Social and political theorists have traced in detail how individuals come to possess gender, sex and racial identities. This book examines the nature of these identities. Georgia Warnke argues that identities, in general, are interpretations and, as such, have more in common with textual understanding than we commonly acknowledge. A racial, sexed or gendered understanding of who we and others are is neither exhaustive of the 'meanings' we can be said to have nor uniquely correct. We are neither always, or only, black or white, men or women or males or females. Rather, all identities have a restricted scope and can lead to injustices and contradictions when they are employed beyond that scope. In concluding her argument, Warnke considers the legal and policy implications that follow for affirmative action, childbearing leave, the position of gays in the military and marriage between same-sex partners.

PMBOK®, PRINCE2®, and Scrum are today's three most widely recognized project management standards. The most successful project managers know how to draw on all three, and often combine them to deliver their projects more effectively and efficiently. In Mastering Principles and Practices in PMBOK, Prince2, and Scrum, Jihane Roudias shows project managers how these methods complement each other, how to integrate them, and how to troubleshoot projects involving any or all of them. Roudias illuminates core project concepts, processes, and areas of knowledge in each methodology, guides you in synthesizing them, and reviews the types of difficulties you may encounter in each project process. Drawing on extensive personal experience, Roudias also emphasizes the importance of project risk management, monitoring, and evaluation systems – and demonstrates how to use them to make timely and informed decisions at every stage of your project. For every project management practitioner and student pursuing PMBOK/PMI, PRINCE2, and/or Scrum certification, or seeking to use these methodologies together to achieve better project performance.

The book is bringing to fore new ways and approaches to governance in Africa and it underscores what politics can do in realizing this to modern states, including those in Africa. It captures the beyond 21st Century moment for Africa in lieu of the vast resources associated with the continent. The questions asked pertinently in the book include; What should a new Africa (same resources, same methods of governance, recycled leadership, Western leaning academicians, same traditional export-import trade) entail? The authors yearn for good agricultural forms, profitable business models, seeing ills and rectifying them, and dealing with power dispositions responsibly.

In this book, project management expert Dr. Alexander Laufer leads an all-star team of practitioners and thought leaders in presenting a powerful project leadership framework. Laufer's framework addresses the toughest challenges of new product development: large, complex projects composed of many diverse, geographically distributed, and highly interdependent components; organizational change; and repeated and risky tasks. Laufer reveals core leadership principles that are crucial to successful project leadership in dynamic and complex environments, regardless of industry, project goals, or stakeholders. Then, together with his contributors, he presents eight chapter-length case studies covering exceptionally challenging projects in a wide spectrum of industries and products – from developing missiles to reorganizing companies, building spacecraft and dairy plants to flying

solar-powered airplanes. Readers will discover new ways to unleash the power of autonomy and learning; adapt to change on a timely basis; “give up” control without “losing” control; use face-to-face interaction to maximize alignment; manage “no fun” missions in hostile environments; deliver on bold ideas through sheer preparation; learn from practice – and unlearn lessons that need to be unlearned. Mastering the Leadership Role in Project Management will be invaluable to executives, project leaders, and aspiring project leaders in all organizations – regardless of their project goals, backgrounds, or experience.

Medical education ? the art and science behind medical teaching and learning ? has progressed remarkably. Teaching and learning have become more scientific and rigorous, curricula are based on sound pedagogical principles, and problem-based and other forms of active and self-directed learning have become the mainstream. We have progressed from the role of problem-identifier to that of solution-provider. This book provides a balanced overview of the "why" of medical education, emphasizing the need for change and adaptation, and the "how", by demonstrating the way concepts and theories of medical education can be of immediate benefit to the medical teacher. In this improved second edition, student assessment, curriculum, outcome-based education, clinical teaching, and problem-based learning receive more emphasis with the addition of new chapters, essential updates, and consolidation. The tone is more pragmatic, with implementable examples and incorporation of newer evidence and better practices. However, one thing has not changed: the book still targets medical teachers without a formal background in education. Contents: Historical Overview of Medical Education; Global and Regional Perspectives in Medical Education; Change Process and Role of Leadership; Learning Concepts and Philosophies; Curricular Design and Planning; Educational Outcomes; Teaching and Learning Methodology: General, Clinical, PBL; Assessment of Students; Program Evaluation; Research in Medical Education; Glossary and Further Resources.

This book examines the challenges posed by English, a foreign language, as a language of teaching and learning for community secondary schools in Tanzania in terms of academic performance. The book probes the necessity for having two languages of instruction in the Tanzanian educational system. While Kiswahili, the native language, is predominantly understood by the majority of people,

the discussion in this book indicates that most students in community secondary schools in Tanzania are incompetent in understanding, writing, listening, reading, and speaking English, a language they use in learning and doing their examinations, especially in the early stages of their secondary studies. The incompetence in the above-mentioned skills is mostly caused by their inability to cope with the abrupt transition in the languages of instruction from their pre-primary and primary school study [Kiswahili] to secondary school study [English]. Moreover, most teachers are unable to use the English language as a means to impart knowledge or facilitate learning to their students, leading them to code-switching and code-mixing. This book poses a challenge to countries whose students pass through a transition from one language of instruction to another in their educational systems, helping them to make appropriate decisions in regard to the appropriate language of teaching and learning.
