This report assesses domestic political support for internationalist foreign policy by analyzing the motivations of members of Congress on key foreign policy issues. It includes case studies on major foreign policy debates in recent years, including the use of force, foreign aid, trade policy and U.S.-Russia relations. It also develops a new series of archetypes for describing the foreign policy worldviews of members of the 115th Congress to replace the current stale and

unsophisticated labels of internationalist, isolationist, hawk and dove. Report findings emphasize areas of bipartisan cooperation on foreign policy issues given member ideologies.

Nigeria and Nigerians have acquired a notorious reputation for involvement in drug-trafficking, fraud, cyber-crime and other types of serious crime. Successful Nigerian criminal

networks have a global reach, interacting with their Italian, Latin American and Russian counterparts. Yet in 1944, a British colonial official wrote that 'the number of persistent and professional criminals is not great' in Nigeria and that 'crime as a career has so far made little appeal to the young Nigerian'. This book traces the origins of Nigerian organised crime to the last years of colonial rule, when nationalist politicians acquired power at a regional level. In need of funds for campaigning, they offered government contracts to foreign businesses in return for kickbacks, in a pattern that recurs to this day. Political corruption encouraged a wider disrespect for the law that spread throughout Nigerian society. When the country's oil boom came to an end in the early 1980s, young Nigerian college graduates headed abroad, eager to make money by any means. Nigerian crime went global at the very moment new criminal markets were emerging all over the world.

From an article entitled "History's Black Hole" from the January 10, 2016 global edition of the New York Daily News, Arthur Browne opines, "Across every field of endeavor, from the ministry to medicine and from

education to entrepreneurship, book merchants balk at memorializing black experience and accomplishments.” Essentially, this book is a celebration of black accomplishments—over centuries and across continents—and seeks to fill a portion of that “black hole.” Of the roughly 7 billion people who inhabit this planet, some 1.5 billion are classified as white, and blacks account for 1.1 billion. The remaining over 4 billion are somewhere in the middle. Yet, throughout the years, a paucity of written materials have recorded the positive influences and myriad contributions that the great number of black citizens have made toward global peace, progress, prosperity, and pleasure.

[Africa's Business Revolution](#) Penguin UK A Best Business Book of 2017 -- The Financial Times China is now the biggest foreign player in Africa. It's Africa's largest trade partner, the largest infrastructure financier, and the fastest-growing source of foreign direct investment. Chinese entrepreneurs are flooding into the continent, investing in long-term assets such as factories and heavy equipment. Considering Africa's difficult history of colonialism, one might suspect that China's activity there is another instance of a foreign power exploiting resources. But as author Irene Yuan Sun vividly shows in this remarkable book, it is really a story about resilient Chinese entrepreneurs building in Africa what they so recently learned to build in China--a global manufacturing powerhouse. The fact that China sees Africa not for its poverty but for its potential wealth is a striking departure from the attitude of the West, particularly that of the

United States. Despite fifty years of Western aid programs, Africa still has more people living in extreme poverty than any other region in the world. Those who are serious about raising living standards across the continent know that another strategy is needed. Chinese investment gives rise to a tantalizing possibility: that Africa can industrialize in the coming generation. With a manufacturing-led transformation, Africa would be following in the footsteps of the United States in the nineteenth century, Japan in the early twentieth, and the Asian Tigers in the late twentieth. Many may consider this an old-fashioned way to develop, but as Sun argues, it's the only one that's proven to raise living standards across entire societies in a lasting way. And with every new Chinese factory boss setting up machinery and hiring African workers--and managers--that possibility becomes more real for Africa. With fascinating and moving human stories along with incisive business and economic analysis, *The Next Factory of the World* will make you rethink both China's role in the world and Africa's future in the

globalized economy.

"Others have searched, it is your job to 'research', that is why you are a 'Researcher' . . ." These are the words of my Business Ethics and Law MBA Lecturer. He will further say "Research is like building a brick wall but you cannot build it all alone. Your job as a researcher is to put a piece of brick (your work) on the wall (knowledge), while others will continue to place theirs. With this in perspective, I cannot cover everything in this book, though I wish I could. I will not claim that the content of this book is totally something new. However, I will call it an 'innovation' from my several years of studying already existing literatures, lessons from the lives of successful entrepreneurs, lectures during bachelors of business classes, MBA classes, personal studies, interactions with

entrepreneurs and my personal experience. Entrepreneurship is the solution to the economic and political instability in Africa. I have not seen a successful nation where the government succeeded in providing everything for its people. But great economies of the world ride on the back of entrepreneurship. Entrepreneurs control the world and its government. Their ways are always adhered to because they are job creators; but it is very important to mention that above job creation, they are problem solvers as well as solution providers. Some successful entrepreneurs were mentioned or quoted in this book - men and women who made things happen in spite of difficult situations. And if they can do it out of worst case scenarios, what is your excuse? What I planned to achieve with this book is not to make it an authority or personification of knowledge in entrepreneurship. Rather this book was written with the understanding that reading it is not equivalent to offering professional services to you. With the knowledge got from the book you might as well seek

professional services in the areas of your concern. Success is impacting your world with the investment of your personality. That is what I hope to achieve by writing this book, to impact my world with what I believe and have invested myself in, on and with for years. Note: Although there are many mentions of Africa and Nigeria in this book, the knowledge can be applied in any part of the world and it will yield the same result.

In recent years, China and India have become the most important economic partners of Africa and their footprints are growing by leaps and bounds, transforming Africa's international relations in a dramatic way. Although the overall impact of China and India's engagement in Africa has been positive in the short-term, partly as a result of higher returns from commodity exports fuelled by excessive demands from both countries, little research exists on the actual impact of China and India's growing involvement on Africa's economic transformation. This book examines in detail the opportunities and challenges posed by the increasing presence of China and India in Africa, and proposes critical interventions that African governments must undertake in order to negotiate with China and India from a stronger and more informed platform.
