Teaching English in Africa Bloomsbury Publishing

Teaching English in Africa is a practical guide written for primary and secondary school teachers working all over the continent. This book relates the practice of English language teaching directly to the African context. As well as covering the underlying theory of how children learn languages and how teachers can best facilitate this learning, it also provides practical resources and ideas for activities and techniques that have proved successful in English classrooms in Africa, both at primary and secondary level. It is intended to be a practical guide, so references and citations are kept to a minimum and concepts are presented using examples that are likely to be familiar to most teachers working in Africa. If there is a bias in this book, it is towards the needs of teachers working in low-resource, isolated contexts in Africa, as these teachers are so often neglected by literature on teaching methodology.

To Young Learners Tesol International Association, Incorporated

This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing,

self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

It will be particularly useful to undergraduate teachers to build upon the literacy unit they undertake in the first years of their course to explore factors that constitute an effective child SL classroom and, in practical terms, how to develop such a classroom. The pedagogical strategies for teaching young language learners in the six chapters are firmly guided by research-based findings, enabling not only pre-service teachers but also experienced teachers to make informed choices of how to effectively facilitate the development of the target language, empowering them to assume an active and effective role of classroom practitioners.
