PHILLIPS PONCE

Foreign Policy of Major Powers Routledge

Short biographical essays of selected South Asian Muslim women authors from 1870 to 1950.

Peace, Politics, and Religion Routledge

The Routledge Companion to Pakistani Anglophone Writing forms a theoretical, comprehensive, and critically astute overview of the history and future of Pakistani literature in English. Dealing with key issues for global society today, from terrorism, religious extremism, fundamentalism, corruption, and intolerance, to matters of love, hate, loss, belongingness, and identity conflicts, this Companion brings together over thirty essays by leading and emerging scholars, and presents: the transformations and continuities in Pakistani anglophone writing since its inauguration in 1947 to today; contestations and controversies that have not only informed creative writing but also subverted certain stereotypes in favour of a dynamic representation of Pakistani Muslim experiences; a case for a Pakistani canon through a critical perspective on how different writers and their works have, at different times, both consciously and unconsciously, helped to realise and extend a uniquely Pakistani idiom. Providing a comprehensive yet manageable introduction to cross-cultural relations and to historical, regional, local, and global contexts that are essential to reading Pakistani anglophone literature, The Routledge Companion to Pakistani Anglophone Writing is key reading for researchers and academics in Pakistani anglophone literature, history, and culture. It is also relevant to other disciplines such as terror studies, post-9/11 literature, gender studies, postcolonial studies, feminist studies, human rights, diaspora studies, space and mobility studies, religion, and contemporary South Asian literatures and cultures.

Beyond 9/11 SAGE

In the Common Law system, it is the doctrine of 'precedent' which courts depend upon, more than any other legal doctrine, while arriving at their decisions. The elements that constitute the doctrine of precedent are numerous and complex. Despite its considerable importance in the Pakistani legal system, the operation of this doctrine has so far drawn little academic attention. This work bridges that gap. It thoroughly examines the history, origin and context of this doctrine, as well as the rules which guide its operation in Pakistan in the Supreme Court, the High Courts, the Federal Shariat Court, and the various tribunals, with examples and analysis of case law. How is the ratio of a precedent case determined? What is the interpretation of Article 189 of the Constitution of Pakistan? Are decisions of the Supreme Court binding on the Supreme Court itself? Are the lower courts bound by the dictum of the Supreme Court? Are there decisions of the Supreme Court that are not binding on lower courts? What is the position of superior courts in India and Azad Jammu & Kashmir (AJK) on all these issues? What value should be attached to precedent in criminal cases? Can the Supreme Court, the High Courts, and the Federal Shariat Court overrule their own previous decisions? And is the practice of the higher courts in Pakistan - under Articles 189, 201 and 203 GG - in conformity with Islamic law? These are some of the questions, vital to understand the operation of precedent in Pakistani law, which are discussed in this work.

Master Trainer's Manual Univ of North Carolina Press

This book provides the latest and updated account of the principles and practices of family laws in Pakistan. It is primarily based on the latest case law and statutes. The authors not only present systematically organised case law but also critically evaluate the leading judicial precedents. Various chapters of the book cover general principles of family law, demonstrate their application based on the facts of each case, trace patterns of developments in case law, rationalise conflicting judicial authorities, and propose law reform, wherever required. This is the first book that takes into account personal laws of non-Muslims in Pakistan and covers the important issue of the conflict of personal laws.

