Becoming a Master Student GYAN SHANKAR

Visualize a typical product-training program: large audiences, death by PowerPoint, and attendees secretly texting away on their cell phones. And the managers? Well, they have left the room. The truth is that adults (such as salespeople!) do not learn, much less retain, information presented to them using passive (thus boring!) training methods. Adequate training does not necessarily mean adequate content: many product training programs offer abundant and excellent product training material. The way that people are trained that is, the strategic approach to behavioral modification is as important

as what people are trained on. Thus, a paradigm shift in training strategy may be indicated by introducing innovative learning techniques into the product training environment. After reading this book, you'll be able to take steps to Use blended learning principles in a holistic approach to increase learning retention Make use of the most innovative training techniques Harness the power of Adult Learning Theory Maximize learning using a small group setting Learn how to use real-life case studies to enhance learning And much more! If you are still under the impression that adequate content ensures adequate training, then think again. Take the strategic approach to allow employees to retain more of what they learn and increase sales. While targeted at companies with advanced

technologies, anyone can benefit from reading this book. Take yourself and your employees to the next level and learn the secrets behind Innovations in Product Training.

The Human-Computer Interaction Handbook Taylor & Francis

The Understanding Research series focuses on the process of writing up social research. The series is broken down into three categories: Understanding Statistics, Understanding Measurement, and Understanding Qualitative Research. The books provide researchers with guides to understanding, writing, and evaluating social research. Each volume demonstrates how research should be represented, including how to write up the methodology as well as the research

findings. Each volume also reviews how to appropriately evaluate published research. Focus Group Discussions addresses the challenges associated with conducting and writing focus group research. It provides detailed guidance on the practical and theoretical considerations in conducting focus group discussions including: designing the discussion guide, recruiting participants, training a field team, moderating techniques and ethical considerations. Monique Hennink describes how a methodology section is read and evaluated by others, such as journal reviewers or thesis advisors. She provides readers with guidance on specific aspects of presenting research findings, such structuring narrative accounts, developing an argument,

using quotations, reporting focus group interaction, visual presentation formats, and strategies for grounding study results. She describes the challenges in assessing focus groups and details practical strategies for assessing scientific rigor. The book includes case study examples of field research across a range of disciplines and international contexts. Hennink concludes the volume with an overview of current debates relating to the evaluation of qualitative research, suggesting ways to critique the research design, methodology and results of focus group research.

OGCbuying.solutions is an executive agency of the Office of Government Commerce and a trading fund. It was

established in April 2001 to maximise the value for money obtained by government departments and other public bodies through the procurement and supply of goods and services. Its operations focus on three areas: framework agreements, managed services and memoranda of undertaking. The agency reported value for money savings of £412 million in 2005-06, an increase of 71 per cent since 2003-04. Whilst these savings are judged to be significant, this NAO report identifies considerable potential to achieve further value for money savings and makes six recommendations to help OGCbuying.solutions further improve its performance. The NAO report estimates that these changes, combined with a more co-ordinated public sector

procurement landscape, could achieve a potential £520 million to £660 million in further savings.

This book is open access under a CC BY 4.0 license. The book presents the Proceedings of the 13th International Congress on Mathematical Education (ICME-13) and is based on the presentations given at the 13th International Congress on Mathematical Education (ICME-13). ICME-13 took place from 24th- 31st July 2016 at the University of Hamburg in Hamburg (Germany). The congress was hosted by the Society of Didactics of Mathematics (Gesellschaft für Didaktik der Mathematik - GDM) and took place under the auspices of the International Commission on Mathematical Instruction (ICMI). ICME-13 brought together about

3,500 mathematics educators from 105 countries, additionally 250 teachers from German speaking countries met for specific activities. Directly before the congress activities were offered for 450 Early Career Researchers. The proceedings give a comprehensive overview on the current state-of-the-art of the discussions on mathematics education and display the breadth and deepness of current research on mathematical teaching-and-learning processes. The book introduces the major activities of ICME-13, namely articles from the four plenary lecturers and two plenary panels, articles from the five ICMI awardees, reports from six national presentations, three reports from the thematic afternoon devoted to specific features of ICME-13.

Furthermore, the proceedings contain descriptions of the 54 Topic Study Groups, which formed the heart of the congress and reports from 29 Discussion Groups and 31 Workshops. The additional important activities of ICME-13, namely papers from the invited lecturers, will be presented in the second volume of the proceedings.

Chinese Perspectives from Hong Kong, Taiwan and Mainland China Oswaal

Books and Learning Private Limited
A generally acknowledged characteristic of modern life, namely the temporalization of experience, inextricable from our intensified experience of contingency and difference, has until now remained largely outside psychology's purview. Wherever questions about the development, structure, and function of the concept of time have been posed – for example by Piaget and other founders of genetic structuralism – they have been concerned predominantly with concepts of "physical", chronometrical time, and related concepts (e.g., "velocity"). All the contributions to the present volume attempt to close this gap. A larger number are especially interested in the

narration of stories. Overviews of the relevant literature, as well as empirical case studies, appear alongside theoretical and methodological reflections. Most contributions refer to specifically historical phenomena and meaning-constructions. Some touch on the subjects of biographical memory and biographical constructions of reality. Of all the various affinities between the contributions collected here, the most important is their consistent attention to issues of the constitution and representation of temporal experience.
