ROTH MCKEE

Latina/o Midwest Reader Peter Lang

The Young Lords was a multi-ethnic, though primarily Nuyorican, liberation organization that formed in El Barrio (Spanish Harlem) in July of 1969. Responding to oppressive approaches to the health, educational, and political needs of the Puerto Rican community, the movement's revolutionary activism included organized protests and sit-ins targeting such concerns as trash pickups and lead paint hazards. The Young Lords advanced a thirteen-point political program that demanded community control of their institutions and land and challenged the exercise of power by the state and outsider-run institutions. In *The New York Young Lords and the Struggle for Liberation*, Darrel Wanzer-Serrano details the numerous community initiatives that advanced decolonial sensibilities in El Barrio and beyond. Using archival research and interviews, he crafts an engaging account of the Young Lords' discourse and activism. He rescues the organization from historical obscurity and makes an argument for its continued relevance, enriching and informing contemporary discussions about Latino/a politics.

The Young Lords Academic Press

This book provides an extensive, up-to-date overview of the ways in which information and communication technologies (ICTs) can be used to develop tourism and hospitality. The coverage encompasses a wide variety of topics within the field, including virtual reality, sharing economy and peer-to-peer accommodation, social media use, hotel technology, big data, robotics, and recommendation systems, to name but a few. The content is based on the 2019 ENTER eTourism conference, organized in Nicosia, Cyprus by the International Federation for Information Technologies and Travel & Tourism (IFITT) - the leading independent global community for the discussion, exchange, and development of knowledge on the use and impact of new ICTs in the travel and tourism industry. The book offers a global perspective and rich source of information on important innovations and novel ideas. Though it will prove especially valuable for academics working in the eTourism field, it will also be of considerable interest to practitioners and students.

Since Annexation and in 1882 Springer Nature

The Proceedings of the 12th International Symposium on Bioluminescence (BL) and Chemiluminescence (CL) contains up-to-date information on the latest developments in BL and CL presented by scientists from around the world. Light-emitting reactions are now a vital component of many key technologies in research and in routine analytical laboratories OCo replacing radionuclides in many situations. This volume presents a compilation of the latest developments from key experts and leading-edge researchers in this area."

Hearings, Ninety-second Congress, Second Session, on H. R. 13915 ... University of Illinois Press

Während der vergangenen Jahrzehnte hat Fritz Fahrni erfolgreich als Unternehmer wie auch als Professor an der ETH Zürich und

der Universität St. Gallen gewirkt. Der Fokus seiner Arbeit lag im Bereich Business Excellence. Bereits als Unternehmer hat er das EFQM-Modell aktiv mitgestaltet und es als Wissenschaftler vor allem in Bezug auf technologieorientierte Unternehmen präzisiert. In dieser Festschrift aus Anlass der Emeritierung von Fritz Fahrni greifen Kollegen und Wegbegleiter aktuelle Fragestellungen rund um das Thema Business Excellence auf. *Theory, Research, and Treatment* Teachers College Press This book covers the proceedings of "The Future of Life and the Future of our Civilization" symposium, held in Frankfurt, Germany in May 2005.

Sadra New Town Lighting Masterplan. Between Landscape and Product Design Cambridge Scholars Publishing

This book constitutes the refereed proceedings of the 11th International Conference on Blended Learning, ICBL 2018, held in Osaka, Japan, in July/ August 2018. The 35 papers presented were carefully reviewed and selected from 94 submissions. The papers are organized in topical sections named: Experiences in Blended Learning, Content Development for Blended Learning, Assessment for Blended Learning, Computer-Support Collaborative Learning, Improved Flexibility of Learning Processes, Open Educational Resources, and Pedagogical and Psychological Issues.

Progress & Current Applications Routledge

The Young Lords, who originated as a Chicago street gang fighting gentrification and unfair evictions in Puerto Rican neighborhoods, burgeoned into a national political movement in the late 1960s and early 1970s, with headquarters in New York City and other centers in Philadelphia, Boston, Los Angeles, and elsewhere in the northeast and southern California. Part of the original Rainbow Coalition with the Black Panthers and Young Patriots, the politically radical Puerto Ricans who constituted the Young Lords instituted programs for political, social, and cultural change within the communities in which they operated. The Young Lords offers readers the opportunity to learn about this vibrant organization through their own words and images, collecting an array of their essays, journalism, photographs, speeches, and pamphlets. Organized topically and thematically, this volume highlights the Young Lords' diverse and inventive activism around issues such as education, health care, gentrification, police injustice and gender equality, as well as self-determination for Puerto Rico. In recovering these rare written and visual materials, Darrel Enck-Wanzer has given voice to the lost chorus of the Young Lords, while providing an indispensable resource for students, scholars, activists, and others interested in learning about this influential grassroots "street political" organization.

