For over 150 years, Tlingit women artists have beaded colorful, intricately beautiful designs on moccasins, dolls, octopus bags, tunics, and other garments. *Painful Beauty* suggests that at a time when Indigenous cultural practices were actively being repressed, beading supported cultural continuity, demonstrating Tlingit women's resilience, strength, and power. Beadwork served many uses, from the ceremonial to the economic, as women created beaded pieces for community use and to sell to tourists. Like other Tlingit art, beadwork reflects rich artistic visions with deep connections to the environment, clan histories, and Tlingit worldviews. Contemporary Tlingit artists Alison Bremner, Chloe French, Shgen Doo Tan George, Lily Hudson Hope, Tanis S'eiltin, and Larry McNeil foreground the significance of historical beading practices in their diverse, boundary-pushing artworks. Working with museum collection materials, photographs, archives, and interviews with artists and elders, Megan Smetzer reframes this often overlooked artform as a site of historical negotiations and contemporary inspirations. She shows how beading gave Tlingit women the freedom to innovate aesthetically, assert their clan crests and identities, support tribal sovereignty, and pass on cultural knowledge. *Painful Beauty* is the first dedicated study of Tlingit beadwork and contributes to the expanding literature addressing women's artistic expressions on the Northwest Coast.

A look at why we are interested in what we see in art. Are we born with aesthetic preferences that are shaped by cultural influences? Is our natural attraction to Beauty another weapon in our arsenal of species' survival? This book examines many so-called rules of composition in the visual arts to find natural reasons for their existence. It is designed to aide the visual artist and those who appreciate their work by bringing attention to subtle cues of attraction cultivated by our ancient and

immediate ancestors. It calls upon recent work in neuroaesthetics and other scientific disciplines to back up its speculative claims, and asks the reader to contribute opinions of their own on the books' website at naturallycomposed.com. There are many examples of photos in the book, and the reader is again asked to insert their own examples to enforce or refute the claims.

For those who believe that there must be a more agile and efficient way for people to get things done, here is a brilliantly discursive, thought-provoking book about the leadership and management process that is changing the way we live. In the future, historians may look back on human progress and draw a sharp line designating "before Scrum" and "after Scrum." Scrum is that ground-breaking. It already drives most of the world's top technology companies. And now it's starting to spread to every domain where leaders wrestle with complex projects. If you've ever been startled by how fast the world is changing, Scrum is one of the reasons why. Productivity gains of as much as 1200% have been recorded, and there's no more lucid - or compelling - explainer of Scrum and its bright promise than Jeff Sutherland, the man who put together the first Scrum team more than twenty years ago. The thorny problem Jeff began tackling back then boils down to this: people are spectacularly bad at doing things with agility and efficiency. Best laid plans go up in smoke. Teams often work at cross purposes to each other. And when the pressure rises, unhappiness soars. Drawing on his experience as a West Point-educated fighter pilot, biometrics expert, early innovator of ATM technology, and V.P. of engineering or CTO at eleven different technology companies, Jeff began challenging those dysfunctional realities, looking for solutions that would have global impact. In this book you'll journey to Scrum's front lines where Jeff's system of deep accountability, team interaction, and constant iterative improvement is, among other feats, bringing the FBI into the 21st century, perfecting the design of an affordable 140 mile per hour/100 mile per gallon car, helping NPR report fast-moving action in the Middle East, changing the way pharmacists interact with patients, reducing poverty in the Third World, and even helping people plan their

weddings and accomplish weekend chores. Woven with insights from martial arts, judicial decision making, advanced aerial combat, robotics, and many other disciplines, *Scrum* is consistently riveting. But the most important reason to read this book is that it may just help you achieve what others consider unachievable – whether it be inventing a trailblazing technology, devising a new system of education, pioneering a way to feed the hungry, or, closer to home, a building a foundation for your family to thrive and prosper.

The Art of Doing Twice the Work in Half the Time Diamond Pocket Books Pvt Ltd "The Vignes twin sisters will always be identical. But after growing up together in a small, southern black community and running away at age sixteen, it's not just the shape of their daily lives that is different as adults, it's everything: their families, their communities, their racial identities. Ten years later, one sister lives with her black daughter in the same southern town she once tried to escape. The other secretly passes for white, and her white husband knows nothing of her past. Still, even separated by so many miles and just as many lies, the fates of the twins remain intertwined. What will happen to the next generation, when their own daughters' storylines intersect? Weaving together multiple strands and generations of this family, from the Deep South to California, from the 1950s to the 1990s, Brit Bennett produces a story that is at once a riveting, emotional family story and a brilliant exploration of the American history of passing."--Provided by publisher.

