An international movement that followed specific geographical-cultural patterns, Conceptual Art built on the legacy of Marcel Duchamp, redefining the institutional and social relationships among production, work and audience in ways which have comprehensively transformed the nature of the art object and forms of artistic practice, both historically and in the present. Investigating and documenting the histories, theories and forms of Conceptual Art, this timely book, including both established writers and a new generation of art historians, shows that Conceptual Art was a broad movement encompassing a range of artistic tendencies. This is the most stimulating account of the movement to date, arguing forcefully for its vitality and potential as well as examining its influence on art today. With essays by Alex Alberro, Stephen Bann, Jon Bird, David Company, Helen Molesworth, Michael Newman, Peter Osborne, Birgit Pelzer, Desa Philipagesi, Anne Rorimer, Peter Wollen and William Wood.

The prevalence of deficiency states in respect to vitamin A, thiamine, riboflavine, and niacin is discussed in light of clinical evidence. Information on the intake, absorption and utilization of the vitamins and depletion-repletion study results provide a basis to recommend vitamin needs. Specific characteristics, utilization and needs for each vitamin are presented. Practical implications are discussed with reference to 1) assessment of the adequacy of total food supplies and results of consumption surveys; 2) methods of improving diets to attain recommended intake levels; 3) public health aspects of meeting needs of vulnerable groups. The FAO report recommends 1) further research to fill gaps in present knowledge of vitamins; 2) acceptance of recommended intake levels as objectives for nutritional improvement; 3) attention to young children's vulnerability to deficiencies, especially vitamin A; 4) direct attention to adequate nutrient intake for all age group; 5) depreciation of programs that overemphasize provision of individual nutrients rather than balanced intake.
