The Pronunciation of English deals comprehensively with the English sounds, stress, rhythm, and intonation in a single volume. The description of English sounds is based on the sound classification and on the symbols used by Prof. Daniel Jones, a great authority on English phonetics. Our practice exercises are developed specifically for foreign learners of English. A sound is

practiced separately and in contrasts, moving from syllables and words in transcription to those in standard spelling, spelling forms, and sentences (with stress marked and intonation patterns shown by arrow point downward and arrow pointing upward). The pronunciation of words is in accordance with the Oxford Advanced Learner's Dictionary. Work through the book and you will receive a sound training in expressing meaning in English speech, will understand native speakers, and will be understood in a communication.

Key Features: · The twenty recorded lessons with worksheets are suitable for self-study (ideally with a computer) or group work with a teacher (in a language lab). · Each lesson is designed to last approximately 50 minutes. · The book is divided into four parts, addressing all major aspects of English pronunciation - rhythm and weak forms, word stress, spelling-pronunciation rules, intonation and linking. · The characteristic rhythm of English, an important but often neglected aspect of pronunciation, is dealt with right from the start, in the first three lessons. · Basic work on intonation is integrated into each lesson and then reviewed and expanded upon in the final two lessons. · Seven different native English speakers from England have been used for the recordings, representing standard, educated varieties of British English as spoken by people whose origins range from Bournemouth on the south coast to Carlisle near the Scottish border. · An innovative exercise design allows the

learner to evaluate his or her knowledge as the exercise is carried out. The learner is able to quickly assess which points he or she must continue to work on as well as which points he or she has mastered. · The exercises are varied and designed to promote active learning. · Brief musical interludes consisting of original recordings by clarinet and cello signal the beginning of each exercise.

However, even the large populations that are proficient in the vocabulary and grammar of English are not equally proficient in the pronunciation of the language. This adult population is the target audience of this book. Based on the RP (Received Pronunciation) model - the most widely understood English pronunciation across the world - this systematically organized and lucidly written text covers the entire range from sound to connected speech, i.e., dialogues, anecdotes, passages and short speeches. The book is in two parts: Part I deals with all important aspects of English pronunciation; Part II comprises a

pronouncing dictionary. Intended for adult learners of English, the book chiefly aims at remediation, and most of the practice materials and exercises are given with this end in view. Besides, with the help of numerous listening exercises, the course sharpens the learners' ability to comprehend spoken English with ease, thereby training them to face real-life situations (for example, interviews) with confidence and competence.

*Three Frameworks for an Integrated Approach* Lulu.com

This resource was produced as part of a DETYA project aimed at helping language teachers and workplace trainers working with adult migrant learners of English as a second language to increase their confidence on teaching pronunciation effectively. 'Teaching Pronunciation' seeks to provide detailed frameworks for teachers to use in working on pronunciation with a range of different ESL learners in a range of different types of situation. Attention is focused on two main issues: 1. The need to integrate work on pronunciation into other kinds of classes and training, as well as or instead of teaching pronunciation separately in dedicated classes 2. The need to offer assistance to those who need to teach pronunciation in workplace as well as in classroom contexts, since, increasingly, language tuition is part of

workplace training, where the situation and challenges are quite different from those of the traditional classroom context. In both these contexts, teachers need to be equipped to deal with a range of different types of learners, who in turn have a wide range of different needs and constraints. The frameworks outlined here are intended to offer flexible but effective principles and practices that teachers can adapt to their own particular circumstances. Contents: -Introduction -Background to the frameworks -Framework 1: Teaching beginners -Framework 2: Teaching more advanced learners -Framework 3: Teaching pronunciation in the workplace.
