In the motets of Philippe de Vitry, Guillaume de Machaut, and their contemporaries, tenors have often been characterized as the primary shaping forces, prior in conception as well as in construction to the upper voices. Tenors are shaped by the interaction of talea and color, medieval terms now used to refer to the independent repetition of rhythms and pitches, respectively. The presence in the upper voices of the periodically repeating rhythmic patterns, often referred to as "isorhythm," has been characterized as an amplification of tenor structure. But a fresh look at the medieval treatises suggests a revised analytical vocabulary: for many fourteenth- and fifteenth-century writers, both color and talea involved rhythmic repetition, the latter in the upper voices specifically. And attention to upper-voice taleae independently of tenor structures brings renewed emphasis to the significant portion of the repertory in which upper voices evince formal schemes that differ from those in the tenors. These structures in turn suggest a revision of the presumed compositional process for motets, implying that in some cases upper-voice text and forms may have preceded the selection and organization of tenors. Such revisions have implications for hermeneutic endeavors, since not only the forms of motet voices but the meanings of their texts change, depending on whether analysis proceeds from the tenor up, or from the top down. Where the presumed compositional and structural primacy afforded to tenors has encouraged a strand of interpretation that reads the upper-voice poetry as conforming to, and amplifying, the tenor text snippets and their liturgical contexts, a "bottom-down" view casts tenors in a supporting role and reveals the poetic impulse of the upper voices as the organizing principle of motets.

Bossa Nova and Samba for Guitar Entangled: Embrace

Ancient prophecies promise a future of hope, but who dares face the wrath of a powerful tyrant? Daeson seeks the counsel of the oracle that propelled him into a life of ruin and terrifying adventure. But the ruthless Chancellor Lockridge offers no quarter to his life-long friend turned traitor. Lockridge’s thirst for revenge spills the blood of thousands of innocent Rayleans, and Daeson bears the burden of global calamity. Rejected by all except the spirited Raviel, Daeson struggles to carry on. When the whispers of the Immortal Eil Yon beckon Daeson to a remote moon of the planet Mesos, he must find the courage to face his deepest fears. Can Daeson trust the words of an ancient Immortal and inspire the slaves of Jypton to rise up? Not only does the future of his people hang in the balance, but the entire galaxy as well!

*Book of the Month Club Selection
*Edgar Award Nominee: Best First Novel by an American Author
A “hugely entertaining” (Wall Street Journal) mystery starring “a Royal Tenenbaums-esque clan of geniuses” (Martha Stewart Living)—perfect for fans of Mr. Penumbra’s 24-Hour Bookstore. In this “riveting...brilliant” (Booklist) debut, Hazel Severy, the owner of a struggling Seattle bookstore, receives a letter from her adoptive grandfather—mathematician Isaac Severy—days after he dies in a suspected suicide. In his puzzling letter, Isaac alludes to a secretive organization that is after his final bombshell equation, and he charges Hazel with safely delivering it to a trusted colleague. But first, she must find where the equation is hidden. While in Los Angeles for Isaac’s funeral, Hazel realizes she’s not the only one searching for his life’s work, and that the equation’s implications have potentially disastrous consequences for the extended Severy family, a group of dysfunctional geniuses unmoored by the sudden death of their patriarch. As agents of an enigmatic company shadow Isaac’s favorite son—a theoretical physicist—and a long-lost cousin mysteriously reappears in Los Angeles, the equation slips further from Hazel’s grasp. She must unravel a series of confounding clues hidden inside one of her favorite novels, drawing her ever closer to his mathematical treasure. But when her efforts fall short, she is forced to enlist the help of those with questionable motives. “A novel that is anything but clueless, filled with consideration and compassion” (The Washington Post), The Last Equation of Isaac Severy proves that, like Hazel, you don’t have to love math to fall under the Severy spell.

36:00:00 The clock activates so suddenly in my mind, my head involuntarily jerks a bit to the side. The fog vanishes, dissipated in an instant as though it never was. Memories come slotting into place, their edges sharp enough to leave furrows, and suddenly I know. I know exactly who I am. My name is Lia Johansen, and I was named for a prisoner of war. She lived in the Tiersten Internment Colony for two years, and when they negotiated the return of the prisoners, I was given her memories and sent back in her place. And I am a genetically engineered human bomb. Lia Johansen was created for only one purpose: to slip onto the strategically placed New Sol Space Station and explode. But her mission goes to hell when her clock malfunctions, freezing her countdown with just two minutes to go. With no Plan B, no memories of her past, and no identity besides a name stolen from a dead POW, Lia has no idea what to do next. Her life gets even more complicated when she meets Michael Sorenson, the real Lia’s childhood best friend. Drawn to Michael and his family against her better judgment, Lia starts learning what it means to live and love, and to be human. It is only when her countdown clock begins sporadically losing time that she realizes even duds can still blow up. If she wants any chance at a future, she must find a way to unlock the secrets of her past and stop her clock. But as Lia digs into her origins, she begins to suspect there’s far more to her mission and to this war, than meets the eye. With the fate of not just a space station but an entire empire hanging in the balance, Lia races to find the truth before her time—literally—runs out.

