This work by Sir James Frazer (1854-1941) is widely considered to be one of the most important early texts in the fields of psychology and anthropology. At the same time, by applying modern methods of comparative ethnography to the classical world, and revealing the superstition and irrationality beneath the surface of the classical culture which had for so long been a model for Western civilisation, it was extremely controversial. Frazer was greatly influenced by E. B. Tylor's *Primitive Culture* (also reissued in this series), and by the work of the biblical scholar William Robertson Smith, to whom the first edition is dedicated. The twelve-volume third edition, reissued here, was greatly revised and enlarged, and published between 1911 and 1915; the two-volume first edition (1890) is also available in this

series. Volume 3 (1911) is concerned with the concept of taboo, and its presence in all religious systems.

In this, the first book-length study of Cooper's life and work, Diarmuid Hester shows that such comparisons hardly scratch the surface. A lively retrospective appraisal of Cooper's fifty-year career, *Wrong* tracks the emergence of Cooper's singular style alongside his participation in a number of American subcultural movements like New York School poetry, punk rock, and radical queercore music and zines.

In the aftermath of a reality TV deal gone wrong, Fiona Alison Duncan asks the question, Can you rewrite your life? The answer, her debut novel *Exquisite Mariposa*, follows a cast of housemates as they navigate questions of art making and economies, breakups and breakdowns, and the internet and its many obsessions. Given the initials F.A.D. at birth, Fiona Alison Duncan has always had an eye for observing the trends around her. But after years of looking for answers in books and astrological charts and working as a celebrity journalist to make rent, Fiona discovers another way of existing: in the Real, a phenomenological state few humans live in. Fiona's journey to the Real takes her to Koreatown, Los Angeles, where she sublets a room in La Mariposa. There, in the aftermath of a reality TV deal gone wrong, Fiona asks the question, Can you rewrite your life? The answer, her debut novel, *Exquisite Mariposa*, follows a cast of friends and lovers as they navigate questions of art making and economies, breakups and breakdowns, and the Internet and its many obsessions.

For a long time studies on northern antiquarianism have focused on individual nations. This volume introduces this phenomenon in a transnational perspective. In the course of the 17th and 18th centuries, the Baltic Sea was at the centre of a culture of debate, whose networks encompassed numerous European centres of learning. When the countries around the Baltic began to explore their own antiquities in this period, the prevailing climate of competition between Sweden, Denmark, Russia and the German countries soon permeated the construction and presentation of their own pasts. Exploring the ancient literatures and monuments of Iceland, Sweden or Denmark, studying runic writings or the Sami tradition, the northern scholars were establishing an individual architecture of history, and so extending the horizon of their emerging nations both geographically and historically. The contributions in this volume provide case studies illustrating the role that scholarship, art and literature played in establishing and maintaining national claims around the Baltic Sea. The variety of methods combined for this purpose makes this book of interest to intellectual historians as well as historians of art and early modern science.

Since the early 1700s, women of Spanish/Mexican origin or descent have played a central, if often unacknowledged, role in Texas history. Tejanas have been community builders, political and religious leaders, founders of organizations, committed trade unionists, innovative educators, astute businesswomen, experienced professionals, and highly original artists. Giving their

achievements the recognition they have long deserved, this groundbreaking book is at once a general history and a celebration of Tejanas' contributions to Texas over three centuries. The authors have gathered and distilled a wide range of information to create this important resource. They offer one of the first detailed accounts of Tejanas' lives in the colonial period and from the Republic of Texas up to 1900. Drawing on the fuller documentation that exists for the twentieth century, they also examine many aspects of the modern Tejana experience, including Tejanas' contributions to education, business and the professions, faith and community, politics, and the arts. A large selection of photographs, a historical timeline, and profiles of fifty notable Tejanas complete the volume and assure its usefulness for a broad general audience, as well as for educators and historians.

The Solar System is a complex and fascinating dynamical system. This is the first textbook to describe comprehensively the dynamical features of the Solar System and to provide students with all the mathematical tools and physical models they need to understand how it works. It is a benchmark publication in the field of planetary dynamics and destined to become a classic. Clearly written and well illustrated, Solar System Dynamics shows how a basic knowledge of the two- and three-body problems and perturbation theory can be combined to understand features as diverse as the tidal heating of Jupiter's moon Io, the origin of the Kirkwood gaps in the asteroid belt, and the radial structure of Saturn's rings. Problems at the end of each chapter and a free Internet Mathematica® software package are provided. Solar System Dynamics provides an authoritative textbook for courses on planetary dynamics and celestial mechanics. It also equips students with the mathematical tools to tackle broader courses on dynamics, dynamical systems, applications of chaos theory and non-linear dynamics.

Based on more than a half century of research, Dr. Grof distills teachings from ancient wisdom and modern science that suggest how to face the process of death and dying. He proposes that those who come to terms with death through intense self-exploration tend to develop a reverence for life, in all its forms. Based on his own patients' experiences of death and rebirth in psychedelic-assisted therapy, he investigates cross-cultural beliefs about death, paranormal and near-death-experience research, and LSD therapy with advanced-stage cancer patients. The ultimate journey challenges us all, and how we approach death is much more than a major personal issue. Those who come to terms with death in deep experiential self-exploration tend to develop a sense of planetary citizenship, reverence for life in all its forms, and spirituality of a universal and all-encompassing nature. Such radical inner transformation might be humanity's only real chance for survival. The Ultimate Journey describes ancient and aboriginal ritual and spiritual practices that help us understand the experience of death, develop effective ways of making dying easier and integrate it as a meaningful part of life. This book also summarizes modern studies that shed new light on a variety of phenomena related to death and dying, including psycho-spiritual death and rebirth, near-death experiences, and the new expanded cartography of the psyche that has emerged from Grof's fifty years of research of

psychedelic therapy, Holotropic Breathwork, and spontaneous psychospiritual crisis. Grof writes that our modern industrial civilization typically gives more attention to the wardrobe, makeup, and even plastic surgery for the corpse than to counseling dying individuals and their families. This is in marked contrast to pre-industrial societies for whom death and dying were paramount in their worldviews and important inspiration for much of their art and architecture. For example, the shamans of many cultures-going back at least thirty thousand years, began their careers with a spontaneous or induced experience of death and rebirth. They explored, firsthand, territories of the psyche that transcend the boundaries of individual consciousness. Similarly, in the rites of passage, initiates were guided into non-ordinary or Holotropic ("moving toward wholeness") states of consciousness and had a direct experience of numinous realities that transcend biological death. In the ancient mysteries, neophytes participated in various mind-expanding processes or "technologies of the sacred" to move beyond individual consciousness and experience directly and firsthand the higher transpersonal dimensions of existence.
