Biography of Howard Aiken, a major figure of the early digital era, by a major historian of science who was also a colleague of Aiken's at Harvard.

Howard Hathaway Aiken (1900-1973) was a major figure of the early digital era. He is best known for his first machine, the IBM Automatic Sequence Controlled Calculator or Harvard Mark I, conceived in 1937 and put into operation in 1944. But he also made significant contributions to the development of applications for the new machines and to the creation of a university curriculum for computer science. This biography of Aiken, by a major historian of science who was also a colleague of Aiken's at Harvard, offers a clear and often entertaining introduction to Aiken and his times. Aiken's Mark I was the most intensely used of the early large-scale, general-purpose automatic digital computers, and it had a significant impact on the machines that followed. Aiken also proselytized for the computer among scientists, scholars, and businesspeople and explored novel applications in data processing, automatic billing, and production control. But his most lasting contribution may have been the students who received degrees under him and then took prominent positions in academia and industry. I. Bernard Cohen argues convincingly for Aiken's significance as a shaper of the computer world in which we now live.

Computer Operator & Programming Assistant COPA Marathi MCQ / IGI Global

Students often face challenges in a swiftly advancing Computer Science Education (CSE), where technologies evolve rapidly, and concepts unfold with overwhelming intricacies. As society becomes interwoven with technology, how essential is the integration of CSE into the educational framework to adequately equip future generations for the complexities of the digital era? Navigating Computer Science Education in the 21st Century advocates integrating CSE into curricula, underlining its crucial role in early childhood development. The book grapples with the challenge of introducing children to technology responsibly, addressing concerns about unmonitored screen time while emphasizing the necessity of evidence-based approaches for educators. Within these pages, effective teaching strategies are linked to successes in CSE. The book explores learner-centered teaching methodologies in computer science, emphasizing individualized instruction, active learning, and collaborative approaches. It evaluates the effectiveness of traditional lecture-based teaching against more innovative strategies such as game-based learning and collaborative approaches. By presenting studies that delve into the impact of these strategies on student engagement and motivation, the book equips educators with the insights needed to make informed decisions tailored to diverse learning environments.

IBPS RRB Guide for Office Assistant (Multipurpose) Preliminary & Main Exams 2020 with 4 Online Practice Sets 6th Edition Nelson Thornes

Score higher on the ASVAB AFQT Having a stable and well-paying career in the military can change your life for the better—and this book makes it easier than ever to pass the ASVAB AFQT so you can serve your country and set your future up for success. Get there faster and more confidently with ASVAB AFQT For Dummies!

Parliamentary Debates Notion Press

This book presents a selective, introductory reading of key texts in the history of magic from antiquity forward, in order to construct a suggestive conceptual framework for disrupting our conventional notions about rhetoric and literacy. Offering an overarching, pointed synthesis of the interpenetration of magic, rhetoric, and literacy, William A. Covino draws from theorists ranging from Plato and Cornelius Agrippa to Paulo Freire and Mary Daly, and analyzes the different magics that operate in Renaissance occult philosophy and Romantic literature, as well as in popular indicators of mass literacy such as "The Oprah Winfrey Show" and The National Enquirer. Magic, Rhetoric, and Literacy distinguishes two kinds of magic-rhetoric that continue to affect our psychological and cultural life today. Generative magic-rhetoric creates novel possibilities for action, within a broad sympathetic universe of signs and symbols. Arresting magic-rhetoric attempts to induce automatistic behavior, by inculcating rules and maxims that function like magic ritual formulas: JUST SAY NO. In this connection, the literate individual is one who can interrogate arresting language, and generate "counter-spells."
