## HUNTER CARDENAS

International and Comparative Librarianship Harvard University Press

Based on his extensive experience in international librarianship, Peter Johan Lor, South Africa's first National Librarian and a former Secretary General of the IFLA, has written the first comprehensive and systematic overview of international and comparative librarianship. His book provides a conceptual framework and methodological guidelines for the field and covers the full range of international relations among libraries and information services, with particular attention to the international political economy of information, the international diffusion of innovations and policy in library and information services, LIS development and international aid. It concludes with a discussion of the practical relevance and future of international and comparative studies in LIS. See a short interview with Peter Lor on his work <https://www.ifla.org/node/92590>

Readings for a History of Anthropological Theory, Fifth Edition Routledge

Innovation - the process of obtaining, understanding, applying, transforming, managing and transferring knowledge - is a result of human collaboration, but it has become an increasingly complex process, with a growing number of interacting parties involved. Lack of innovation is not necessarily caused by lack of technology or lack of will to innovate, but often by social and cultural forces that jeopardize the cognitive processes and prevent potential innovation. This book focuses on the rule of social capital in the process of innovation: the social networks and the norms; values and attitudes (such as trust) of the actors; social capital as both bonding and bridging links between actors; and social capital as a feature at all spatial levels, from the single inventor to the transnational corporation. Contributors from a wide variety of countries and disciplines explore the cultural framework of innovation through empirics, case studies and examination of conceptual and methodological dilemmas.

Beyond Aid University of Texas Press

Traditionally, oral traditions were considered to diffuse only orally, outside the influence of literature and other printed media. Eventually, more attention was given to interaction between literacy and orality, but it is only recently that oral tradition has come to be seen as a modern construct both conceptually and in terms of accessibility. Oral traditions cannot be studied independently from the culture of writing and reading. Lately, a new interdisciplinary interest has risen to study interconnections between oral tradition and book culture. In addition to the use and dissemination of

printed books, newspapers etc., book culture denotes manuscript media and the circulation of written documents of oral tradition in and through the archive, into published collections. Book culture also intertwines the process of framing and defining oral genres with literary interests and ideologies. In addition to writing and reading, the study of oral traditions must also take into consideration the culture of publishing. The present volume highlights varied and selected aspects of the expanding field of research into oral tradition and book culture. The questions discussed include the following: How have printing and book publishing set terms for oral tradition scholarship? How have the practices of reading affected the circulation of oral traditions? Which books and publishing projects have played a key role in this and how? How have the written representations of oral traditions, as well as the roles of editors and publishers, introduced authorship to materials customarily regarded as anonymous and collective? The editors represent some of the key institutions in the study of oral traditions in Finland: the University of Helsinki, the Finnish Literature Society, and the University of Eastern Finland. The authors are folklorists, anthropologists, historians and literary historians, and scholars in information studies from Finland, Sweden, Norway, Ireland, and the United States.

China and Africa in Global Context Bloomsbury Publishing USA

The Routledge Companion to Advertising and Promotional Culture provides an essential guide to the key issues, methodologies, concepts, debates, and policies that shape our everyday relationship with advertising. The book contains eight sections: Historical Perspectives considers the historical roots and their relationship to recent changes of contemporary advertising and promotional practice. Political Economy examines how market forces, corporate ownership, and government policies shape the advertising and media promotion environment. Globalization presents work on advertising and marketing as a global, intercultural, and transnational practice. Audiences as Labor, Consumers, Interpreters, Fans introduces how people construct promotional meaning and are constructed as consumers, markets, and labor by advertising forces. Identities analyzes the ways that advertising constructs images and definitions of groups -- such as gender, race and the child -- through industry labor practices, marketing, as well as through representation in advertising texts. Social Institutions looks at the pervasiveness of advertising strategies in different social domains, including politics, music, housing, and education. Everyday Life highlights how a promotional ethos and advertising initiatives pervade self image, values, and relationships. The Environment interrogates advertising's relationship to environmental issues, the promotional efforts of corporations to construct green images, and mass consumption's relationship to material waste. With chapters written by leading

international scholars working at the intersections of media studies and advertising studies, this book is a go-to source for those looking to understand the ways advertising has shaped consumer culture, in the past and present.

