The history of art is inseparable from the history of color. And what a fascinating story they tell together: one that brims with an all-star cast of characters, eye-opening details, and unexpected detours through the annals of human civilization and scientific discovery. Enter critically acclaimed writer and popular journalist Victoria Finlay, who here takes readers across the globe and over the centuries on an unforgettable tour through the brilliant history of color in art. Written for newcomers to the subject and aspiring young artists alike, Finlay's quest to uncover the origins and science of color will beguile readers of all ages with its warm and conversational style. Her rich narrative is illustrated in full color

throughout with 166 major works of art—most from the collections of the J. Paul Getty Museum. Readers of this book will revel in a treasure trove of fun-filled facts and anecdotes. Were it not for Cleopatra, for instance, purple might not have become the royal color of the Western world. Without Napoleon, the black graphite pencil might never have found its way into the hands of Cézanne. Without mango-eating cows, the sunsets of Turner might have lost their shimmering glow. And were it not for the pigment cobalt blue, the halls of museums worldwide might still be filled with forged Vermeers. Red ocher, green earth, Indian yellow, lead white—no pigment from the artist's broad and diverse palette escapes

Finlay's shrewd eye in this breathtaking exploration.

The Angkorian World explores the history of Southeast Asia's largest ancient state from the first to mid-second millennium CE. Chapters by leading scholars combine evidence from archaeology, texts, and the natural sciences to introduce the Angkorian state, describe its structure, and explain its persistence over more than six centuries. Comprehensive and accessible, this book will be an indispensable resource for anyone studying premodern Asia. The volume's first of six sections provides historical and environmental contexts and discusses data sources and the nature of knowledge production. The next three sections examine the anthropogenic landscapes of Angkor (agrarian, urban, and hydraulic), the state institutions that shaped the Angkorian state, and the economic foundations on which Angkor operated. Part V explores Angkorian ideologies and realities, from religion and nation to identity. The volume's last part reviews political and aesthetic Angkorian legacies

in an effort to explain why the idea of Angkor remains central to its Cambodian descendants. Maps, graphics, and photographs guide readers through the content of each chapter. Chapters in this volume synthesise more than a century of work at Angkor and in the regions it influenced. The Angkorian World will satisfy students, researchers, academics, and the knowledgeable layperson who seeks to understand how this great Angkorian Empire arose and functioned in the premodern world. Contemporary American youth live in a culture that ignores or denigrates labor unions. Mainstream media cover labor issues only sparingly and unions no longer play much of a role in popular culture texts, films, or images. In our schools labor has been limited to a footnote in textbooks instead of being treated seriously as the most effective force for championing the rights of working people—the vast majority of the citizenry.

The History of Art: A Global View: 1300 to the Present Yale University Press

For nearly half a century, celebrated historian Ron Tyler has researched, interpreted, and exhibited western American art. This splendid volume, gleaned from Tyler's extensive career of

connoisseurship, brings together eight of the author's most notable essays, reworked especially for this volume. Beautifully illustrated with more than 150 images, *Western Art, Western History* tells the stories of key artists, both famous and obscure, whose provocative pictures document the people and places of the nineteenth-century American West. The artists depicted in these pages represent a variety of personalities and artistic styles. According to Tyler, each of them responded in unique ways to the compelling and exotic drama that unfolded in the West during the nineteenth century—an age of exploration, surveying, pleasure travel, and scientific discovery. In eloquent and engaging prose, Tyler unveils a fascinating cast of characters, including the little-known German-Russian artist Louis Choris, who served as a draftsman on the second Russian circumnavigation of the globe; the exacting and precise Swiss artist Karl Bodmer, who accompanied Prince Maximilian of Wied on his sojourn up the Missouri River; and the young American Alfred Jacob Miller, whose seemingly frivolous and romantic depictions of

western mountain men and American Indians remained largely unknown until the mid-twentieth century. Other artists showcased in this volume are John James Audubon, George Caleb Bingham, Alfred E. Mathews, and, finally, Frederic Remington, who famously sought to capture the last glimmers of the “old frontier.” A common thread throughout *Western Art, Western History* is the important role that technology—especially the development of lithography—played in the dissemination of images. As the author emphasizes, many works by western artists are valuable not only as illustrations but as scientific documents, imbued with cultural meaning. By placing works of western art within these broader contexts, Tyler enhances our understanding of their history and significance.

A Voyage of Discovery and Research in the Southern and Antarctic Regions, During the Years 1839 - 43 Pearson Higher Ed

This book challenges existing notions of what is "American" and/or "Asian" art, moving beyond the identity issues that have dominated art-world conversations of the 1980s and the 1990s and aligning with new trends and issues in contemporary art today, e.g. the Global South, labor, environment, and gender identity. Contributors examine both historical and contemporary instances in art practices and exhibition-making under the rubric of

"American art in Asia." The book complicates existing notions of what constitutes American art, Asian American (and American Asian) art. As today's production and display of contemporary art takes place across diffused borders, under the fluid conditions of a globalized art world since transformed by the COVID-19 pandemic, new contexts and art historical narratives are forming that upend traditional Euro-American mappings of center-margins, migratory patterns and community engagement. The book will be of interest to scholars working in art history, American studies, Asian studies and visual culture.
