From the Pulitzer Prize-winning journalist and author of *Why We Make Mistakes*, an illuminating exploration of human beings' astonishing ability to deceive themselves. To one degree or another, we all misjudge reality. Our perception—of ourselves and the world around us—is much more malleable than we realize. This self-deception influences every major aspect of our personal and social life, including relationships, sex, politics, careers, and health. In *Kidding Ourselves*, Joseph Hallinan offers a nuts-and-bolts look at how this penchant shapes our everyday lives, from the medicines we take to the decisions we make. It shows, for instance, just how much the power of many modern medicines, particularly anti-depressants and painkillers, is largely in our heads. Placebos in modern-day life extend beyond hospitals, to fake thermostats and “elevator close” buttons that don't really work...but give the perception that they do. *Kidding Ourselves* brings together a variety of subjects, linking seemingly unrelated ideas in fascinating and unexpected ways. And ultimately, it shows that deceiving ourselves is not always negative or foolish. As increasing numbers of researchers are discovering, it can be incredibly useful, providing us with the resilience we need to persevere, in the boardroom, bedroom, and beyond. Provocative, accessible, and easily applicable to multiple facets of everyday life, *Kidding Ourselves* is an extraordinary new exploration of our mind's flexibility.

Today everyone—whether they know it or not—is in the emotional transportation business. More and more, success is won by creating compelling stories that have the power to move partners, shareholders, customers, and employees to action. Simply put, if you can't tell it, you can't sell it. And this book tells you how to do both. Historically, stories have always been igniters of action, moving people to do things. But only recently has it become clear that purposeful stories—those created with a specific mission in mind—are absolutely essential in persuading others to support a vision, dream or cause. Peter Guber, whose executive and entrepreneurial accomplishments have made him a success in multiple industries, has long relied on purposeful story telling to motivate, win over, shape, engage and sell. Indeed, what began as knack for telling stories as an entertainment industry executive has, through years of perspiration and inspiration, evolved into a set of principles that anyone can use to achieve their goals. In *Tell to Win*, Guber shows how to move beyond soulless Power Point slides, facts, and figures to create purposeful stories that can serve as powerful calls to action. Among his techniques: \* Capture your audience's attention first, fast and foremost \* Motivate your listeners by demonstrating authenticity \* Build your tell around “what's in it for them” \* Change passive listeners into active participants \* Use “state-of-the-heart” technology online and offline to make sure audience commitment remains strong To validate the power of telling purposeful stories, Guber includes in this book a remarkably diverse number of “voices” —master tellers with whom he's shared experiences. They include YouTube founder Chad Hurley, NBA champion Pat Riley, clothing designer Normal Kamali, “Mission to Mars” scientist Gentry Lee, Under Armour CEO Kevin Plank, former South African president Nelson Mandela, magician David Copperfield, film director Steven Spielberg, novelist Nora Roberts, rock legend Gene Simmons, and physician and author Deepak Chopra. After listening to this extraordinary mix of voices, you'll know how to craft, deliver—and own—a story that is truly compelling, one capable of turning others into

viral advocates for your goal.

*The Hidden Power of Kindness* Cosimo, Inc.

The main purpose of the book is to provide insight into an area that humans often take for granted. There are wonderful and exciting stories of organisms using chemical signals as a basis of a sophisticated communication system. In many instances, chemical signals can provide more detailed and accurate information than any other mode of communication, yet this world is hidden from us because of our focus on visual and auditory signals. Although we have a diversity of senses available to us, humans are primarily auditory and visual animals. These stimuli are sent to the more cognitive areas of our brain where they are immediately processed for information. We use sounds to communicate and music to excite or soothe us. Our vision provides us with communication, entertainment, and information about our world. Even though our world is dominated by other stimulus energies, we have chosen, in an evolutionary sense, either auditory or visual signals to carry our most important information. This is not the case for most other organisms. Chemical signals, mediated through the sense of smell and taste, are typically more important and are used more often than other sensory signals. The world of communication using chemicals is an alien world for us. We are unaware of how important chemical signals are to other organisms and we often overlook the influence of chemical signals in our own life. Part of this naïveté about chemical signals is due to our cultural focus on visual and auditory signals, but a larger part of our collective ignorance is the lack of information about chemical communication in both popular and scientific writings. The popular press and popular writings virtually ignore the chemical senses, especially in regard to their role or influence for humans and our human culture. Academic books and textbooks are no better.

Creating Your World Through Words "No one commits to divorce just like that. No one becomes an alcoholic just like that. No one kills someone just like that. They've been setup up throughout the course of their life to act in error by what they have said." "They started early on by saying, 'Boy, life is the pits. This is hell. I guess that's my cross to bear.' Some talk about the cross more than the resurrection. 'Well, you know, I'm carrying big burdens,' they sigh." "If you keep talking about your burdens, this attitude will grow and fester in you. Before you know it, you won't like life. You'll wake up one morning and think that the world is getting grayer every day. All the color seems to have gone out of the world, and it doesn't look the same anymore." "Life use to be a playground to you; now it's a battlefield - created by your own words."

In 1997, Sally Armstrong, then editor-in-chief of *Homemaker's* magazine, wrote an article about the women of Afghanistan and their lives under the misogynist Taliban regime. More than 9000 letters poured in from readers demanding that something be done to get these women out of bondage. Recently named as UNICEF's special representative to Afghanistan, Armstrong has an insider's view of the terror, abuse and misogyny the women and girls of Afghanistan have faced for more than two decades of civil war and, in particular, when the Taliban took over. *Veiled Threat* begins on September 27, 1996, the day the Taliban seized power and put women under house arrest. Armstrong introduces us to several women--among them the commissioner of human rights for Afghanistan, Dr. Sima Samar--who describe their rapid-fire descent into the waking nightmare of life under the Taliban. Armstrong then steps back to describe the centuries-old history of misogyny and the way customs such as honour killing found their way to Afghanistan. She also highlights the extraordinary work women around the world were doing to rescue their sisters in Afghanistan while venerable bodies such as the United Nations were virtually silent. Leading us through the fractured history of Afghanistan, Armstrong examines what Islam actually says about women. She assesses the monumental impact of September 11 and ends with intriguing conclusions drawn by Afghan women. Based on first-hand experience that includes Armstrong's own unexpected stay with the Taliban and years of passionate involvement in the struggle for women's rights in Afghanistan, *Veiled Threat* brings a humane and informed view to the lives of women in this tragic and awesome land.
