After years out of print, this new and redesigned book brings back the best and most complete history of the Women's Army Corps. Loaded with history, tables, charts, statistics, photos, personalities, and many useful appendices (including a history of WAC uniforms), *The Women's Army Corps, 1945-1978* is must reading for anyone who served those years in the Army as well as for those who want a complete history of the modern-day military. Author Bettie Morden served from 1942-1972 and she used her experience and access to people and records to compile the definitive reference work. Col. Morden is a graduate of the WAC Officers' Advanced Course (1962); Command and General Staff College (1964); and the Army Management School (1965). She has been awarded the Distinguished Service Medal, the Legion of Merit, the Joint Service Commendation Medal, and the Army Commendation Medal with Oak Leaf Cluster.

Language Assessment: Principles and Classroom Practices is designed to offer a comprehensive survey of essential principles and tools for second language assessment. Its first and second editions have been successfully used in teacher-training courses, teacher certification curricula, and TESOL master of arts programs. As the third in a trilogy of teacher education textbooks, it is designed to follow H. Douglas Brown's other two books, *Principles of Language Learning and Teaching* (sixth edition, Pearson Education, 2014) and *Teaching by Principles* (fourth edition, Pearson Education, 2015). References to those two books are made throughout the current book. *Language Assessment* features uncomplicated prose and a systematic, spiraling organization. Concepts are introduced with practical examples, understandable explanations, and succinct references to supportive research. The research literature on language assessment can be quite complex and assume that readers have technical knowledge and experience in testing. By the end of *Language Assessment*, however, readers will have gained access to this not-so-frightening field. They will have a working knowledge of a number of useful, fundamental principles of assessment and will have applied those principles to practical classroom contexts. They will also have acquired a storehouse of useful tools for evaluating and designing practical, effective assessment techniques for their classrooms.

Many researchers jump straight from data collection to data analysis without realizing how analyses and hypothesis tests can go profoundly wrong without clean data. This book provides a clear, step-by-step process of examining and cleaning data in order to decrease error rates and increase both the power and replicability of results. Jason W. Osborne, author of *Best Practices in Quantitative Methods* (SAGE, 2008) provides easily-implemented suggestions that are research-based and will motivate change in practice by empirically demonstrating, for each topic, the benefits of following best practices and the potential consequences of not following these guidelines. If your goal is to do the best research you can do, draw conclusions that are most likely to be accurate representations of the population(s) you wish to speak about, and report results that are most likely to be replicated by other researchers, then this basic guidebook will be indispensable.

Along the undisturbed shores, especially of the Mediterranean Sea and the European North Atlantic Ocean, is a quite widespread plant called *Beta maritima* by botanists, or more commonly sea beet. Nothing, for the inexperienced observer's eye, distinguishes it from surrounding wild vegetation. Despite its inconspicuous and nearly invisible flowers, the plant has had and will have invaluable economic and scientific importance. Indeed, according to Linnè, it is considered "the progenitor of the beet crops possibly born from *Beta maritima* in some foreign country". Recent molecular research confirmed this lineage. Selection applied after domestication has created many cultivated types with different destinations. The wild plant always has been harvested and used both for food and as a medicinal herb. Sea beet crosses easily with the cultivated types. This facilitates the transmission of genetic traits lost during domestication, which selection processes aimed only at features immediately useful to farmers and consumers may have depleted. Indeed, as with several crop wild relatives, *Beta maritima* has been successfully used to improve cultivated beet's genetic resistances against many diseases and pests. In fact, sugar beet cultivation currently would be impossible in many countries without the recovery of traits preserved in the wild germplasm. Dr. Enrico Biancardi graduated from Bologna University. From 1977 until 2009, he was involved in sugar beet breeding activity by the Istituto Sperimentale per le Colture Industriali (ISCI) formerly Stazione Sperimentale di Bieticoltura (Rovigo, Italy), where he released rhizomania and cercospora resistant germplasm and collected seeds of Mediterranean sea beet populations as a genetic resource for breeding and ex situ conservation. Retired since 2009, he still collaborates with several working breeders, in particular, at the USDA Agricultural Research Stations, at the Chinese Academy of Agricultural Science (CAAS), and at the Athens University (AUA). He has edited books, books chapters and authored more than 150 papers. Dr. Lee Panella is a plant breeder and geneticist with the USDA-ARS at Fort Collins, Colorado. He earned his B.S. in Crop and Soil Science from Michigan

State University, an M.S. in Plant Breeding from Texas A&M University, and a Ph.D. in genetics from the University of California at Davis. His research focus is developing disease resistant germplasm using sugar beet wild relatives. He is chairman of the USDA-ARS Sugar Beet Crop Germplasm Committee and has collected and worked extensively with sea beet. Dr. Robert T. Lewellen was raised on a ranch in Eastern Oregon and obtained a B.S. in Crop Science from Oregon State University followed by a Ph.D. from Montana State University in Genetics. From 1966 to 2008 he was a research geneticist for the USDA-ARS at Salinas, California, where he studied the genetics of sugar beet and as a plant breeder, often used sea beet as a genetic source to produce many pest and disease resistant sugar beet germplasm and parental lines, while authoring more than 100 publications.

Signs of Change: Assessment Past, Present and Future Another Time, Another Place...Examinations Then and Now In the Temple of Literature in Hanoi, Vietnam, a series of stone stelae records the names of the handful of illustrious examination candidates who, in each century, passed the national examination to become a Doctor of Literature. Beginning in the 11th century, the exams were conducted personally by successive kings who pursued Confucian ideals that found expression in the enormous value placed on the pursuit of wisdom and learning. In the 21st century we are both puzzled and impressed by this tradition. Puzzled by such an explicit commitment to a meritocracy in an essentially feudal society; impressed by this enthusiasm for learning and the pursuit of wisdom at the highest level of society. Yet, there are also important similarities between the 11th and 21st centuries. Then, as now, assessment was associated with excellence, high standards, pr- tige and competition—success for the chosen few; disappointment for the majority. Then, as now, the pursuit of excellence was embedded in a social context that favoured the elite and determined success in terms of the predilections of the p- erful. Then, as now, the purpose of the assessment, the way it was conducted and its impact on society all re ected the social and economic priorities of the day.

LSAT Practice Questions are the simplest way to prepare for the LSAT test. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. If someone has never taken a practice test, then they are unprepared for the types of questions and answer choices that they will encounter on the official test. There is a tremendous advantage to someone taking the test that is already familiar with the questions and answer choices. Another advantage of taking practice tests is that you can assess your performance and see if you need to study and practice more, or if you're already prepared enough to achieve success on your test day. If you do well on the practice test, then you know you're prepared. If you struggle on the practice test, then you know you may still have more work to do to get prepared. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our LSAT Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our LSAT Practice Questions include answer keys with detailed answer

explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.

Published in October to coincide with the launch of the fourth Amazing Spaces series, this second tie-in book showcases more of George Clarke's extraordinary small builds from all over the country. He shows how amazingly unexpected small spaces can be adapted into really workable living areas. Combining the eccentric and the inspirational with practical information directly from the projects'

creators, the book will appeal not only to those dreaming of a get-away - for example in a deceptively cosy tin tent - but to everyone who wants to make the most of the space at home or in the garden, such as converting a basement into a casino. With stunning photography showcasing projects from Series 2 and 3 and highlighting their most intriguing features as well as advice and style tips, the book features more than 20 previously unpublished home, garden, holiday and work spaces.