**Life Without Lawyers** University of Toronto Press

Family Life, Family Law, and Family Justice: Tying the Knot combines history, social science, and legal analysis to chart the evolution and interdependence of family life and family law, portray current trends in family life, explain the pressing policy challenges these trends have produced, and analyze the changes in family law that are essential to meeting these challenges. The challenges are large and pressing. Across the industrialized West, nonmarital birth, relational stress, multi-partner fertility, and relationship dissolution have increased, producing a dramatic rise in single parenthood, poverty, and childhood risk. This concentration of familial and economic risk accelerates socioeconomic inequality and retards intergenerational mobility. Although the divide is most pronounced in the United States, the same patterns now affect families throughout the Western world. Across the European Union, there are 9.2 million "lone" parents, and just under half of their families live in poverty. Tying the Knot demonstrates how today's family patterns are deeply rooted in long-standing, class-based differences in family life and explains why these class-based differences have accelerated. It explains how the values that guide family law development inevitably reflect the world in which families live and develops a new family law capable of meeting the needs of twenty-first century families. The book will be of considerable interest to family specialists from a number of fields, including law, demography, economics, history, political science, public health, social policy, and sociology.

**The New Sciences of Religion** Walter de Gruyter GmbH & Co KG

Performing a critical analysis of new scientific research on religious and spiritual phenomena, Grassie takes a two-staged phenomenological approach working from the 'outside in' and the 'bottom up' without privileging at the outset any religious traditions or philosophical assumptions.

**Human Values and Social Change** Wipf and Stock Publishers

Protestant evangelicalism has spread rapidly in Latin America at the same time that foreign corporations have taken hold of economies there. These concurrent developments have led some observers to view this religious movement as a means of melding converts into a disciplined work force for foreign capitalists rather than as a reflection of conscious individual choices made for a variety of personal, as well as economic, reasons. In this pioneering study, Elizabeth Brusco challenges such assumptions and explores the intra-household motivations for evangelical conversion in Colombia. She shows how the asceticism required of evangelicals (no drinking, smoking, or extramarital sexual relations are allowed) redirects male income back into the household, thereby raising the living standard of women and children. This benefit helps explain the appeal of evangelicalism for women and questions the traditional assumption that organized religion always disadvantages women. Brusco also demonstrates how evangelicalism appeals to men by offering an alternative to the more dysfunctional aspects of machismo. Case studies add a fascinating human dimension to her findings. With the challenges this book poses to conventional wisdom about economic, gender, and religious behavior, it will be important reading for a wide audience in anthropology, women's studies, economics, and religion. For all students of Latin

America, it offers thoughtful new perspectives on a major, grass-roots agent of social change.

**The Routledge Companion to Advertising and Promotional Culture** Basic Books

This authoritative collection offers a detailed overview of religious ideas, structures, and institutions in the making of Europe. Written by leading scholars in the field, it demonstrates the enduring presence of lived and institutionalised religion in the social networks of identity, policy, and power over two millennia of European history.

**Understanding Culture** Springer

Why do some countries' economies struggle to develop, even when they are the focus of so much research and international funding? While recognizing that the obstacles facing poor nations are many and complex, Rabie proposes that the roots of most obstacles are sociocultural; thus, sociocultural transformation and economic restructuring can only be successful when treated as interconnected, mutually beneficial objectives. A Theory of Sustainable Sociocultural and Economic Development outlines an innovative model capable of identifying the major obstacles hindering poor nations' development in general, and the sociocultural and political obstacles in particular, placing them in their proper historical contexts, and addressing them comprehensively.

**The Legitimacy of Truth** New Haven : Yale University Press

This book provides a framework for assessing China's extensive cyber espionage efforts and multi-decade modernization of its military, not only identifying the "what" but also addressing the "why" behind China's focus on establishing information dominance as a key component of its military efforts. China combines financial firepower—currently the world's second largest economy—with a clear intent of fielding a modern military capable of competing not only in the physical environments of land, sea, air, and outer space, but especially in the electromagnetic and cyber domains. This book makes extensive use of Chinese-language sources to provide policy-relevant insight into how the Chinese view the evolving relationship between information and future warfare as well as issues such as computer network warfare and electronic warfare. Written by an expert on Chinese military and security developments, this work taps materials the Chinese military uses to educate its own officers to explain the bigger-picture thinking that motivates Chinese cyber warfare. Readers will be able to place the key role of Chinese cyber operations in the overall context of how the Chinese military thinks future wars will be fought and grasp how Chinese computer network operations, including various hacking incidents, are part of a larger, different approach to warfare. The book's explanations of how the Chinese view information's growing role in warfare will benefit U.S. policymakers, while students in cyber security and Chinese studies will better understand how cyber and information threats work and the seriousness of the threat posed by China specifically.