An Analysis of Futures and Options Routledge

Nowadays, society is constantly changing, and new ways of life are being developed by due to nonstop technological advancements. This generates changes in family, schools, the media, etc. New technologies are creating virtual environments to manage learning and academic achievement, and this is a new challenge to approach formal and informal education. In the last few decades, teachers, families, and educational administrators had very well-defined fields of action and roles to play. Now, these roles are disfigured, and influences from all agents are arguable and more difficult to face. At this current stage, problems sometimes appear that require different forms of intervention. Some of the problems are violence towards people; child abuse; drug abuse at increasingly early ages; integration problems due to immigration; dropping out of school; and typical problems related to student development, personality, disabilities, social and psychical maladjustment, teenagers socioaffective relationships, etc. Research on school success and failure has a long history, but there is still no agreement concerning the prevalence of these variables to explain academic achievement, the relationship between those variables, and which other variables modulate their level of impact. For many years, cognitive psychology has emphasized cognitive function as the most relevant for learning in school. However, recent studies highlight the importance of motivational and affective functions in building consistent models to explain learning and academic achievement. This change of perspective, from the classical cognitive model to a self-regulated learning model, has implied a new orientation in the research of the factors involved in school success and failure. Self-regulated learning models try to integrate students cognitive, socioaffective, and behavioral aspects. These models describe the different components involved in successful learning at all school stages, explaining reciprocal relationships between those components and directly relating learning to personal achievement, motivation, volition, and emotions. With this new paradigm, students not only contribute to strengthening their intelligence, but also their motivational and emotional qualities, all related to achieving personal balance. This book presents studies, ideas, and recommendations to shed light on the complex educational world. Education has limits and difficulties, but it is also the only instrument that can develop students potential into personal success.

Homage to the Fifties Routledge

'... a welcome addition to the already available introductory works on Islam. The chapters of the book combine depth of analysis and erudition on a wide range of subjects. Thus in a single volume one finds several superbly written papers not only on the foundations of Islam and the manifestations of Islamic culture but also on issues which are at the centre of contemporary debates among Muslims such as multiculturalism, social justice, democracy and diversity. As a sourcebook

this work is equally useful for students, academicians and general readers' - Zafar Ishaq Ansari, Director, Islamic Research Institute, International Islamic University Islamic Studies is at a critical moment in its history. It seeks both to maintain its rich history and to engage with other - sometimes dominant - cultural and political studies. This tension is producing complex changes in both the theory and the practice of Islamic Studies. This timely and stimulating Handbook, edited by world-class experts in the field, provides a comprehensive guide to Islamic Studies today. It examines the main issues in the field and explores the key debates. It provides readers with an indispensable, balanced guide to the roots of Islam and the challenges it faces in the twenty-first century. The Handbook includes discussions of: - Islam as a community of discourse and a global system - Islam, diaspora and multiculturalism - The Qu'ran today - Islam as a moral and judicial system - Islam and politics - Islam and culture - Diversities and Islam Concise, level-headed and penetrating, this collection will be of interest to anyone who studies contemporary Islam. It brings together an unparalleled collection of international scholars who illuminate some of the most urgent and complex issues in the world today.

4th International Conference, ICITL 2021, Virtual Event, November 29 - December 1, 2021.

Proceedings Oxford University Press, USA

This book brings together the current thinking and research of two major investigators in the field of educational effectiveness. After defining educational effectiveness, the authors analyse the various theories and strands of research within educational effectiveness, especially with respect to the comprehensive model developed by Creemers. Written by one of the worlds leading experts in the field, this book will both elucidate our current understanding of educational effectiveness and carry the discipline forward by proposing profound changes to accepted views.

Decision Support Methods for Assessing Flood Risk and Vulnerability Cambridge University Press

Relationships between peace, politics and religion are often controversial, and sometimes problematic. Religion is a core source of identity for billions of people around the world and it is hardly surprising that sometimes it becomes involved in conflicts. At the same time, we can see religion involved not only in conflict. It is also central to conflict resolution, peace-making and peacebuilding. Religious involvement is often necessary to try to end hatred and differences, frequently central to political conflicts especially, but not only, in the Global South. Evidence shows that religious leaders and faith-based organisations can play constructive roles in helping to end violence, and in some cases, build peace via early warnings of conflict, good offices once conflict has erupted, as well as advocacy, mediation and reconciliation. The chapters of this book highlight that religion can encourage both conflict and peace, through the activities of people individually and collectively imbued with religious ideas and ideals.

Muslim American Women on Campus: Undergraduate Social Life and Identity

Investing in Quality Teaching UNESCO Publishing

Each year, floods cause an enormous amount of global economic and social damage, impacting transportation systems, water supplies, agriculture, and health. Response management to catastrophic floods require increased measures involving integrated planning, adaptation, and recovery strategies in order to protect against human loss. Decision Support Methods for Assessing Flood Risk and Vulnerability is a pivotal reference source that provides vital research on the application of effective models and tools focused on the diagnosis of vulnerability to flooding risks and evaluates and measures the impact of floods on socio-economic wellbeing. While highlighting topics such as hydrological events, soil erosion, and flood vulnerability, this publication explores methods of identifying appropriate adaptation strategies. This book is ideally designed for researchers, students, academicians, policymakers, government officials, and technology developers seeking current empirical research findings to be used to improve the overall understanding of the flood phenomenon.

