This fascinating new study shows how the CIA and the British secret service, in collaboration with the military alliance NATO and European military secret services, set up a network of clandestine anti-communist armies in Western Europe after World War II. These secret soldiers were trained on remote islands in the Mediterranean and in unorthodox warfare centres in England and in the United States by the Green Berets and SAS Special Forces. The network was armed with explosives, machine guns and high-tech communication equipment hidden in underground bunkers and secret arms caches in forests and mountain meadows. In some countries the secret army linked up with right-wing terrorist who in a secret war engaged in political manipulation, harrassement of left wing parties, massacres, coup d'états and torture. Codenamed 'Gladio' ('the sword'), the Italian

secret army was exposed in 1990 by Italian Prime Minister Giulio Andreotti to the Italian Senate, whereupon the press spoke of "The best kept, and most damaging, political-military secret since World War II" (Observer, 18. November 1990) and observed that "The story seems straight from the pages of a political thriller." (The Times, November 19, 1990). Ever since, so-called 'stay-behind' armies of NATO have also been discovered in France, Spain, Portugal, Germany, Belgium, the Netherlands, Luxemburg, Denmark, Norway, Sweden, Finland, Switzerland, Austria, Greece and Turkey. They were internationally coordinated by the Pentagon and NATO and had their last known meeting in the NATO-linked Allied Clandestine Committee (ACC) in Brussels in October 1990.

The Book of Oberon Simon and Schuster

mile Durkheim is often referred to as the father of sociology.

Along with Karl Marx and Max Weber he was a principal architect of modern social science and whose contribution helped established it as an academic discipline. "The Division of Labor in Society," published in 1893, was his first major contribution to the field and arguably one his most important. In this work Durkheim discusses the construction of social order in modern societies, which he argues arises out of two essential forms of solidarity, mechanical and organic. Durkheim further examines how this social order has changed over time from more primitive societies to advanced industrial ones. Unlike Marx, Durkheim does not argue that class conflict is inherent to the modern Capitalistic society. The division of labor is an essential component to the practice of the modern capitalistic system due to the increased economic efficiency that can arise out of specialization; however Durkheim acknowledges that increased specialization does not serve all interests equally well. This important and foundational work is a must read for all students of sociology and economic philosophy.

Since its original publication, Erwin Panofsky's *Meaning in the Visual Arts* has been standard reading for students of art history. It is both an introduction to the study of art and, for those with more specialized interests, a profound discussion of art and life in

the Middle Ages and Renaissance. Panofsky's historical technique reveals an abundance of detail, detail he skillfully relates to the life and work of individual painters and their times. The papers in this volume represent a cross-section of Panofsky's major work. Included are selections from his well-known *Studies in Iconology* and *The Life and Art of Albrecht Durer*, plus an introduction and an epilogue--*The History of Art as a Humanistic Discipline* and *Three Decades of Art History in the United States: Impressions of a Transplanted European*--as well as pieces written especially for this collection. All display Panofsky's vast erudition and deep commitment to a humanistic conception of art and art history.
