Not long ago, Republicans could take pride in their party's tradition of environmental leadership. In the late 1960s and early 1970s, the GOP helped to create the Environmental Protection Agency, extend the Clean Air Act, and protect endangered species. Today, as Republicans denounce climate change as a "hoax" and seek to dismantle the environmental regulatory state they worked to build, we are left to wonder: What happened? In *The Republican Reversal*, James Morton Turner and Andrew C. Isenberg show that the party's transformation began in the late 1970s, with the emergence of a new alliance of pro-business, libertarian, and anti-federalist voters. This coalition came about through a concerted effort by politicians and business leaders,

abetted by intellectuals and policy experts, to link the commercial interests of big corporate donors with states'-rights activism and Main Street regulatory distrust. Fiscal conservatives embraced cost-benefit analysis to counter earlier models of environmental policy making, and business tycoons funded think tanks to denounce federal environmental regulation as economically harmful, constitutionally suspect, and unchristian, thereby appealing to evangelical views of man's God-given dominion of the Earth. As Turner and Isenberg make clear, the conservative abdication of environmental concern stands out as one of the most profound turnabouts in modern American political history, critical to our understanding of the GOP's modern success. The Republican reversal on the environment is emblematic of an unwavering faith in the market, skepticism of scientific and technocratic elites, and belief in American exceptionalism that have become the party's distinguishing characteristics.

For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

In India, you can still find the kabaadiwala, the rag-and-bone man. He wanders from house to house buying old newspapers, broken utensils, plastic bottles—anything for which he can get a little cash. This custom persists and recreates itself alongside the new economies and ecologies of consumer capitalism. *Waste of a Nation* offers an anthropological and historical account of India's complex relationship with garbage. Countries around the world struggle to achieve sustainable futures. Assa Doron and Robin Jeffrey argue that in India the removal of waste and efforts to reuse it also lay waste to the lives of human beings. At the bottom of the pyramid, people who work with waste are injured

and stigmatized as they deal with sewage, toxic chemicals, and rotting garbage. Terrifying events, such as atmospheric pollution and childhood stunting, that touch even the wealthy and powerful may lead to substantial changes in practices and attitudes toward sanitation. And innovative technology along with more effective local government may bring about limited improvements. But if a clean new India is to emerge as a model for other parts of the world, a "binding morality" that reaches beyond the current environmental crisis will be required. Empathy for marginalized underclasses—Dalits, poor Muslims, landless migrants—who live, almost invisibly, amid waste produced predominantly for the comfort of the better-off will be the critical element in India's relationship with waste. Solutions will arise at the intersection of the traditional and the cutting edge, policy and practice, science and spirituality.

Guests have gathered to dine at Alastair Bing's elegant country manor, but only one guest—a murderer—is aware of the dead body in an upstairs bathtub. With renowned explorer Mr. Everard Mountjoy noticeably absent from the dining table, the rest of the party searches for him, and soon discovers the explorer's drowned corpse. The murder is mystifying, not in the least because the body in the bath is clearly a woman's! As danger and theories unravel, psychoanalyst Mrs. Beatrice Lestrangle Bradley observes and interprets all, from shrieks in the night to drowning attempts to poisoning. It's clear that Mrs. Bradley has a basilisk eye for detail. But can she uncover a motive for murder? Rediscover the notorious detective Mrs. Bradley in her original starring role. This definitive mystery is the first in Gladys

Mitchell's sixty-six book series featuring this most unusual and brilliant heroine.

A New York Times Book Review Editors' Choice A Telegraph Editor's Choice An Evening Standard "Best Books about London" Selection In popular imagination, London is a city of fog. The classic London fogs, the thick yellow "pea-soupers," were born in the industrial age of the early nineteenth century. Christine L.

Corton tells the story of these epic London fogs, their dangers and beauty, and their lasting effects on our culture and imagination. "Engrossing and magnificently researched...Corton's book combines meticulous social history with a wealth of eccentric detail. Thus we learn that London's ubiquitous plane trees were chosen for their shiny, fog-resistant foliage. And since Jack the Ripper actually went out to stalk his victims on fog-free nights, filmmakers had to fake the sort of dank, smoke-wreathed London scenes audiences craved. It's discoveries like these that make reading *London Fog* such an unusual, enthralling and enlightening experience." —Miranda Seymour, New York Times Book Review "Corton, clad in an overcoat, with a linklighter before her, takes us into the gloomier, long 19th century, where she revels in its Gothic grasp. Beautifully illustrated, *London Fog* delves fascinatingly into that swirling miasma." —Philip Hoare, New Statesman

*Abide With Me*: From the Pulitzer Prize-winning author of *Olive Kitteridge* From the bestselling author of the Pulitzer Prize-winning *Olive Kitteridge*, this is a startlingly beautiful novel about love and abandonment, faith and hypocrisy – and the peril of family secrets. 'Deeply moving... In one beautiful page after another, Strout captures the mysterious combinations of hope and sorrow.' The Washington Post Katherine is only five years old. Struck dumb with grief at her mother's death, it is down to her father, the heartbroken minister Tyler Caskey, to bring his daughter out of silence. But Tyler is barely surviving himself. Since Lauren's death he struggles to find the right words for his sermons – how can he be a leader to his congregation when he

himself is lost? When Katherine's teacher calls to discuss his daughter's anti-social behaviour, it sparks a chain of events that begins to tear down Tyler's defences. The small-town rumour-mill has much to make of Katherine's odd behaviour, and even more to say about Tyler's relationship with his housekeeper. In Tyler's darkest hour, a startling discovery will test his congregation's humanity - and his own will to endure the kinds of trials that sooner or later test us all. Praise for Elizabeth Strout