Theorizing Performance Springer

Theory is an essential element in the development of any academic discipline and sport management is no exception. This is the first book to trace the intellectual contours of theory in sport management, and to explain, critique and celebrate the importance of sport management theory in academic research, teaching and learning, and in the development of professional

practice. Written by a world-class team of international sport management scholars, each of whom has taken a leading role in developing a particular theory or framework for understanding sport management, the book covers the full span of contemporary issues, debates, themes and functional approaches, from corporate social responsibility and diversity to strategy, marketing and finance. Every chapter explores a key theoretical approach, including an overview of that theory, a discussion of the process of theory development and of how the theory has been employed in research, practice or teaching, and outlines directions for future research in that area. Each chapter includes cases and examples, as well as short illustrative commentaries from people who have used that particular theory in their work, and attempts to highlight the theory-practice links, or gaps, in that area. For a fully-rounded understanding of what sport management is and how it should be studied, taught and practiced, a thorough grounding in theory is essential. The Routledge Handbook of Theory in Sport Management is therefore important reading for all advanced students, researchers, instructors, managers and practitioners working in this exciting field.

Emerging Infectious Diseases World Bank Publications
Photovoltaic Solar Energy Conversion - Technologies, Applications and Environmental Impacts features comprehensive and up-to-date knowledge on the photovoltaic solar energy conversion technology and describes its different aspects in the context of most recent scientific and technological advances. It also provides an insight into future developments in this field by covering four distinct topics include "PV Cells and Modules", "Applications of PV Systems", "Life Cycle and Environmental Impacts" and "PV Market and Policies". An up-to-date reference book on the advances of photovoltaic solar energy conversion technology Describes different aspects of PV and PVT technologies in a comprehensive way Provides information on design, development, and monitoring of PV systems Covers applications of PV and PVT systems in the urban, industry, and agriculture sectors Features new concepts, environmental impacts, market and policies of the PV technology

Cesty skrytosti Routledge
Progress in literacy and learning, especially through universal primary education, has done more to advance human conditions than perhaps any other policy. Our generation has the possibility of becoming the first generation ever to offer all children access to good quality basic education. But it will only happen if we have the political commitment -- at the country as well as at the international level -- to give priority to achieve this first in human history. And it will only happen if also those who cannot afford to pay school fees can benefit from a complete cycle of good quality primary education. Investment in good quality fee-free primary education should be a cornerstone in any government's poverty reduction strategy.

Bioluminescence & Chemiluminescence Springer-Verlag
This is the first book within the field of communication studies to map the terrain of Latina/o performance. Using rhetorical criticism and performance ethnography, the book examines performance from a variety of perspectives: from identity and community in everyday life, to how it intersects with popular culture. Discussions - from Ricky Martin to Chicana feminist pilgrimages to issues of diaspora - contribute to the book's argument that the relationship between rhetorical scholarship and emerging performance work has largely been ignored. Latina/o Communication Studies aims to challenge this split by creating a more complex and less Eurocentric understanding of rhetoric. This rich and informative book contributes to a more nuanced understanding of race and ethnicity and attests to the

importance of Latina/o studies in the field of communication.