The Little Bird The Other Press

This book constitutes the refereed proceedings of the 4th International Conference on Innovative Technologies and Learning, ICITL 2021, held in November/December 2021. Due to COVID-19 pandemic the conference was held virtually. The 59 full papers presented together with 2 short papers were carefully reviewed and selected from 110 submissions. The papers are organized in the following topical sections: Artificial Intelligence in Education; Augmented, Virtual and Mixed Reality in Education; Computational Thinking in Education; Design Framework and Model for Innovative learning; Education Practice Issues and Trends; Educational Gamification and Game-based Learning; Innovative Technologies and Pedagogies Enhanced Learning; Multimedia Technology Enhanced Learning; Online Course and Web-Based Environment; and Science, Technology, Engineering, Arts and Design, and Mathematics.

This book is a collection of short essays, accessible through open access, which takes the interested reader on a tour across the global higher education landscape. It addresses pertinent themes and challenges in higher education. To mark the 70th anniversary of the International Association of Universities (IAU) and its role in higher education since 1950, experts from around the world share their insights into higher education's recent past, present and future. The book is divided into six parts: Part I - "70 years of Higher Education Cooperation and Advocacy" looks back at key events in IAU's history, its mission and significant activities over time, and remarks on the current global context informing its quest to promote academic partnerships and solidarity on a global scale. Part II - "Facilitating International Cooperation" provides for different perspectives on the transformation of the internationalisation of higher education and the contribution of higher education to international

cooperation. Part III - "Coding the Values" debates the values upon which higher education was, is and will have to be built to provide for a democratic and inclusive society. Part IV - "The Changing Landscape" analyses various aspects of the transformation of higher education in an evolving context across the globe. Part V - "The Promise of Education" reflects on the role of higher education, its ideals and shortfalls and what it must do to stay true to its promise to help shape our societies. Part VI - "Opening up - The Future of Higher Education" focuses on future scenarios of higher education and call on the reader to envision a different kind of higher education and reimagine the contribution of higher education to society, as well as future roles for the IAU. The book will be of interest to higher education policy makers and academics. It is also of interest to the general public, as it provides a comprehensive overview of the challenges higher education institutions currently face and suggests scenarios of what the future of education might look like.

Training Foreign Language Teachers Springer

Based on 30 years of research and analysis, this definitive book is a profound, multi-layered, and historical analysis of the nature and role of the Pakistan army in the country's polity as well as its turbulent relationship with the United States. Shuja Nawaz examines the army and Pakistan in both peace and war. Using many hitherto unpublished materials from the archives of the United States, the United Kingdom, and the General Headquarters of the Pakistan Army, as well as interviews with key military and political figures in Pakistan and the United States, he sheds light not only on the Pakistan Army and its US connections but also on Pakistan as a key Muslim country in one of the world's toughest neighborhoods. In doing so, he lays bare key facts about Pakistan's numerous wars with India and its many rounds of political musical chairs, as well as the Kargil conflict of 1999. He then draws lessons from this history that may help Pakistan end its wars within and create a stabler political entity.

Beyond Academic Learning First Results from the Survey of Social and Emotional Skills Kluwer Law International B.V.

Islamic Commercial Law: An Analysis of Futures and Options focuses on options and futures as trading tools and explores their validity from an Islamic point of view. Futures and options are a completely new phenomenon which has no parallel in Islamic commercial law. After reviewing the existing rules of Islamic law of contract and verifying their relevance or otherwise to futures trading, the author, Professor M H Kamali, advances a new perspective on the issue of futures and options based on an interpretation of the Qur'an and the Sunnah and referring to the principle of maslaha (consideration of public interest) as enshrined in the Shari'ah. Islamic Commercial Law consists of three parts. Part One is devoted to the description of futures trading and the understanding of operational procedures of futures and futures markets; Part Two investigates the issue of permissibility of futures trading in Islamic law and the underlying questions of risk-taking and speculation, which are of central concern to the topic. Part Three is devoted to an analysis of options. This work will be of use to anyone working on Islamic law, comparative law or working in Islamic banking.

