 What Amateurs Can Learn from Ulf Andersson's Positional Masterpieces One of the most effective ways to improve your chess is to take a world class-player as your example. By collecting his games, studying his choices and examining his style, you will understand what made him rise to the very top. This is what Guido Kern and Jurgen Kaufeld have done with Swedish chess legend Ulf Andersson, a positional genius with a crystal-clear style, who rose to the number 4 spot of the FIDE world rankings. Kaufeld and Kern have selected 80 of Andersson's games and grouped them into 15 thematic strategy lessons, pinpointing exactly how the Swede made the difference in each case. Their instructive verbal explanations will improve your strategic skills and your positional feeling. Every chess player knows how difficult it can be to convert an advantage into a win. Positional technique is what you need and Grandmaster Chess Strategy teaches you exactly that. Throughout the book the authors have selected dozens of test positions at particularly instructive stages of the games.

What exactly makes the greatest players of all time, such as Magnus Carlsen, Bobby Fischer, and Garry Kasparov stand out from the rest? The basic aspects of chess (calculation, study of opening theory, and technical endgame ability) are of course of great importance. However, the more mysterious part of chess ability lies within the thought process. In particular:

- How does one evaluate certain moves to be better than others?
- How does one improve their feel of the game?

This book will tackle this woefully underexplored aspect of chess: the logic behind the game. It will explain how chess works at a fundamental level. Topics include:

- What to think about when evaluating a position.
- How to formulate and execute plans.
- How to generate and make use of

the initiative. The reader also has plenty of opportunities to test their decision-making by attempting 270 practical exercises. These are mostly designed to develop understanding, as the justification of the moves is more important than the actual correct answer.
