Kid's Box is bursting with bright ideas to inspire you and your pupils! This six-level course gives children a confident start to learning English, and makes lessons a joy for teachers. Perfect for general use, Kid's Box also fully covers the syllabus of the Cambridge Young Learners English (YLE) tests. New language

is presented through amusing stories that your students will adore and practised with fantastic songs and activities, making the learning process a delight. Key language is continuously revised and recycled, helping to build children's confidence, and a focus on communicative activities ensures that children use the language they have learned in a fun, 'no-pressure' context. The loveable members of

the Star family will delight young learners, while an extensive range of supplementary materials provides the teacher with all the extra activities they need.

This book inspects higher education reform in market-oriented socialist Vietnam, with a focus on newness narratives and enquiry. Engaging in dialogic conversations with global and regional forces and exploring convergences in the domains of policy,

curriculum, research, pedagogy, and society, chapter authors analyse ideologies that have entered Vietnam's educational landscape. Chapters include discussions of post-Soviet legacies, socialist thought, privatization, neoliberalism, global rankings, academic freedom, autonomy, and elitism, as well as the actors, discourses and practices through which they manifest. In so doing, authors' commentaries juxtapose phenomena in Vietnam

with other national contexts such as the Philippines, Brunei Darussalam, Japan, Australia, and Trinidad and Tobago.

Game-based resources provide opportunities to consolidate and develop a greater knowledge and understanding of both mathematical concepts and numeracy skills, which present

opportunities and challenges for both teachers and learners when engaging with subject content. For learners for whom the language of instruction is not their first or main language, this can present challenges and barriers to their progress. This requires teachers to reconsider and adapt their teaching strategies to ensure the needs of these learners are fully addressed, thereby promoting inclusion and inclusive practices. The Handbook of Research on

International Approaches and Practices for Gamifying Mathematics provides relevant theoretical frameworks and the latest empirical research findings in teaching and learning mathematics in bilingual/plurilingual education by using active methodologies, specifically gamification and game-based learning and teaching. Covering a wide range of topics such as e-safety, bilingual education, and multimodal mathematics, this major reference work

is ideal for policymakers, researchers, academicians, practitioners, scholars, instructors, and students.

**Creativity and English Language Teaching**

MacMillan  
This book offers a unique perspective on creativity in an educational environment where there is a relative dearth of literature on this subject. The authors link practice

and principle to provide a practical and valuable guide for more creative language learning and teaching, using not only theoretical ideas but useful practical advice and recommendations on how better to introduce creativity into teaching and daily life. This innovative volume is sure to become a crucial reference point for teachers and practitioners of language teaching, and anyone interested in the ways in which creativity can be channelled into the teaching and learning

process.

**Guess What! Level 5 Pupil's Book British**

**English** Springer Nature  
This volume builds a conceptual basis for assessment promoting learning in Content and Language Integrated Learning (CLIL) classrooms and proposes practical assessment approaches and activities that CLIL teachers can apply in the classroom. CLIL as an educational context is unique, as language and content learning happen simultaneously. The

efficacy of such instruction has been studied extensively, but assessment in CLIL classrooms has drawn much less attention. The present volume aims to fill this gap. Arranged based on different ways that content and language are integrated in CLIL, the chapters in this book together build a solid theoretical basis for assessment promoting learning in CLIL classrooms. The authors discuss how assessment eliciting this integration yields insights into

learners' abilities, but more importantly, how these insights are used to promote learning. The contributors to the volume together build the understanding of classroom-based assessment as cyclic, of teaching, learning, and assessment as inter-related, and of content and language in CLIL classrooms as a dialectical unity. This volume will spark interest in and discussion of classroom-based assessment in CLIL among CLIL educators and

researchers, enable reflection of classroom assessment practices, and foster collaboration between CLIL teachers and researchers. The assessment approaches and activities discussed in the volume, in turn, will help educators understand the scope of applications of assessment and inspire them to adapt these to their own classrooms.

#### Discussions and More

Helbling

There have been a number of books published on various aspects of materials development for language teaching but *Developing Materials for Language Teaching* is the only one which provides a comprehensive coverage of the main aspects and issues in the field. This second edition brings it

completely up to date and expands on the original book. It deals with advances in IT and an increasingly globalized world. It is the only publication which views current developments in materials development through the eyes of developers and users of materials from all over the world. In doing so it applies principles to practice in ways demonstrated to facilitate the effectiveness of language learning materials. The chapters are written so that the

book provides critical overviews of recent developments in materials development and at the same time acts as a stimulus for development and innovation in the field. It is intended both for use as a course book on postgraduate and teacher training courses and as a resource for the stimulus and refreshment of teachers, publishers and applied linguists in the field. The book contains updated versions of many of the chapters in the 2003 edition plus new chapters on corpus-

informed materials development, materials development for blended learning, materials development for EAP, materials development for ESOL and materials development for young learners.

CLIL (Content and Language Integrated Learning) has emerged since the millennium as a major trend in education. Written by Do Coyle, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and English language schools across Europe, this book gives a comprehensive overview of CLIL. It summarises the theory which underpins the

teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all.
