BETHANY KRAMER

Making Healthy Decisions Holt Rinehart & Winston

Large, successful organizations only transform after failure. If everything is going well, there is a tendency not to challenge methods. It is only once things have gone radically wrong that a successful organization starts to reexamine their methods and culture. This book is about organizational leadership, but provides a unique spin to promoting innovation, inclusion and transparency among employees. It examines co-author Steven Rotkoff's experiences as a retired US Army Colonel and Red Team strategies used by the military and the corporate world to make better decisions and improve organizational culture and applies them to nursing in both clinical and academic settings. Centering cases derived from US-based academic and clinical settings, the book discusses how and why some strategies do and others don't work and examines how these military and corporate strategies apply effectively to nursing settings. Turning a lot of the available literature on its head, this book offers new models and methods to foster better conversations, particularly between managers and staff. Nursing has changed in both academic and clinical settings. Just as military and corporate organizations have had to change their organizational behavior and leadership styles and methods to meet the needs of today's employees and consumers, the nursing profession must change to meet the needs of faculty, an inter-professional

health care environment and our increasingly inclusive and diverse environments.

Decisions for Health Red Holt Rinehart & Winston

"Our fascination with the topic of contextualizing care began about twenty years ago when the evidence-based medicine movement had taken hold. We noticed that although medical residents were skilled at identifying the latest studies and guidelines, their care plans often didn't seem appropriate once one considered the life challenges some of their patients were facing. We'd see, for instance, a patient with poorly controlled asthma put on a higher dose of a medication they weren't taking, rather than a cheaper generic, when the context was that they couldn't afford it. We coined the terms "contextual error" to describe these kinds of mistakes and "contextualized care" when patients' care plans are adapted to their life circumstances"--

Decisions for Health Level Red, Grade 7 Decision Making and Refusal Skills Workbook
Oxford University Press

"Inescapable Decisions" examines the disarray in the American health care system and proposes major corrective strategies. Mechanic shows that the high-technology interventionist type of medicine commonly practiced in the United States has lost its sense of priorities and balance. Expensive and sometimes dangerous procedures of unknown efficacy are used excessively and often inappropriately, while many basic preventive and primary care services remain unavailable to those who need them the most. This incredibly complex system of care operates in an environment of heavy-landed rules and regulations and enormous waste of resources.

Decisions for Health Level Green, Grade 7 for Macintosh and Windows Level Red Holt McDougal

As you begin to think about the care you want now and at the end of your life, remember that the reason to make INFORMED DECISIONS is so you receive care that makes you most comfortable.
