One of Fuller's most popular works, *Operating Manual for Spaceship Earth*, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide "spaceship earth" toward a sustainable future. From 1980 to 2000, Camel Trophy took more than 500 amateur competitors from 35 countries on extraordinary and challenging adventures. On most of these events, teams drove specially prepared Land Rovers to the limit and beyond in locations as varied as Borneo, Mongolia, Papua New Guinea and Tanzania. Camel Trophy charts the history of the event and tells the incredible stories resulting from the constant challenge to both man and machine.. As one of the official photographers on the last four events, author Nick Dumbleby's first-hand account, the shared experiences of competitors, along with contemporary reports and extensive new interviews of key event leaders, all combine to make Camel Trophy a gripping tale of adventure, adversity, technological change and logistical challenge. Illustrated with a stunning collection of photographs including never-before-published, behind-the-scenes shots, this meticulously researched publication can legitimately claim to be the definitive history of the Camel Trophy.

From the BC doctor who has become a household name for leading the response to the pandemic, a personal account of the first weeks of COVID, for readers of Sam Nutt's *Damned Nations* and James Maskayk's *Life on the Ground Floor*. Dr. Bonnie Henry has been called "one of the most effective public health figures in the world" by *The New York Times*. She has been called "a calming voice in a sea of coronavirus madness," and "our hero" in national newspapers. But in the waning days of 2019, when the first rumours of a strange respiratory ailment in Wuhan, China began to trickle into her office in British Colombia, these accolades lay in a barely imaginable future. Only weeks later, the whole world would look back on the previous year with the kind of nostalgia usually reserved for the distant past. With a staggering suddenness, our livelihoods, our closest relationships, our habits and our homes had all been transformed. In a moment when half-truths threatened to drown out the truth, when recklessness all too often exposed those around us to very real danger, and when it was difficult to tell paranoia from healthy respect for an invisible threat, Dr. Henry's transparency, humility, and humanity became a beacon for millions of Canadians. And her trademark enjoinder to be kind, be calm, and be safe became words for us all to live by. Coincidentally, Dr. Henry's sister, Lynn, arrived in BC for a long-planned visit on March 12, just as the virus revealed itself as a pandemic. For the four ensuing weeks, Lynn had rare insight into the whirlwind of Bonnie's daily life, with its moments of agony and gravity as well as its occasional episodes of levity and grace. Both a global story and a family story, *Be Kind, Be Calm, Be Safe* combines Lynn's observations and knowledge of Bonnie's personal and professional background with Bonnie's recollections of how and

why decisions were made, to tell in a vivid way the dramatic tale of the four weeks that changed all our lives. *Be Kind, Be Calm, Be Safe* is about communication, leadership, and public trust; about the balance between politics and policy; and, at heart, about what and who we value, as individuals and a society. The authors' advance from the publisher has been donated to charities with a focus on alleviating communities hit particularly hard by the pandemic: True North Aid with its Covid-19 response in Northern Indigenous communities, and First Book Canada, with its focus on reading and literacy for underserved, marginalized youth.

The 2002 Used Car and Truck Guide Estate of R. Buckminster Fuller

This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as "a good book on rocket stuff...that's a really fun one" by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.