Today, companies are expected to be flexible and both rapidly responsive and resilient to change, which basically asks them to be agile. By combining Beyond Budgeting,Open Space, Sociocracy, and Agile, this book provides a practical guide for companies that want to be agile company-wide. Notes to the 2nd edition: This second edition reflects such updates as: the new Agile Fluency Model, the renaming / rebranding of Statoil to Equinor, and some small additions to complexity. We also enhanced the description of Organizational Open Space and explain how it differs from Liberating Structures. Enjoy insights in the book shared by Jez Humble, Diana Larsen, James Shore, Johanna Rothman, and Bjarte Bogsnes. Find out what Spotify, ING, Ericsson, and Walmart say in the book. Quotes from early readers: “[This is] a very important book. My hopes are that it will be the missing link between agile for teams and the flexible, adaptive and humane organisations we want to build. It’s a great book. Thanks for writing it!” ~Sandy Mamoli, author of Creating Great Teams “Just as Spotify has worked hard to make all aspects of product development align well and work together - I see Jutta and John in this book exploring methods and processes that will work very well across the whole company.” ~ Anders Ivarsson, Spotify “I love how those practices [are] integrated and summarized into actionable recommendations.” ~ Yves Lin, Titansoft “Really wonderful balance of structure and space, rigor and creativity, that you’re suggesting.” ~ Michael Herman, Openspaceworld.org “Company-wide Agility with Beyond Budgeting, Open Space and Sociocracy [...] makes an important case for companies to regard trust and autonomy the norm, rather than a privilege. [...] Overall a great overview of how leaders can reimagine the way power is distributed within their companies.” ~ Aimee Groth, Author of The Kingdom of Happiness: Inside Tony Hsieh’s Zapponian Utopia This book invites you to take a new perspective that addresses the challenges of doing business in a volatile, uncertain, complex, and ambiguous world.

From the #1 New York Times bestselling author of the Ella and Micha series comes a powerful story of love, healing, and impossible choices . . .

BREAKING NOVA Nova Reed used to have dreams-of becoming a famous drummer, of marrying her true love. But all of that was taken away in an instant. Now she's getting by as best she can, though sometimes that means doing things the old Nova would never do. Things that are slowly eating away at her spirit. Every day blends into the next . . . until she meets Quinton Carter. His intense, honey brown eyes instantly draw her in, and he looks just about as broken as she feels inside. Quinton once got a second chance at life-but he doesn't want it. The tattoos on his arm are a constant reminder of what he's done, what he's lost. He's sworn to never allow happiness into his life . . . but then beautiful, sweet Nova makes him smile. He knows he's too damaged to get close to her, yet she's the only one who can make him feel alive again. Quinton will have to decide: does he deserve to start over? Or should he pay for his past forever?

It is some time after Ed Chianese's trip into the Kefahuchi Tract. A major industry of the Halo is now tourism. The Tract has begun to expand and change, but, more problematically, parts of it have also begun to fall to earth, piecemeal, on the Beach planets. We are in a city, perhaps on New Venusport or Motel Splendido: next to the city is the event site, the zone, from out of which pour new, inexplicable artefacts, organisms and escapes of living algorithm - the wrong physics loose in the universe. They can cause plague and change. An entire department of the local police, Site Crime,

exists to stop them being imported into the city by adventurers, entradistas, and the men known as 'travel agents', profiteers who can manage - or think they can manage - the bad physics, skewed geographies and psychic onslaughts of the event site. But now a new class of semi-biological artefact is finding its way out of the site, and this may be more than anyone can handle.

Nova Bantam

Years after Ed Chianese's fateful trip into the Kefahuchi Tract, the tract has begun to expand and change in ways we never could have predicted—and, even more terrifying, parts of it have actually begun to fall to Earth, transforming the landscapes they encounter. Not far from Moneytown, in a neighborhood of underground clubs, body-modification chop shops, adolescent contract killers, and sexy streetwalking Monas, you'll find the Saudade Event Site: a zone of strange geography, twisted physics, and frightening psychic onslaughts—not to mention the black and white cats that come pouring out at irregular intervals. Vic Serotonin is a “travel agent” into and out of Saudade. His latest client is a woman who's nearly as unpredictable as the site itself—and maybe just as dangerous. She wants a tour just as a troubling new class of biological artifacts are leaving the site—living algorithms that are transforming the world outside in inexplicable and unsettling ways. Shadowed by a metaphysically inclined detective determined to shut his illegal operation down, Vic must make sense of a universe rapidly veering toward a virulent and viral form of chaos...and a humanity almost lost.

Evangeline is living the life of a normal teenager—going to school and hanging out with friends—until mysterious, severe symptoms begin appearing. After passing out in the middle of a party, life as she knows it spirals beyond her grasp. She is then diagnosed with a rare, genetic blood disorder that causes her body's white blood cells to kill the red ones. In the delirium of her deteriorating health, a door to a parallel world opens before her; however, once she steps through it, the portal closes, and she is unable to return to Earth. The place Evangeline now finds herself in is called Terra Nova, a world wherein vampires rule supreme, with no traces of humanity left to speak of. Curious but afraid, she quickly learns that Terra Nova is not the shadow-side of Earth, but rather the tragic result of government experimentation. In order to survive, she must keep her mind open and accept the changes her body is undergoing; soon enough, those who she initially thinks are murderers become her trainers, whose help she must enlist if she ever hopes to return home—and soon enough, a romantic bond begins to bloom. Meanwhile, Evangeline's brother and friends back on Earth try to figure out what happened to her, and how the government is involved, and how to bring her home. Unbeknownst to any of them is the mysterious outcast Bambi, whose secrecy disguises her power in making a devastating choice: save one world at the risk of destroying the other.
