Developed specifically to overcome problems with traditional standardized instruments, curriculum-based measurement (CBM) has steadily increased in educational use. These brief assessment probes of reading, spelling, written expression, and mathematics serve to quantify student performance as well as to enhance academic achievement. Their widening use as a means of evaluation and ultimately of instruction, has created a corresponding need to expand the applications of this methodology to diverse populations. This new volume addresses that need by focusing on the broader application of CBM, providing practical new measures, as well as detailing their use with specific student groups.

I'm guessing that those two are planning a surprise. . . . The author keeps mentioning the storm because she wants us to think that the character's upset. . . . Wait—yikes, I gotta go back and reread because I'm not getting this part. . . . These are the flickering thoughts of a strategic reader. If only we could bottle all these mental moves and pour them into the minds of our students, then readers' achievement would grow exponentially. In *Think Big With Think Alouds*, Molly Ness delivers a process that comes close to bottling that magic. Molly spent a year researching teachers' think alouds, and she uses these findings to help you know just what to do. The big time-saver? You focus on just these five strategies: asking questions, making inferences, synthesizing, understanding the author's purpose, and monitoring and clarifying. Select the one or two strategies that align to your text, and get ready with a stack of sticky notes! Grab a pencil, and you are on your way to dynamic lessons using Molly's three-step planning process: Read Once: Go wild, putting a flurry of sticky notes on spots that strike you Read Twice: Whittle your notes down to the juiciest stopping points Read Three Times: Jot down what you will say so there's no need to wing it in front of the kids Other practical tools include More than 20 ready-made think aloud scripts for favorite texts by Sandra Cisneros, Seymour Simon, Shel Silverstein, and many others, to use for think alouds for fiction, informational text, and poetry. Fun small group and partner activities to gradually transfer comprehension strategies to your students. She graduated Phi Beta Kappa from Johns Hopkins University and earned her PhD in reading education from the University of Virginia. A former Teach For America corps member, she is an experienced classroom teacher and reading clinician. Her numerous books and articles focus on reading comprehension, the instructional decisions of teachers, and the assessment and diagnosis of struggling readers.

This authoritative book looks at the consultation process as a collaborative, problem-solving endeavor designed to help practitioners assist others in their work with students who have, or are at risk for, behavioral or learning problems. With a focus on having consultants bridge the gap between research and practice in schools, and on striving to initiate evidence-based practices whenever possible, the authors stress providing interventions that are proportional to the student's needs. They look at how, through data-based systems-change, schools are redistributing their resources along MultiTiered Systems of Support (MTSS) so those in greatest need receive the most intensive help. The premise is that MTSS, which includes Response to Intervention (RTI) and School-Wide Positive Behavior Support (SWPBS) requires collaborative consultation to be successful. Throughout the book, numerous activities and video vignettes promote consultation skills. Readers not only read about conducting a problem-solving interview or managing a student in a crisis, they also observe and role-play the consultation skills involved in seeking a successful resolution. Happy picnic-goers headed for an employee outing across Lake Michigan suddenly found themselves in a struggle for their lives. Trapped belowdecks, crushed by the crowds attempting to escape the rising waters, or hurled into the river from the upper deck of the ship, roughly one-third of the passengers, mostly women and children, perished that day. The Eastland disaster took more passenger lives than the Titanic and stands today as the greatest loss of life on the Great Lakes.

Capsized! details the events leading up to the fateful day and provides a nail-biting, minute-by-minute account of the ship's capsizing. From the courage of the survivors to the despair of families who lost loved ones, author Patricia Sutton brings to light the stories of ordinary working people enduring the unthinkable. Capsized! also raises critical-thinking questions for young readers: Why do we know so much about the Titanic's sinking yet so little about the Eastland disaster? What causes a tragedy to be forgotten and left out of society's collective memory? And what lessons from this disaster might we be able to apply today?

This book explores what writing for pleasure means, and how it can be realised as a much-needed pedagogy whose aim is to develop children, young people, and their teachers as extraordinary and life-long writers. The approach described is grounded in what global research has long been telling us are the most effective ways of teaching writing and contains a description of the authors' own research project into what exceptional teachers of writing do that makes the difference. The authors describe ways of building communities of committed and successful writers who write with purpose, power, and pleasure, and they underline the importance of the affective aspects of writing teaching, including promoting in apprentice writers a sense of self-efficacy, agency, self-regulation, volition, motivation, and writer-identity. They define and discuss 14 research-informed principles which constitute a Writing for Pleasure pedagogy and show how they are applied by teachers in classroom practice. Case studies of outstanding teachers across the globe further illustrate what world-class writing teaching is. This ground-breaking text is essential reading for anyone who is concerned about the current status and nature of writing teaching in schools. The rich Writing for Pleasure pedagogy presented here is a radical new conception of what it means to teach young writers effectively today.

When it comes to parenting, sometimes you have to trust your gut. With her first book, *It's OK Not to Share*, Heather Shumaker overturned all the conventional rules of parenting with her "renegade rules" for raising competent and compassionate kids. In *It's Ok To Go Up the Slide*, Shumaker takes on new hot-button issues with renegade rules such as: - Recess Is A Right - It's Ok Not To Kiss Grandma - Ban Homework in Elementary School - Safety Second - Don't Force Participation Shumaker also offers broader guidance on how parents can control their own fears and move from an overscheduled life to one of more free play. Parenting can too often be reduced to shuttling kids between enrichment classes, but Shumaker challenges parents to reevaluate how they're spending their precious family time. This book helps parents help their kids develop important life skills in an age-appropriate way. Most important, parents must model these skills, whether it's technology use, confronting conflict, or coping emotionally with setbacks. Sometimes being a good parent means breaking all the rules.

Research evidence suggests that summer breaks contribute to income-based achievement and opportunity gaps for children and youth. However, summertime can also be used to provide programs that support an array of goals for children and youth, including improved academic achievement, physical health, mental health, social and emotional well-being, the acquisition of skills, and the development of interests. This report is intended to provide practitioners, policymakers, and funders current information about the effectiveness of summer programs designed for children and youth entering grades K-12.

Policymakers increasingly expect that the creation of and investment in summer programs will be based on research evidence. Notably, the 2015 Every Student Succeeds Act (ESSA) directs schools and districts to adopt programs that are supported by research evidence if those programs are funded by specific federal streams. Although summer programs can benefit children and youth who attend, not all programs result in improved outcomes. RAND researchers identified 43 summer programs with positive outcomes that met the top three tiers of ESSA's evidence standards. These programs were identified through an initial literature search of 3,671 citations and a full-text review of 1,360 documents and address academic learning, learning at home, social and emotional well-being, and employment and career outcomes. The authors summarize the evidence and provide detailed information on each of the 43 programs, focusing on the evidence linking summer programs with outcomes and classifying

the programs according to the top three evidence tiers (strong, moderate, or promising evidence) consistent with ESSA and subsequent federal regulatory guidance.

Reading fluency has been identified as a key component of proficient reading. Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement. Despite the great potential for fluency to have a significant outcome on students' reading achievement, it continues to be not well understood by teachers, school administrators and policy makers. The chapters in this volume examine reading fluency from a variety of perspectives. The initial chapter sketches the history of fluency as a literacy instruction component. Following chapters examine recent studies and approaches to reading fluency, followed by chapters that explore actual fluency instruction models and the impact of fluency instruction. Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention. Two articles on assessment, one focused on word recognition and the other on prosody, expand our understanding of fluency measurement. Finally, a study from Turkey explores the relationship of various reading competencies, including fluency, in an integrated model of reading. Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more integral part of all literacy instruction.
