From frontline experts on the topic—everything you need to know about COVID-19 and how it affects the heart
COVID-19's effect on the cardiovascular system continues to drive increases in morbidity and mortality. Building a solid understanding of the disease spectrum is critical for accurately diagnosing, treating, and managing patients with heart issues in the time of COVID. Written by a team of experts who worked on the frontlines in New York City throughout the worst of the pandemic, *COVID-19 and the Heart: A Case-Based Pocket Guide* is a one-of-a-kind resource for providing safe, effective care for COVID-19-related heart conditions. Designed for quick and easy learning and on-the-spot clinical decision making, this practical guide is organized into chapters based on genuine clinical cases and provides the best approach for each one. The authors highlight key points throughout the clinical content for easy review, and provide up-to-date information on clinical trials/vaccines, diagnostic and treatment algorithms, therapeutics, monitoring, and patient

education. Ideal for healthcare workers actively engaged in the ongoing pandemic and students seeking to build their expertise, *COVID-19 and the Heart* is the go-to guide to making the right clinical judgments with respect to the cardiac manifestations of COVID-19. *COVID-19 and the Heart* starts with the physiology of COVID-related heart disease, and walks you through COVID's effect on: ACS
Valvular heart disease
Arrhythmia
Pericardial disease
Heart failure
Shock
Thromboembolism

The Law Officer's Pocket Manual is a handy, pocket-sized, spiral-bound manual that highlights basic legal rules for quick reference and offers examples showing how those rules are applied. The manual provides concise guidance based on U.S. Supreme Court rulings on constitutional law issues and other legal developments, covering arrest, search, surveillance, and other routine as well as sensitive areas of law enforcement. It includes more than 100 examples drawn from leading cases to provide guidance on how to act in a wide variety of situations. The 2021 edition is completely updated to reflect recent court decisions. This book

helps you keep track of everything in a readable and easy-to-carry format. Some important case rulings from the past 12 months include: The U.S. Supreme Court made clear that it is common sense for an officer pulling over a vehicle to assume, without additional evidence, that the driver is the registered owner. The U.S. Supreme Court appeared to signal the end to so-called Bivens suits filed against federal officers for constitutional violations. The First Circuit extended the community caretaking doctrine to the home in finding officers' warrantless entry justified. In the continuing evolution of the stop-and-frisk doctrine, the Second Circuit ruled that officers need more than a belief that a suspect possess something illicit—they must reasonably believe the suspect may pose a threat. The Tenth Circuit ruled that an officer's 15-minute phone call to a national database was reasonable and did not impermissibly extend a traffic stop. The Seventh Circuit said that the smell of marijuana combined with a driver's "shocked" body language justified a trunk search. The Fourth Circuit tossed a man's gun convictions after the

officers arrested the man at his girlfriend's residence without probable cause that he lived there. Routledge offers tiered discounts on bulk orders of 5 or more copies. For more information, please visit: <https://www.routledge.com/collections/16268>

The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating

prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).
