**A Study of History: Volume I: Abridgement of Volumes I-VI** New York : Oxford University Press

An illustrated, abridged, version of Toynbee's twelve-volume work on the process of history

Important Excerpts from Arnold J. Toynbee  
Oxford University Press

Arnold Toynbee's A Study of History has been acknowledged as one of the greatest achievements of modern scholarship. A ten-volume analysis of the rise and fall of human civilizations, it is a work of breathtaking breadth and vision. D.C.

Somervell's abridgement, in two volumes, of this magnificent enterprise, preserves the method, atmosphere, texture, and, in many instances, the very words of the original. Originally published in 1947 and 1957, these two volumes are themselves a great historical achievement. Volume 1, which abridges the first six volumes of Toynbee's study, includes the Introduction, The Geneses of Civilizations, and The Disintegrations of Civilizations. Volume 2, an abridgement of Volumes VII-X, includes sections on Universal States, Universal churches, Heroic Ages, Contacts Between Civilizations in Space, Contacts Between Civilizations in Time, Law and Freedom in History, The Prospects of the Western Civilization, and the Conclusion. Of Somervell's work, Toynbee wrote, "The reader now has at his command a uniform

abridgement of the whole book, made by a clear mind that has not only mastered the contents but has entered into the writer's outlook and purpose."

In this volume, originally published in 1961, the author presents an exposition of the meanings given to history. Part 1 describes the conceptions of history impied in wide-spread religions and cultures, Confucian and Taoist, Hindu and Buddhist, Zoroastrian and Muslim, Greek and Roman, Jewish and Christian. Part 2 surveys the theories of independent thinkers and schools in the Occident from the Middle Ages to the mid-twentieth century.

One of the most remarkable thinkers of this century, Arnold Toynbee won world-wide recognition as the author of the monumental ten-volume A Study of History. Its publication and phenomenal success brought him fame and the highest praise, as the reading public proclaimed him the most renowned scholar in the world. This thought-provoking, engaging study of Toynbee, written by one of today's most eminent historians, weaves together Toynee's intellectual accomplishments and the personal difficulties of his private life. Providing both an intimate portrait of a leading thinker and a judicious evaluation of his work and his legacy for the the study of history, William H. McNeill offers both a biography and a commentary on how to write and understand history. Along with an illuminating discussion of the strengths and weaknesses of A Study of History and

the countless other works written by Toynbee, McNeill offers a compelling examination of the responses of other historians (including the devastating attack launched by Hugh Trevor-Roper) and Toynbee's attempts to modify his Study to answer these criticisms. McNeill also explores his tormented personal life, including his troubled marriage to Rosalind Murray and the suicide of his son, Anthony. In this sympathetic depiction of a life, both triumphant and tragic, McNeill brings his skills to bear on one of the greatest figures in his field, illuminating a career of rare accomplishment.

**A Study Guide for Arnold Toynbee's "A Study of History"** Oxford Paperbacks

This volume is divided into three parts. The first explores various aspects of Collingwood's philosophy of history, offering a follow-up to themes discussed in the author's revised edition of *History as a Science*. The Philosophy of R.G. Collingwood (Springer, 2012). After a general introduction to Collingwood's philosophy of history, his manuscript *The Principles of History* of 1939 is discussed. This manuscript was considered 'lost' for some time but has been rediscovered in

1995. Other topics dealt with are Collingwood's philosophy of history in the year of his *An Autobiography* (1939), the philosophical context of his re-enactment theory, his views on the notions of process, progress, and civilization, as well as his unusual claim that history is a science. The following four essays of the second part deal with various aspects relating to the study of history and historiography. As regards the latter subject, attention is paid to the works of Herodotus and Toynbee, who correspond in having a wide scope and having been under debate. With respect to the study of history, the crucial notion of evidence is addressed, while a critical appraisal is made of the way the idea of a 'real' past is dealt with by Ankersmit. The third part of the volume discusses issues related to Western civilization and culture, and topics that are of global relevance. Both are dealt with from a historical and philosophical perspective. The first two essays focus on

the rupture that occurred in Europe since the end of the eighteenth century as regards the relationship between past, present, and future, resulting in a loss of historical consciousness, and feelings of disorientation and crisis. The last three essays address the global issues of the responsibility for future generations and universal human rights, as well as the more general theme of the relationship between the West and the non-Western world.
