Alfred Thayer Mahan's *The Influence of Seapower upon History* is well known to students of naval history and strategy, but his other writings are often dismissed as irrelevant to today's problems. This collection of five of Mahan's essays, along with Benjamin Armstrong's informative introductions, illustrates why Mahan's work remains relevant to the 21st century and how it can help develop our strategic thinking. People misunderstand Mahan, the editor argues, because they have read only what others say about him, not what Mahan wrote himself.

Armstrong's analysis is derived directly from Mahan's own writings. From the challenges of bureaucratic organization and the pit falls of staff duty, to the development of global strategy and fleet composition, to illustrations of effective combat leadership, Armstrong demonstrates that Mahan's ideas continue to provide today's readers with a solid foundation to address the challenges of a rapidly globalizing world.

Economic Networks and Cultural Ties, from Prehistory to the Early Modern Era McGraw-Hill/Dushkin

In this latest addition to the *War & Conflict Through the Ages* series, Brian Sandberg offers a truly global examination of the intersections between war, culture, and society in the early modern period. He traces the innovative military technologies and practices that emerged around 1500, exploring the different forms of warfare including dynastic war, religious warfare, raiding warfare, and peasant revolt that shaped conflicts during the sixteenth and seventeenth centuries. He explains how significant social, economic, and political developments transformed warfare on land and at sea at a time of global imperialism and growing mercantilism, forcing states and military systems to respond to rapidly changing situations. Engaging and insightful, *War and Conflict in the Early Modern World* will appeal to scholars and students of world history, the early modern period, and those interested in the broader relationship between war and society.

This presents a major re-evaluation of the standard view of revolutionary armies, the range of attitudes towards the role of heroic individuals, the formation and leadership of armies, and the differences and similarities between such armies. Beginning with an exploration of the New Model Army of the 1640s, a force whose name itself seems to denote its revolutionary credentials, the author presents ten case studies from around the globe, including the American War of Independence, The French Revolution, The Zulu-Boer War, the Waffen SS and the Viet-Cong. Through a detailed analysis of source material, he examines the images connected with these armies, both historical and recent, and assesses these images in their socio-political and nationalist contexts.

Answering the calls made to overcome methodological nationalism, this volume is the first examination of the links between corruption and imperial rule in the modern world. It does so through a set of original studies that examine the multi-layered nature of corruption in four different empires (Great Britain, Spain, the Netherlands and France) and their possessions in Asia, the Caribbean, Latin America and Africa. It offers a key read for scholars interested in the fields of corruption, colonialism/empire and global history. The chapters 'Introduction: Corruption, Empire and Colonialism in the Modern Era: Towards a Global Perspective', "'Corrupt and rapacious': Colonial Spanish-American past through the eyes of early nineteenth century contemporaries. A contribution from the history of emotions', and 'Colonial Normativity? Corruption in the Dutch-Indonesian Relationship in the Nineteenth and Early-Twentieth Centuries' are Open Access under a CC BY 4.0 license at link.springer.com.

The industrial revolution was the single most important development in human history over the past three centuries, and it continues to shape the contemporary world. With new methods and organizations for producing goods, industrialization altered where people live, how they play, and even how they define political issues. By exploring the ways the industrial revolution reshaped world history, this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact. In the fourth edition, noted historian Peter N. Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West, including the study of India, the Middle East, and China. In addition, an expanded conclusion contains an examination of the changing contexts of industrialization. The Industrial Revolution in World History is essential for students of world history and economics, as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times.

A Global History of Pre-Modern Warfare Princeton University Press
Scholars have long argued over whether the 1648 Peace of Westphalia, which ended more than a century of religious conflict arising from the Protestant Reformations, inaugurated the modern sovereign-state system. But they largely ignore a more fundamental question: why did the emergence of new forms of religious heterodoxy during the Reformations spark such violent upheaval and nearly topple the old political order? In this book, Daniel Nexon demonstrates that the answer lies in understanding how the mobilization of transnational religious movements intersects with—and can destabilize—imperial forms of rule. Taking a fresh look at the pivotal events of the sixteenth and seventeenth centuries—including the Schmalkaldic War, the Dutch Revolt, and the Thirty Years' War—Nexon argues that early modern "composite" political communities had more in common with empires than with modern states, and introduces a theory of imperial dynamics that explains how religious movements altered Europe's balance of power. He shows how the Reformations gave rise to crosscutting religious networks that undermined the ability of early modern European rulers to divide and contain local resistance to their authority. In doing so, the Reformations produced a series of crises in the European order and crippled the Habsburg bid for hegemony. Nexon's account of these processes provides a theoretical and analytic framework that not only challenges the way international relations scholars think about state formation and international change, but enables us to better understand global politics today.