Distributed Artificial Intelligence (DAI), Regulatory Policy and Economics, Implementation Oxford University Press, USA

Avoiding the traps of sensational political exposes and specialized scholarly Orientalism, Carl Ernst introduces readers to the profound spiritual resources of Islam while clarifying diversity and debate within the tradition. Framing his argument in terms of religious studies, Ernst describes how Protestant definitions of religion and anti-Muslim prejudice have affected views of Islam in Europe and America. He also covers the contemporary importance of Islam in both its traditional settings and its new locations and provides a context for understanding extremist movements like fundamentalism. He concludes with an overview of critical debates on important contemporary issues such as gender and veiling, state politics, and science and religion.

Family Laws in Pakistan Springer

Methods and Techniques Springer

This book discusses in-depth the concept of distributed artificial intelligence (DAI) and its application to cognitive communications. In this book, the authors present an overview of cognitive communications, encompassing both cognitive radio and cognitive networks, and also other application areas such as cognitive acoustics. The book also explains the specific rationale for the integration of different forms of distributed artificial intelligence into cognitive communications, something which is often neglected in many forms of technical contributions available today. Furthermore, the chapters are divided into four disciplines: wireless communications, distributed artificial intelligence, regulatory policy and economics and implementation. The book contains contributions from leading experts (academia and industry) in the field. Key Features: Covers the broader field of cognitive communications as a whole, addressing application to communication systems in general (e.g. cognitive acoustics and Distributed Artificial Intelligence (DAI) Illustrates how different DAI based techniques can be used to self-organise the radio spectrum Explores the regulatory, policy and economic issues of cognitive communications in the context of secondary spectrum access Discusses application and implementation of cognitive communications techniques in different application areas (e.g. Cognitive Femtocell Networks (CFN) Written by experts in the field from both academia and industry Cognitive Communications will be an invaluable guide for research community (PhD students, researchers) in the areas of wireless communications, and development engineers involved in the design and development of mobile, portable and fixed wireless systems., wireless network design engineer. Undergraduate and postgraduate students on elective courses in electronic engineering or computer science, and the research and engineering community will also find this book of interest.

Building a Road to Nuclear Disarmament OECD Publishing

This book focuses on the way that notions of home and identity have changed for Muslims as a result of international 'war on terror' rhetoric. It uniquely links the post-9/11 stereotyping of Muslims and Islam in the West to the roots of current jihadism and the resurgence of ethnocentrism within the subcontinent and beyond.

The Promise of Higher Education CRC Press

This report gauges progress toward achieving high quality teaching in every classroom, using data about teaching conditions that are new since publication of an earlier report by the National Commission on Teaching and America's Future. Section 1, "Doing What Matters Most: Investing in Quality Teaching," describes the Commission's original findings and recommendations following two years of study. Findings indicate that most schools and teachers cannot achieve new educational goals because they do not know how and do not receive support to do so. Recommendations include linking teacher standards to student standards, reinventing teacher preparation and professional development, overhauling teacher recruitment, putting qualified teachers in every classroom, and organizing schools for success for all. Section 2, "America's Agenda for Education," discusses new standards and new students in America's schools, examining why and how teaching matters. Section 3, "Lessons from Last Decade's Reforms," discusses major initiatives in North Carolina, Connecticut, and other states for improving teaching quality. Section 4, "The Current Status of Teaching," discusses teacher recruitment and teacher supply and demand; salaries and working conditions; retention; qualifications and training; reform of teacher education and induction; access to professional development; and progress in school reform. Section 5, "Evidence of Progress," describes federal, state, and local initiatives to improve quality. Six appendixes offer state report cards on teacher quality; state-by-state data tables; National Council for the Accreditation of Teacher Education, Interstate New Teacher Assessment and Support Consortium, and National Board standards; Commission staff, advisors, and consultants; partner state contact persons; and national organization partners and contact persons.
