The Archaeology Coursebook is an unrivalled guide to students studying archaeology for the first time. It will interest pre-university students and teachers as well as undergraduates and enthusiasts. Developing Effective Assessment In Higher Education: A Practical Guide Cambridge University Press OCR Psychology, Third Edition, is endorsed by

OCR for use with the OCR AS Psychology specification. This book prepares students for all elements of the OCR Psychology AS exam. It covers both research methods and core studies, giving the who, what, where, and even the why of each study. It also looks at some of the work that followed the studies. Key features of the book include: 'Psychological Investigations' : the first chapter of the book helps

students to understand research methods in psychology – useful support for the Psychological Investigations exam and for understanding the core studies themselves. Core Studies: each study is described first 'In a Nutshell', followed by a detailed account of the aims, method, results and conclusions. Guidance is given on how each study can be evaluated and a wealth of extra materials is

provided for each study – questions to assess understanding, practical activities, multiple choice and exam-style questions, further reading and video links. Background to each core study is included in the ‘Starters’ and ‘Afters’ features: information about related research before and after the study; and biographical details of the researcher(s). Approaches, perspectives,

issues and methods are considered in a brand-new chapter to cover the themes of the course and prepare students for the long-answer questions on the Core Studies exam. Exam guidance: each chapter ends with short- and long-answer exam-style questions answered by students with teacher feedback. The book is presented in colourful and well-structured

magazine-style spreads to aid the learning process. This 3rd edition has been completely revised, and is now accompanied by a companion website featuring an extensive range of online resources for both teachers and students, including answers to the questions posed in the book, glossary flash-cards, and multiple-choice test banks. This book provides a practical illustration of the skills, knowledge and understanding required to teach in the secondary classroom. As well as discussing

concepts and ideas, the book gives a critical examination of some of the key issues, and will encourage the reader to engage with the ideas and consider their views and beliefs. It is an invaluable resource for those who are learning to teach or for those teachers who wish to reflect on their teaching practice.

<p>Includes detailed "student eye" views from 2 students who increased their grades by 20 percentage points each between July 2012 and November 2012 using the 40 Box approach. Our unique approach is completely focused on the mark scheme and unlocks the secrets of a pass through a simplified and feasible approach which differs from the standard "4 Column</p>	<p>Planning Grid" endorsed by other providers. The text reflects the subtle but important shift in the mark scheme which began with the July 2012 Case Study but which is not yet fully reflected in the materials of some other providers. We explain in detail how the Executive Summary and other aspects of the Case mark scheme have now subtly shifted, requiring a slightly different approach to planning and</p>	<p>writing to ensure success. The book is aimed at both re-sit students and first timers who wish to ensure a pass. If you have found yourself failing Case several times without really knowing why (and whilst writing a report which you thought was good), this book is for you - we are careful at all times to highlight the difference between a good report and a good grade in Case.