Making Sense of World History John Wiley & Sons

"The sixteenth century in Europe was a period of vigorous economic expansion that led to social, political, religious, and cultural transformations and established the early modern age. This resource explores the emergence of monarchical nation-states and early Western capitalism during this period. Also examined in depth are the Protestant Reformation and the Counter-Reformation, which exacerbated tensions between states and contributed to the Thirty Years' War (1618-1648). Readers will come to understand how these events developed, how they led to the age of exploration, and how they inform

modern European history."

The world is in a second nuclear age in which regional powers play an increasingly prominent role. These states have small nuclear arsenals, often face multiple active conflicts, and sometimes have weak institutions. How do these nuclear states—and potential future ones—manage their nuclear forces and influence international conflict? Examining the reasoning and deterrence consequences of regional power nuclear strategies, this book demonstrates that these strategies matter greatly to international stability and it provides new insights into conflict dynamics across important areas of the world such as the Middle East, East Asia, and South Asia. Vipin Narang identifies the diversity of regional power nuclear strategies and describes in detail the posture each regional power has adopted over time. Developing a theory for the sources of regional power nuclear strategies, he offers the first systematic explanation of why states choose the postures they do and under what conditions they might shift strategies. Narang then analyzes the effects of these choices on a state's ability to deter conflict. Using both quantitative and qualitative analysis, he shows that, contrary to a bedrock article of faith in the canon of nuclear deterrence, the acquisition of nuclear weapons does not produce a uniform deterrent effect against opponents. Rather, some postures deter conflict more successfully than others. *Nuclear Strategy in the Modern Era* considers the range of nuclear choices made by regional powers and the critical challenges they pose to modern international security.

From Ancient Times to the Modern Era University of Iowa Press

This book examines the military histories of the regions beyond Western Europe in the pre-modern era. Existing works on global military history mainly focus on the western part of Eurasia after 1500 CE. As regards the ancient period, such works concentrate exclusively on Greece and Rome. So, 'global' military history is actually the triumphal story of the West from Classical Greece onwards. This volume focuses not only on the eastern part of Eurasia but also on South America, Africa and Australasia and seeks to explain the history and varied trajectories of warfare in non-Western regions in the pre-modern era. Further, it evaluates whether warfare in non-Western regions should be considered primitive or inferior when compared with Western warfare. The book notes that Western Europe became militarily significant only in the early modern era and argues that the military divergence that occurred during the early modern era is not unique – it had also occurred in the Bronze Age, the Classical era and in the medieval period. This was due to the dynamism and innovativeness of non-Western militaries and the interconnectedness that existed in parts of the Eurasian

landmass. Further, those polities which were able to construct a balanced military force by synthesising diverse elements were not only able to survive but also became capable of projecting power across continents. This book will be of much interest to students of military history, strategic studies and world history.

Lumbering State, Restless Society offers a comprehensive and compelling understanding of modern Egypt. Nathan J. Brown, Shimaa Hatab, and Amr Adly guide readers through crucial developments in Egyptian politics, society, and economics from the middle of the twentieth century through the present. Integrating diverse perspectives and areas of expertise, including the tools of comparative politics, the book provides an accessible and clear introduction to the Egypt of today alongside an innovative and rigorous analysis of the country's history and governance. Brown, Hatab, and Adly highlight ways in which Egypt resembles other societies around the world, drawing from and contributing to broader debates in political science. They trace the emergence of a powerful and intrusive state alongside a society that is increasingly politicized, and they emphasize how

the rulers and regimes who have built and steered the state apparatus have also had to retreat and recalibrate. The authors also examine why authoritarianism, corporatism, and socialism have decayed without resulting in a liberal democratic order, and they show why Egyptian politics should not be understood in terms of a single dominant force but rather an interplay among many actors. At once current, insightful, and engaging, Lumbering State, Restless Society delivers a powerful and distinctive account of modern Egypt in the modern world.