Reconstructive Neurosurgery Springer

For the first time, in this book, a new view of metal-organic frameworks (MOFs) has been presented: MOFs with heterogeneous structures. In this field, there are different levels of understanding we need to consider. So, the principal aspects of heterogeneity that produce complexity in MOFs, their effects in the structure chemistry, performance and applications have been thoroughly reported. According to that there is no book that covers whole of the aspects of complexity in MOFs with heterogeneous structures, our findings can be as essential concepts with introducing complexity to design the new platforms of materials with advanced and better properties in the future. *Blended Learning. Enhancing Learning Success* Bentham Science Publishers

Social networking is a concept that has existed for a long time; however, with the explosion of the Internet, social networking has become a tool for people to connect and communicate in ways that were impossible in the past. The recent development of Web 2.0 has provided many new applications, such as Myspace, Facebook, and LinkedIn. The purpose of Handbook of Social Network Technologies and Applications is to provide comprehensive guidelines on the current and future trends in social network technologies and applications in the field of Web-based Social Networks. This handbook includes contributions from world experts in the field of social networks from both academia and private industry. A number of crucial topics are covered including Web and software technologies and communication technologies for social networks. Web-mining techniques, visualization techniques, intelligent social networks, Semantic Web, and many other topics are covered. Standards for social networks, case studies, and a variety of applications are covered as well.

History of Indigenous Education in the Panjab Routledge

A search for traces of the voice before the phonograph, reconstructing a series of ancient soundscapes from Aristotle to Augustine. Long before the invention of musical notation, and long before that of the phonograph, the written word was unrivaled as a medium of the human voice. In *The Ancient Phonograph*, Shane Butler searches for traces of voices before Edison, reconstructing a series of ancient soundscapes from Aristotle to Augustine. Here the real voices of tragic actors, ambitious orators, and singing emperors blend with the imagined voices of lovesick nymphs, tormented heroes, and angry gods. The resonant world we encounter in ancient sources is at first unfamiliar, populated by texts that speak and sing, often with no clear difference between the two. But Butler discovers a commonality that invites a deeper understanding of why voices mattered then and why they have mattered since. With later examples that range from Mozart to Jimi Hendrix, Butler offers an ambitious attempt to rethink the voice—as an anatomical presence, a conceptual category, and a source of pleasure and wonder. He carefully and critically assesses the strengths and limits of recent theoretical approaches to the voice by Adriana Cavarero and Mladen Dolar and makes a rich and provocative range of ancient material available for the first time. *The Ancient Phonograph* will appeal not only to classicists and to voice theorists but to anyone with an interest in the verbal arts—literature, oratory, song—and the nature of aesthetic experience.

A Comparative Bantu Perspective NYU Press

Sport Governance provides a comprehensive guide to the practical application of governance principles to amateur and professional sport organisations operating at the community, state/provincial, national, and international levels. It presents a

balanced view between accepted practice and what contemporary research evidence tells us about a range of governance principles and practices. Organised in three parts, the text provides the reader with * an explanation of the concept of governance, key terms and definitions as well as the economic, political and social factors that impact on how the governance function is enacted within sport organisations; * an understanding of the “mechanics” of governance – the elements of structure, process and performance that ensure the governance function is carried out within sport organisations; and * a discussion of a number of contextual issues in sport governance, including dual leadership, ethics, governance change and future governance challenges. Sport Governance is essential reading for practitioners working and volunteering in the sport industry and upper level undergraduate and postgraduate students enrolled in sport and leisure management programs.

Equal Educational Opportunities Act Springer Science & Business Media

Aspects of Iranian Linguistics introduces readers to recent research into various properties of a number of Iranian languages. The volume consists of twenty chapters that cover a full range of Iranian linguistics, including formal theoretical perspectives (from a syntactic and morphological point of view), typological and functional perspectives, and diachronic and areal perspectives. It also contains papers on computational linguistics and neurolinguistics, as well as the modern history of lexicography in Iran. Various Iranian languages are discussed in this volume, including Hawrami and Kermanji, two of the major dialects of Kurdish, Medieval, Classical and Modern Persian, Balochi, Taleshi and Pamir. With the exception of Persian, other Iranian languages had not received much attention in the past. Thus this work, as the first volume ever published on various aspects of these languages and their linguistic properties, is a valuable contribution to our understanding of a less commonly studied language family. The theoretical, descriptive, and applied approaches pursued by various authors in this volume, together with the colorful range of languages discussed, provide a unique perspective that is appealing to researchers in different domains of linguistics and language studies.

