A heartwarming story of a couple and their horse exploring what caring for a horse can teach us about

companionship—whether it's with a four-legged friend or a fellow human. A surprise birthday gift plunged Joe and his wife, Kathleen, into the world of horses as complete neophytes without a clue as to what a horse needed or wanted. They searched for logic and sense in the rule books of traditional horse care. What they found was not what they had expected. Written for everyone who has ever loved a horse or ever loved the idea of loving a horse, this memoir leads us on a voyage of discovery as Joe and Kathleen navigate uncharted territory on their way to achieving a true relationship with their horses. Joe Camp's inspiring book unlocks the mystery of a majestic creature who has survived on earth, without assistance, for fifty-five million years and teaches us that the lessons he learned apply not only to horses but also to our relationships with people.

From Twin Peaks to Twilight, from Practical Magic to Portlandia!, Filmlandia! highlights more than 200 film and television

entertainments created and centered in Seattle, Portland, and the greater Pacific Northwest, extensively researched and curated by culture writer David Schmader. The PNW has a thriving, rich film culture, and it's finally celebrated in a guide as visually arresting and compelling as the films and television themselves! More than 200 entries are included and feature: • Hilarious, insightful synopses • Behind-the-scene facts and trivia • Regional scenic highlights In addition, sidebars pepper the pages, covering: • Regional filmmakers like Gus Van Sant and Lynn Shelton • Television shows that shaped the public's perception of the region (such as Twin Peaks, Shrii, and Portlandia!) • Documentaries, queer cinema, silent films, Vancouver-shot imposters, and more. Colorful artwork, inspired by the primary VHS color palette of the 80s, turns this handy guide into a visual treat as well. This is a book for any cinephile, but for those who love and live in the PNW, Filmlandia! is an absolute must-have. Superheroes and Critical Animal Studies Random House

Sanger Rainsford is a big-game hunter, who finds himself washed up on an island owned by the eccentric General Zaroff. Zaroff, a big-game hunter himself, has heard of Rainsford's abilities with a gun and organises a hunt. However, they're not after animals - they're after people. When he protests, Rainsford the hunter becomes Rainsford the hunted. Sharing similarities with "The Hunger Games", starring Jennifer Lawrence, this is the story that created the template for pitting man against man. Born in New York, Richard Connell (1893 - 1949) went on to become an acclaimed author, screenwriter, and journalist. He is best remembered for the gripping novel "The Most Dangerous Game" and for receiving an Oscar nomination for the screenplay "Meet John Doe".

Multispecies Storytelling in Intermedial Practices is a speculative endeavor asking how we may represent, relay, and read worlds differently by seeing other species as protagonists in their own rights. What other stories are to be invented and told

from within those many-tongued chatters of multispecies collectives? Could such stories teach us how to become human otherwise? Often, the human is defined as the sole creature who holds language, and consequently is capable of articulating, representing, and reflecting upon the world. And yet, the world is made and remade by ongoing and many-tongued conversations between various organisms reverberating with sound, movement, gestures, hormones, and electrical signals. Everywhere, life is making itself known, heard, and understood in a wide variety of media and modalities. Some of these registers are available to our human senses, while some are not. Facing a not-so-distant future catastrophe, which in many ways and for many of us is already here, it is becoming painstakingly clear that our imaginaries are in dire need of corrections and replacements. How do we cultivate and share other kinds of stories and visions of the world that may hold promises of modest, yet radical hope? If we keep reproducing the same kind of languages, the same kinds of scientific gatekeeping, the same kinds of stories about "our" place in nature, we remain numb in the face of collapse. Multispecies Storytelling in Intermedial Practices offers steps toward a (self)critical multispecies philosophy which interrogates and qualifies the broad and seemingly neutral concept of humanity utilized in and around conversations grounded within Western science and academia. Artists, activists, writers, and scientists give a myriad of different interpretations of how to tell our worlds using different media - and possibly gives hints as to how to change it, too. *For the Love of Benji* Lulu.com

The Sugar Mouse Cake Wolgemuth & Hyatt, Publishers, Incorporated

Written by Joe Camp, the writer and director of all five Benji movies and all of Benji's television programs, The Benji Method is a non-regulation training book that dispels the notion that training your dog must be difficult, or must be done by an expert, or that you need a PhD in animal psychology to even try. It's fun to read and fun to work with, and captures the spirit of how movie training with Benji is approached with exercises readers can truly enjoy with their dog. Joe Camp says training your dog is simply a matter of love and logic. And true communication. And the purpose of this book is to convince dog owners to feel comfortable with this concept so they can have terrific communication with their dog throughout his or her life; without a bunch of "experts" telling them that they must do it their way or the relationship is doomed. More importantly your dog will rapidly begin to understand the process, and then virtually anything is possible. She will understand that when you speak to her it has meaning and she will be stretching to grasp that meaning, and to apply it. It's all common sense and compassion. And it's really that simple. Helen Dennis, new puppy owner in the UK, writes: "Our very own baby Benji arrived last week and we are having a great time with her. I am eternally grateful for Joe's teaching. She is doing so well. I love the way Joe explained the vocabulary concept. We have worked hard on Sit and Stay and she has already "got it." She loves her crate and all of her toileting

since day 2 has happened in the garden. Thank you so much Joe for all your help. It's superb." If you want your dog to understand you and your wishes better, be controllable, and be a lot happier because he or she has a defined way to please you, you must have this book. For all ages.

#### **The Age of Missing Information**

Originally published in 1978, this classic exploration of humanity's complex relationship with and understanding of wolves returns with a new afterword by the author. Humankind's relationship with the wolf is the sum of a spectrum of responses ranging from fear to admiration and affection. Lopez's classic, careful study has won praise from a wide range of reviewers and improved the way books on wild animals are written. Of Wolves and Men explores the uneasy interaction between wolves and civilization over the centuries, and the wolf's prominence in our thoughts about wild creatures.

Drawing upon an impressive array of literature, history, science, and mythology as well as extensive personal experience with captive and free-ranging wolves, Lopez argues for the wolf's preservation and immerses the reader in its sensory world, creating a compelling portrait of the wolf both as a real animal and as imagined by different kinds of men. A scientist might perceive the wolf as defined by research data, while an Eskimo hunter sees a family provider much like himself. For many Native Americans the wolf is also a spiritual symbol, a respected animal that can strengthen the individual and the community. With irresistible charm and elegance, Of Wolves and Men celebrates careful scientific fieldwork, dispels folklore that has enabled the Western mind to demonize wolves, explains myths, and honors indigenous traditions, allowing us to understand how this remarkable animal has become so prominent for so long in the human heart.
