**My Journey to the White House**

Sterling Publishing (NY)

ABOUT THE BOOK "Hundreds of millions of people buy fast food every day without giving it much thought, unaware of the subtle and not so subtle ramifications of their purchases. They rarely consider where this food came from, how it was made, what it is doing to the community around them. They just grab their tray off the counter, find a table, take a seat, unwrap the paper, and dig in. The whole experience is transitory and soon forgotten. I've written this book out of a belief that people should know what lies behind the shiny, happy surface of every fast food transaction. They should know what really lurks between those sesame-seed buns." Published in 2001, Eric Schlosser's *Fast Food Nation: The Dark Side of the All-American Meal* explores the dark underbelly of fast food production in the United States. An award-winning journalist and contributor to *Atlantic Monthly*, Schlosser developed the book from a series of articles for *Rolling Stone* magazine. *Rolling Stone* asked Schlosser to find out where fast food came from. As someone who enjoyed indulging in fries and hamburgers, Schlosser was initially reluctant to take on the assignment. As he began to research the history and formation of the fast food industry, he became increasingly curious about how the industry gained power and influence on America's agricultural landscape and food culture. With over 50 pages of research notes included at the end of the book, the author defends his points with

thorough analysis from various legal investigations, interviews, and journal articles. Schlosser artfully weaves sarcasm with gritty investigative journalism to demonstrate how corporations and greed have corrupted the food system in America. Schlosser's book was a *New York Times* bestseller for over two years and has sold over 1.4 million print copies. In 2006, *Fast Food Nation* became a fictionalized film directed by Richard Linklater, which was featured at the Cannes Film Festival. However, the book and film were not met without criticism from trade industry producers of beef, potatoes, and restaurant chains like McDonald's. The *Wall Street Journal* reported in 2006 that various organizations were trying to create campaigns against Schlosser's allegations in the book that fast food consumption contributes to obesity and fostered corruption in the nation's agricultural system. EXCERPT FROM THE BOOK The author playfully muses that, should America be attacked in the future, Cheyenne Mountain may be the only place with artifacts of our civilization - "Burger King wrappers, hardened crusts of Cheesy Bread, Barbeque Wings bones, and the red, white, and blue of a Domino's pizza box." What started as a small food stand in southern California has now spread all over the nation. Schlosser says fast food "has infiltrated every nook and cranny of American society." Shockingly, Americans spend more today on fast food than higher education, computers, or new cars. Schlosser estimates, "On any given day in the United States about one-quarter of the country's adult population visits a fast food restaurant." The author argues that the powerful rise of fast food industry happened quickly and "not only transformed the American diet, but also out landscape, economy, workforce, and popular culture." Importantly, Schlosser draws parallels between Cheyenne Mountain and today's fast food industry. **Franchise Opportunities Handbook** Houghton Mifflin Harcourt Solving the riddle of America's immigration puzzle, this text seeks to address the question of why an increasingly high-tech society has use for

so many immigrants who lack the basic skills that the modern economy seems to demand.

*A Practical Guide to Changing the World* Effective Security Officer's Training Manual Popular source selections that challenge and engage make *Improving Reading Skills* an ideal text for introductory developmental reading students. *A Canadian Perspective* Patagonia Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting "I feel happy! I feel terrific!" Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

**Franchising & Licensing** Butterworth-Heinemann

Zito has put together a powerful sociological and historical primer targeted to novices and the knowledgeable alike. Are the writers of texts sociologists or historians? How do you judge? How do you combine sociology and history in one text? Are there guidelines for writing a socio-historical work? This book answers these questions and others through a dynamic analysis of two current socio-historical texts. Dr. Zito surgically applies two standards: one sociological which lucidly defines and uses such concepts as ideal type, power or "macht," and social structure. Second, the historical approach defines and uses concepts such as periodization, historical imagination and the role of mathematical probability in the outcome of historical events. Zito's final chapter illuminates the strengths and weaknesses of both studies and arrives at revelatory conclusions.

The flourishing fast food industry represents one particular blueprint of how to live. Reiter analyses the profound consequences of this blueprint for many spheres of life: women's work, youth employment, the labour movement, the family, and the community. Since the 1970s young people and women have increasingly entered the job market in low

waged, service-sector jobs. Family life, she explains, has changed dramatically in the last forty years as many activities that were traditionally part of the home have been replaced by services available in the marketplace. The production of meals and those who produce them have moved from the family kitchen to the highly regulated corporate workplace where workers are like the interchangeable parts of a machine.