Web 2.0 & Semantic Web Springer Science & Business Media
The leading reference on personality disorders and their treatment, this authoritative work is now significantly revised with 80% new content reflecting important advances in the field. Preeminent experts provide in-depth coverage of conceptual and taxonomic issues, psychopathology, epidemiology and longitudinal course, etiology and development, and specific diagnoses. Diagnostic issues are explored and available assessment instruments discussed. All available evidence-based treatments are reviewed in consistently organized chapters that cover theoretical and empirical foundations as well as clinical strategies, facilitating comparison of the various approaches. New to This Edition *Incorporates more than 15 years of major research advances; includes 21 chapters on new topics. *Critically examines DSM-5 diagnostic criteria. *Chapters on additional treatments--mentalization-based treatment, schema-focused therapy, transference-based psychotherapy, and systems training for emotional predictability and problem solving. *Chapters on dimensional models, longitudinal studies, and personality pathology in children and adolescents. *Chapters on specific diagnoses: antisocial/psychopathic, borderline, and obsessive-compulsive personality disorder. *Integrative section introductions by the editors. See also *Integrated Treatment for Personality Disorder*, edited by W. John Livesley, Giancarlo Dimaggio, and John F. Clarkin, which weaves multiple well-established intervention strategies into a systematic modular

approach.

Latina/o Discourse in Vernacular Spaces Wiley

The first guide devoted to the functions, structures, and applications of natural hydrocolloids In today’s health-conscious climate, the demand for natural food products is growing all the time. Natural hydrocolloids, therefore, have never been more popular. With their thickening, stabilizing, gelling, fat replacing, and binding qualities, these naturally occurring, plant-based polymers can fulfil many of the same functions as commercial ingredients like xanthan, guar, gum Arabic, pectin, and starch. Moreover, certain health benefits have been linked with their often biological active compounds and high-fiber compositions, including potential prebiotic effects and the reduction of blood cholesterol levels. Application of these novel hydrocolloids is, however, still underexplored. *Emerging Natural Hydrocolloids* aims to remedy this by providing a thorough overview of their structure-function relationships, rheological aspects, and potential utility in mainly the food and pharmaceutical industries. This accessible, quick-reference guide features: A comprehensive and up-to-date survey of the most significant research currently available on natural hydrocolloids Examinations of the major functions and rheological aspects of novel hydrocolloids Information on the potential applications of biopolymers within both foods and pharmaceutical systems Collaborations from an international team of food scientists *Emerging Natural Hydrocolloids: Rheology and Functions* offers scientists, engineers, technologists, and researchers alike a unique and in-depth account of the uncharted world of novel hydrocolloids, their uses, properties, and potential benefits.

The Syntax of Object Marking in Samba John Wiley & Sons

This is the second volume of the Patent eBook Series titled *Topics in Anti-Cancer Research*. The eBook includes updated chapters on topics relevant to contemporary cancer research published in the journal, *Recent Patents on Anti-Cancer Drug Discovery*. This volume covers scientific and patented novel chemotherapeutic agents and drugs for metastatic castration-resistant prostate cancer and Ras/ Raf /MEK/ERK pathway, P1K, AKT and mTORC1/2 inhibitors, ATPase inhibitors for cancer therapy, and sphingomyelin biosynthesis which regulates cancer cell death and growth. Other chapters also explain research on biochemical regulation i.e. cell cycle and energy metabolism, the role of genetic variations of FcγRs gamma receptors in monoclonal antibody based anti-cancer therapy and effectiveness of antiangiogenic therapy, endogenous angiogenesis inhibitors and anti-angiogenic drugs for the treatment of renal cell carcinoma, prevention of cancer by ribonucleotide reductase, anticancer activity of Erlotinib in glioblastoma and the mechanisms of action of nanodrugs and nano-sized camptothecin drugs in cancer chemotherapy. The volume also covers recent studies in the field of onconutrition. The broad range of topics covered in this second volume will be of immense interest to clinicians, scientists and R&D experts seeking new targets for the prevention of cancer, novel oncogenic biomarkers, and methods for cancer therapy.

CERN Courier Key Structural Factors of Group 5 Metal Oxide Clusters for Base Catalytic Application

Voz, or voice, thematically structures the twelve original essays of *Latina/o Discourse in Vernacular Spaces*. This collection extends the study of Latina/o communication, in particular vernacular expressions covering a wide array of inquiries. The essays address such diverse topics as foundational developments, the intersection of culture, theory and disciplinarity, challenges to prevailing ideas about belonging and citizenship, identity tensions in latinidad, marginality, and nationalism, and voices that demonstrate possibilities for solidarity, redefinition and reclamations.
