The Cambridge Guide to Second Language Assessment Crimson Publishing
Sociolinguistics is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used, and society's effect on language. It differs from sociology of language, which focuses on the effect of language on society. Sociolinguistics overlaps considerably with pragmatics. It is historically closely related to linguistic anthropology, and the distinction between the two fields has been questioned. This book deals with the social life of language. The field ranges from micro-analyses to broadly-based policy and planning undertakings. As such, this book draws from sociolinguistics, the sociology of language, and psycholinguistics. The relationship between language and identity - whether of an individual or a group - is a strong thread linking all the topics covered in the book. For researchers and advanced students, it gives access to the field's most pressing issues and debates, as well as providing a platform for new initiatives in sociolinguistic research.

Teaching in Post-Compulsory Education Multilingual Matters

There have been a number of books published on various aspects of materials development for language teaching but Developing Materials for Language Teaching is the only one which provides a comprehensive coverage of the main aspects and issues in the field. This second edition brings it completely up to date and expands on the original book. It deals with advances in IT and an increasingly globalized world. It is the only publication which views current developments in materials development through the eyes of developers and users of materials from all over the world. In doing so it applies principles to practice in ways demonstrated to facilitate the effectiveness of language learning materials. The chapters are written so that the book provides critical overviews of recent developments in materials development and at the same time acts as a stimulus for development and innovation in the field. It is intended both for use as a course book on postgraduate and teacher training courses and as a resource for the stimulus and refreshment of teachers, publishers and applied linguists in the field. The book contains updated versions of many of the chapters in the 2003 edition plus new chapters on corpus-informed materials development, materials development for blended learning, materials development for EAP, materials development for ESOL and materials development for young learners.

Study Skills for Students with Dyslexia

OXFORD University Press

Adopting a learner-centred approach that places an emphasis on hands-on child SL methodology, this book illustrates the practices used to teach young second language learners in different classroom contexts: (1) English-as-an-Additional-Language-or-Dialect (EAL/D) - both intensive EAL/D and EAL/D in the mainstream (2) Language-Other-Than-English (LOTE) (3) Content-and-Language-Integrated-Learning (CLIL), (4) Indigenous (5) Foreign-Language (FL). It will be particularly useful to undergraduate teachers to build upon the literacy unit they undertake in the first years of their course to explore factors that constitute an effective child SL classroom and, in practical terms, how to develop such a classroom. The pedagogical strategies for teaching young language learners in the six chapters are firmly guided by research-based findings, enabling not only pre-service teachers but also experienced teachers to make informed choices of how to effectively facilitate the development of the target language, empowering them to assume an active and effective role of classroom practitioners.

Key Concepts in Educational

Assessment A&C Black

Through its unique theoretical framework - a cultural understanding of teaching and learning - this book develops a new way of understanding educational improvement, one which focuses on the formation and transformation of the practices through which students learn. Based on detailed ethnographic research of seventeen learning sites in further education colleges, this book generates a unique insight into a wide variety of practices of teaching and learning. Illustrated by case studies, it is structured around three key questions: what do learning cultures in FE look like and how do they transform over time? how do learning cultures transform people? how can people (tutors, managers, policy makers, but also students) transform learning cultures for the better? Through a combination of theory and analysis, Improving Learning Cultures in Further Education makes a strong case for the importance of a cultural approach to the improvement of teaching and learning in further education, and provides practical guidance for researchers, policymakers and practitioners for implementing change for the better.