"This book is a veritable powerhouse that shatters, in one instant, the wall of lies and deceit that took decades to build upon our impressionable minds. Stamper's ability to explain complex legal and political information in a comprehensive yet concise manner is without equal. Like a master sculptor he has chipped away the 'Words of Art and Deception' to reveal the inescapable and undeniable Truth. This book has single-handedly bared the cleverly crafted schemes of a Power-lusting Elite." ~ Paul Nash, DC, ND, CCN, ACU, Holistic Medicine, Minneapolis "If only a portion of what this researcher has discovered is verifiable, we as a nation of

free people must hang our heads in shame. The future generations will not forgive us or forget the terrible injustice we have let befall them." ~ Fred Diaulas, Professor of Ethics, University of North Florida "In 1954 I began my legal practice as an assistant district attorney in the city of Miami. We switched from common law pleading to statutory pleading and no one asked why. Now I know the answer, and it depresses me to no end." ~ Ralph G. Mitchell, JD, Attorney at Law, St. Augustine, Florida.

Generally regarded as Nella Larsen's best work, *Passing* was first published in 1929 but has received a lot of renewed attention because of its close examination of racial and sexual ambiguities. It has achieved canonical status in many American universities. Clare Kendry is living on the edge. Light-skinned, elegant, and ambitious, she is married to a racist white man unaware of her African American heritage, and has severed all ties to her past after deciding to 'pass' as a white woman. Clare's childhood friend, Irene Redfield, just as light-skinned, has chosen to remain within the African American community, and is simultaneously allured and repelled by Clare's risky decision to engage in racial masquerade for personal and societal gain. After frequenting African American-centric gatherings together in Harlem, Clare's interest in Irene turns into a homoerotic longing for Irene's black identity that she abandoned and can never embrace again, and she is forced to grapple with her decision to pass for white in a way that is both tragic and telling.

Passing in the Outsider Lane Little, Brown

No Brave New World! In the interview by Hans Ulrich Obrist accompanying this first comprehensive European publication on her work, the artist, born in 1978 in south China's Guangzhou province, outlines the initial conditions and perceptual requirements for her work. As the daughter of a sculptor, she traveled with her father, who had the privilege of working in Hong Kong and of being able to repeatedly return there, which allowed her to develop quite early on a fundamental interest in Western (pop-) culture, as well as familiarizing her with the corresponding ways of seeing. During her art and film studies, she remained undecided for quite a long time which path she would follow, which is still reflected the hybridity of her work. The book focuses on three of her complex works, which are realized in a both sculptural and cinematic way. With respect to form, Cao Fei delves into the

online world of avatars and pop stars, as well as the film world of zombies and the always seemingly rather romantic models, as known from the world of model railways. Produced, in some instances, over several years, the image of a closed oeuvre emerges that taps into a high critical potential--as in »La Town« where in meticulously constructed model parts, plastic figures are cast from one fire disaster to the next; in »Haze and Fog«, where the dead and the living share a city, New Beijing; or in »RMB City«, a »Second World« of artificial set pieces where avatars live, and sometimes even a groovy Marx-figure appears on the scene. In the wake of her invitations to numerous biennials, last in Venice in 2015, Cao Fei's work has attracted great interest; it represents the artistic awakening of young transnational Chinese art: the latter probably because her perception of the molochs, in this case Chinese cities, coincides with the future prospects of Western societies.

The Art of Passing the Buck offers a simple, comprehensive explanation of how Wills and Trusts work. It reveals wealth retention, management and empowerment techniques you can use to build a family dynasty. Inheritance may often degenerate into legal battles, and/or dark whisperings among relatives. Who was cared for or neglected comes to the fore when reading the Will or setting up the Trust. Sometimes, siblings battle among themselves over who gets what, while parents become distraught making the myriad decisions related to their own passing. We explain how there can be a smooth transition when both Grantors and Beneficiaries have vital information. A must read for both givers and receivers of wealth, this book also covers: the history of Trusts, Trust types, Trustees and the law, privacy, who should not have a Trust, parenting and perpetual wealth, and heirs: the favored and the flawed. Emphasis throughout is on what works in the real world, based on decades of experience.
