"In a busy field like obstetrics/gynecology, this book provides a useful review of relevant topics in vignette fashion. It offers excellent references at the end of each vignette to more critically review topics as well. Excellent for CREOGs or board review."-- Doody's Review Service Using a unique "vignette & question" format at the core of a case conference, this one-of-a-kind resource expertly explains clinical and educational concepts--each selected for their relevance for

clinical practice and preparation for any test you may face. After a brief, illustrated clinical presentation (one or two figures per vignette), the authors "work through" the diagnosis and management of a particular case, answering questions as they go. Supporting this real-world, bedside perspective are appropriate references for all of the evidence-based answers, plus brief explanations that call attention to key concepts and information. Obstetrics & Gynecology features: 150 clinical vignettes in one convenient volume, covering the full spectrum of OB/GYN, from postpartum mastitis and fetal heart rate monitoring... to elective abortion... to

breast and cervical cancer 1000 questions and answers relating to each clinical vignette- an easy-to-read, evidence-based study tool for review Study-enhancing complete references that conveniently accompany answers to the clinical vignette questions A streamlined, easy-access organization that includes sections on office management (including general health and screening), obstetrics, gynecology, reproductive endocrine and infertility, gynecologic oncology, and urogynecology And much more IGI Global Case Studies in Finance links managerial decisions to capital markets and the expectations of investors. At the core

of almost all of the cases is a valuation task that requires students to look to financial markets for guidance in resolving the case problem. The focus on value helps managers understand the impact of the firm on the world around it. These cases also invite students to apply modern information technology to the analysis of managerial decisions. The cases may be taught in many different combinations. The eight-part sequence indicated by the table of contents relates to course designs used at the authors' schools. Each part of the casebook suggests a concept module, with a particular orientation. *Legal Aspects of Documenting Patient Care* McGraw-Hill/Irwin

your knowledge to actual patient situations  
*Pharmacotherapy Principles and Practice Study Guide* uses 98 cases to help you learn how to apply pharmacotherapeutic concepts to specific patient situations. Each case is presented in a consistent manner, similar to what you would see in a clinical setting and focuses on one primary topic or problem. Patients discussed in these cases will have drug therapy problems requiring identification and management. For each case, you will be asked to develop a Patient Database, Drug Therapy Problem Worksheet, and Pharmacotherapy Care Plan using the forms provided. These forms are adapted from those

originally developed by the American Society of Health System Pharmacists Clinical Skills program. Each case includes: Learning Objectives Patient Presentation Targeted Questions followed by a hint that refers you to pages in Pharmacotherapy Principles and Practice, 2e where you can find the information to answer the question Follow-up Global Perspective which highlights an issue related to the case that is important to countries outside of North America or involve different ethnic groups or races Case Summary

 INTRODUCTION The

role of a Preface is to introduce the nature of the publication. The book that emerges from an IFIP Technical Committee World Conference on Computers in Education is complex, and this complexity lies in the nature of the event from which it emerges. Unlike a number of other major international conferences, those organised within the IFIP education community are active events. A WCCE is unique among major international conferences for the structure that deliberately ensures that all attendees are active participants in the development of the debate. In addition to the major paper presentations and discussion, from

international authors, there are panel sessions and professional working groups who debate particular themes throughout the event. There is no doubt that this was not a dry academic conference - teachers, lecturers and experts, policy makers and researchers, learners and manufacturers mingled and worked together to explore, reflect, discuss and plan for the future. The added value of this event was that we know that it will have an impact on future practice; networks will be formed, both virtual and real -ideas will change and new ones will emerge. Capturing the essence of this event is a challenge - this post-conference book has three parts.

The first is the substantial number of theme papers. Managerial Economics Springer  
One of the educationist's major concerns today is to find effective ways of translating new goals for the curriculum into classroom practices. American and British contributions analyse curriculum change as it actually occurs, with people, institutions and constraints of time and money acknowledged and accepted as a necessary and rightful part of the whole process. Detailed accounts are given of curriculum change in a wide variety of settings: American and English school systems, a college of education, an art curriculum project, Scottish classrooms.

Analytic perspectives are employed that help to clarify the underlying forces at work. The contributors probe the adequacy of current theorizing about curriculum development, and suggest new ways of thinking about the problems involved in bringing about change.

Through the use of thought-provoking case studies, summaries, and review questions, this introductory level text shows students how to engage in the academic, objective study of religion and helps instructors address some of the typical problems they encounter when introducing students to

the study of religion. Kessler guides students through an unbiased and varied study of religious beliefs and practices such as sacred power, myths and rituals, religious art, the problem of evil, and the relationship between religion and morality. The text also addresses issues of gender and religious institutionalization.
