Memory Semantic memory
is one of the two types of
explicit memory (or
declarative memory) (our
memory of facts or events
that is explicitly stored
and retrieved). Semantic
memory refers to general
world knowledge that we
have accumulated

throughout our lives. This
general knowledge (facts,
ideas, meaning and
concepts) is intertwined in
experience and
dependent on
culture. Semantic memory
- Wikipedia Musical
memory refers to the
ability to remember
music-related information,
such as melodic content
and other progressions of
tones or pitches. The
differences found
between linguistic
memory and musical
memory have led
researchers to theorize
that musical memory is

encoded differently from
language and may
constitute an independent
part of the phonological
loop. Music-related