Be careful what you wish for, his mother used to say. Yet how many times, in his twenty years defending the underclass, has Monty Collins wished for a client who is intelligent, articulate and tattoo-free? Now he has one, but it's not long before his mother's warning comes back to haunt him. Father Brennan Burke was born in Ireland, raised in New York, educated in Rome — he's equally fluent in Latin and the language of the street. And he is the prime suspect in the killing of a foxy young girl whose body was found carved with a religious sign, a sign that points straight to the priest. From their first meeting, Monty finds Burke acerbic, arrogant, and evasive about his relationship with the victim. Conflict between lawyer and client simmers all through the ordeal that lies ahead, as evidence piles up and murder charges seem inevitable. With Burke remaining tight-lipped about his past, Monty has no choice but to go behind his back and conduct a

probe into the life of his own client. Never in his career has Monty been so lost for answers, until a long-forgotten incident takes on new and ominous meaning . . .

As the electric power industry faces the challenges of climate change, technological disruption, new market imperatives, and changing policies, a renowned energy expert offers a roadmap to the future of this essential sector. As the damaging and costly impacts of climate change increase, the rapid development of sustainable energy has taken on great urgency. The electricity industry has responded with necessary but wrenching shifts toward renewables, even as it faces unprecedented challenges and disruption brought on by new technologies, new competitors, and policy changes. The result is a collision course between a grid that must provide abundant, secure, flexible, and affordable power, and an industry facing enormous demands for power and rapid, systemic change. The fashionable solution is to think small: smart buildings, small-scale renewables, and locally distributed green energy. But Peter Fox-Penner makes clear that these will not be enough to meet our increasing needs for electricity. He points instead to the indispensability of large power systems, battery storage, and scalable carbon-free power technologies, along with the grids and markets that will integrate them. The electric power industry and its regulators will have to provide all of these, even as they grapple with changing business models for local electric utilities, political instability, and technological change. Power after Carbon makes sense of all the moving parts, providing actionable recommendations for anyone involved with or relying on the electric power system.

Into the Deep traces one woman's spiritual odyssey from birthright evangelicalism through postmodern feminism and, ultimately, into the Roman Catholic Church. As a college student, Abigail Favale experienced a feminist awakening that reshaped her life and faith. A decade later, on the verge of atheism, she

found herself entering the oldest male-helmed institution on the planet--the last place she expected to be. With humor and insight, the author describes her gradual exodus from Christian orthodoxy and surprising swerve into Catholicism. She writes candidly about grappling with wounds from her past, Catholic sexual morality, the male priesthood, and an interfaith marriage. Her vivid prose brings to life the wrenching tumult of conversion--a conversion that began after she entered the Church and began to pry open its mysteries. There, she discovered the startling beauty of a sacramental cosmos, a vision of reality that upended her notions of gender, sexuality, identity, and authority. Into the Deep is a thoroughly twenty-first-century conversion, a compelling account of recovering an ancient faith after a decade of doubt.

Named a best book of the year by Entertainment Weekly, Time, and The Chicago Tribune, and named a notable book by The New York Times Book Review and The Washington Post “Remarkable . . . With this book [Wolitzer] has surpassed herself.”—The New York Times Book Review “A victory . . . The Interestings secures Wolitzer's place among the best novelists of her generation. . . . She's every bit as literary as Franzen or Eugenides. But the very human moments in her work hit you harder than the big ideas. This isn't women's fiction. It's everyone's.”—Entertainment Weekly (A) From Meg Wolitzer, the New York Times--bestselling author of *The Female Persuasion*, a novel that has been called “genius” (The Chicago Tribune), “wonderful” (Vanity Fair), “ambitious” (San Francisco Chronicle), and a “page-turner” (Cosmopolitan). The summer that Nixon resigns, six teenagers at

a summer camp for the arts become inseparable. Decades later the bond remains powerful, but so much else has changed. In *The Interestings*, Wolitzer follows these characters from the height of youth through middle age, as their talents, fortunes, and degrees of satisfaction diverge. The kind of creativity that is rewarded at age fifteen is not always enough to propel someone through life at age thirty; not everyone can sustain, in adulthood, what seemed so special in adolescence. Jules Jacobson, an aspiring comic actress, eventually resigns herself to a more practical occupation and lifestyle. Her friend Jonah, a gifted musician, stops playing the guitar and becomes an engineer. But Ethan and Ash, Jules's now-married best friends, become shockingly successful—true to their initial artistic dreams, with the wealth and access that allow those dreams to keep expanding. The friendships endure and even prosper, but also underscore the differences in their fates, in what their talents have become and the shapes their lives have taken. Wide in scope, ambitious, and populated by complex characters who come together and apart in a changing New York City, *The Interestings* explores the meaning of talent; the nature of envy; the roles of class, art, money, and power; and how all of it can shift and tilt precipitously over the course of a friendship and a life.
