of energy systems. Its unique approach and learning path makes this book an ideal resource for energy engineering practitioners and researchers working to design, develop, plan or deploy energy systems. Energy planners and policymakers will also find this to be a solid foundation on which to base decisions. Presents key-concepts and their interrelation with energy technologies and systems in a clear way for ready application during planning and deployment of energy technologies and systems Includes global case studies covering a wide array of energy sources and regulatory models Explores methodologies for modeling and

forecasting the impacts of energy technologies and systems, as well as their costs and possible business models

Joshua-2 Kings McGraw Hill Professional
 Edited by Philip A. Noss. Sixteen biblical scholars, linguists, theoreticians, and translation professionals have collaborated to present an overview of the Bible translation from the time of the Septuagint, the Targums, and the Latin Vulgate through the Reformation and Counter Reformation, and into the present day when mother-tongue speakers have replaced the missionary translators of the colonial era. This is the inaugural volume in a series of monographs. Paper Back, 542 pages.

Tips, Techniques, and Advice on Mastering the Macintosh Amer Bible Society
 Locks and Keys throughout the Ages is widely considered the best book ever written on the history and development of locks. It is illustrated throughout with photos from the famous and extensive Lips' Collection. It was written in 1957 by Vincent J.M. Eras, the director of one of the most respected and important lock

manufacturing companies in the world at that time, the Lips' Safe and Lock Manufacturing Company (now part of the ASSA ABLOY Group, along with Yale, Chubb, and many other once independent manufacturers). The author was not only a master locksmith who held several important patents, but he was also an avid collector and was passionate about the history and development of locking mechanisms. His extensive knowledge of the field comes across on every page. In fact, Eras had been in the lock manufacturing business for 58 years before he wrote this book. In the preface he states: "I consider it a gratifying task to place on record my experiences and through this book save them from oblivion. At the same time an excellent opportunity is presented to show the reader my collection of antique and modern locks - the tangible result of more than 50 years travelling, searching and study in many countries". In over 280 black-and-white photos and drawings Vincent Eras brings us on a grand tour of the development of locks from prehistoric to modern times and also

explains to us, in words and illustrations, how their mechanisms work. This is a high-quality hardcover reprint of the 1957 edition of the book done by special arrangement with ASSA ABLOY. The typeface has been completely re-done and the photographs have been corrected using the latest digital correction technology. The quality is equal to and, in many cases, better than the original 1957 edition. A reprint of this book was done in the UK in the 1970s but the quality was poor. Artisan Ideas is very glad to be able to make this fascinating book available to the public again. Hardcover, 184 pages, 284 black-and-white photos and designs. Oxford University Press, USA

Basing much of *Not in His Image* on the Nag Hammadi and other Gnostic writings, John Lamb Lash explains how a little-known messianic sect propelled itself into a dominant world power, systematically wiping out the great Gnostic spiritual teachers, the Druid priests, and the shamanistic healers of Europe and North Africa. They burned libraries and destroyed temples in an attempt to silence the

ancient truth-tellers and keep their own secrets. But as Lash reveals, when the truth is the planet Earth it cannot be hidden or destroyed. *Not in His Image* delves deeply into the shadows of ancient Gnostic writings to reconstruct the story early Christians tried to scrub from the pages of history, exploring the richness of the ancient European Pagan spirituality--the Pagan Mysteries, the Great Goddess, Gnosis, the myths of Sophia and Gaia--and chronicles the annihilation of this Pagan European culture at the hands of Christianity. Long before the birth of Christianity, monotheism was an anomaly; Europe and the Near East flourished under the divine guidance of Sophia, the ancient goddess of wisdom. The Earth was the embodiment of Sophia and thus sacred to the people who sought fulfillment in her presence. This ancient philosophy was threatening to the emerging salvation-based creed of Christianity that was based on patriarchal dominion over the Earth and lauded personal suffering as a path to the afterlife. As Derrick Jensen points out in the afterword, in Lash's hands

Jesus Christ emerges as the agent provocateur of the ruling classes.

Industrial Applications of Holonic and Multi-Agent Systems Courier Corporation

This is a completely revised edition of Gold Medallion Award-winning Expositor's Bible Commentary. This revised commentary has undergone substantial revisions that keep pace with current evangelical scholarship and resources. Just as its previous edition, it offers a major contribution to the study and understanding of the Scriptures. Providing pastors and Bible students with a comprehensive and scholarly tool for the exposition of the Scriptures and the teaching and proclamation of the gospel, this ten-volume reference work has become a staple of seminary and college libraries and pastors' studies worldwide. Its fifty-six contributors--- thirty of them are new--- represent the best in evangelical scholarship committed to the divine inspiration, complete trustworthiness, and full authority of the Bible. As before, The Expositor's

Bible Commentary features full NIV text, but also refers freely to other translations and to the original languages. In addition to its exposition, each book of the Bible has an introduction, outline, and an updated bibliography. Notes on textual questions and special problems are correlated with the expository units; transliteration and translation of Semitic and Greek words make the more technical notes accessible to readers unacquainted with the biblical languages. In matters where marked differences of opinion exist, commentators, while stating their own convictions, deal fairly and irenically with opposing views.

This book examines the uncertainties underlying various strategies for a low-carbon future. Most prominently, such strategies relate to transitions in the energy

sector, on both the supply and the demand side. At the same time they interact with other sectors, such as industrial production, transport, and building, and ultimately require new behaviour patterns at household and individual levels.

Currently, much research is available on the effectiveness of these strategies but, in order to successfully implement comprehensive transition pathways, it is crucial not only to understand the benefits but also the risks. Filling this gap, this volume provides an interdisciplinary, conceptual framework to assess risks and uncertainties associated with low-carbon policies and applies this consistently across 11 country cases from around the world, illustrating alternative transition pathways in various contexts. The cases are presented as narratives, drawing on stakeholder-driven research efforts. They showcase diverse empirical evidence reflecting the complex challenges to and potential negative consequences of such pathways. Together, they enable the reader to draw valuable lessons on the

risks and uncertainties associated with choosing the envisaged transition pathways, as well as ways to manage the implementation of these pathways and ultimately enable sustainable and lasting social and environmental effects. This book will be of great interest to students, scholars, and practitioners of environmental and energy policy, low-carbon transitions, renewable energy technologies, climate change action, and sustainability in general.

With the advancing globalization of the world economy, domestic economic regulations are becoming more and more subject to efforts at international harmonization. This book presents an analysis of this worldwide

phenomenon from both a legal and a politico-economic perspective by focusing on (1) the backgrounds and objectives of international harmonization, (2) the negotiating processes involved, and (3) the impact of harmonization on domestic laws and their administration. International harmonization is discussed in a wide range of cases including trade-related regulations, technical standards and food safety standards, intellectual property rights, labor standards, competition law and policy, financial regulations, and regulations concerning transnational economic crime. Drawing on a wide range of materials and applying a unified analytical framework based on theoretical as well as practical observations, the book surveys this much debated topic in a comprehensive and accessible way. It thus contributes to a better understanding of both the chances and the challenges of globalization and global governance today.
