Kreuzer Good Apple

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Penning by one of the most prominent motorcycle journalists of the 21st century, *Head Check* invites readers to take in the color and detail of a rider's life vividly realized, richly observed, and transcendently described. During his tenure at *Motorcyclist* magazine, Jack Lewis has touched readers around the world not only through his incandescent prose riffs and self-effacing humor, but also through a consistent and deeply felt humanity. This collection of magazine features and columns alongside personally published web pieces and new material may be populated by motorcycles, but it centers around the varied experiences of riders (and their tolerant keepers) in a world where risk is a bet you make with yourself for purposes that must always transcend mere recreation. *Head Check* is - beneath the sarcastic wit, wide-eyed fear, profound humility, and occasional descents into scatology - a collection of love stories. Recommended for riders, readers, passengers, and humans.