**Overcoming Global Inequalities** Routledge

Since the first edition of this indispensable volume nearly a decade ago, great changes have taken place in the national and international legal and regulatory frameworks for geographical indications (GIs) systems for food products. Rather than limitation (designed to prevent the use of 'culture' for protectionist purposes), the preponderance now favours recognition of GIs, with enforcement directed at protection. While the World Trade Organization (WTO) and its Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) remain the multilateral legal benchmarks for GIs, the field has been assertively entered by the World Intellectual Property Organization (WIPO)

with the 2015 Geneva Act (which adds GIs to the Lisbon Agreement), national laws in key jurisdictions, and bilateral and proposed mega-regional trade agreements with provisions on food vastly more detailed than the relevant TRIPS articles. Still notable for its thorough exploration of the meaning of the TRIPS commitments, the second edition brings to its commentary and guidance a new perspective that takes the changed conditions fully into account. With no sacrifice of depth, the author covers a wide range of issues such as the following: • estimates of the value added by origin and tradition; • GIs as a tool for national and local development; • growing importance of the concepts heirloom, heritage, and local; • minimum standards of protection under TRIPS; • administration and policing of product characteristics; • procedures followed by the European Union, India, Japan and others; • applicable laws concerning labelling and unfair business practices; • traditional communal nature of GIs versus private property characterization; • significance of the WTO's Agreement on Technical Barriers to Trade; • administrative and procedural rules at WTO, regional, and national levels; • the role of the Codex Alimentarius; and • the role of the TRIPS Council. Given that experience and research have revealed the great financial and cultural value of GIs, this thoroughly updated detailed analysis and interpretation of current trends in food product regulation worldwide is of crucial importance to an adequate understanding of the trade rules that apply to the recognition, protection, and enforcement of GIs and competing names. It is sure to be of great value to those concerned with this specialized field, whether practitioners, food producers and traders, jurists, officials, policymakers, or academics.

*Try Common Sense: Replacing the Failed Ideologies of Right and Left* Oxford University Press  
Award-winning author Philip K. Howard lays out the blueprint for a new American society. In this brief and powerful book, Philip K. Howard attacks the failed ideologies of both parties and proposes a radical simplification of government to re-empower Americans in their daily choices. Nothing will make sense until people are free to roll up their sleeves and make things work. The first steps are to abandon the philosophy of correctness and our devotion to mindless compliance. Americans are a practical people. They want government to be practical. Washington can't do anything practically. Worse, its bureaucracy prevents Americans from doing what's sensible. Conservative bluster won't fix this problem. Liberal hand-wringing won't work either. Frustrated voters reach for extremist leaders, but they too get bogged down in the bureaucracy that has accumulated over the past century. Howard shows how America can push the reset button and create simpler frameworks focused on public goals where officials—prepare for the shock—are actually accountable for getting the job done.

*Who are We?* Rowman & Littlefield

This now-classic examination of the development of viable political institutions in emerging nations is a major and enduring contribution to modern political analysis. In a new Foreword, Francis Fukuyama assesses Huntington's achievement, examining the context of the book's original publication as well as its lasting importance. "This pioneering volume, examining as it does the relation between development and stability, is an interesting and exciting addition to the literature."-American Political Science Review "Must' reading for all those interested in comparative politics or in the study of development."-Dankwart A. Rustow, Journal of International Affairs

**Culture Matters** John Wiley & Sons

Russia's transition to a market economy has been tortuous to say the least. However, this book argues that the arguments and counter-arguments that pitch shock therapy against gradualism are wide of the mark and quite pointless. Indeed, the reasons for the warped outcomes can actually be traced back through the long sweep of Russian history. Decisions made in the distant past can fully influence policy-making in the present. Hedlund's thesis can, like this, be seen as influenced by the 'path dependency' theories of Paul David among others.

*Political and Military Sociology, an Annual Review* Springer

This book studies the relationship between China and Africa by reviewing this history and current state of interactions, offering a valuable addition to the often heated and contentious debate surrounding China's engagement in Africa from a Chinese angle. Comprising four parts, the book covers a kaleidoscopic range of topics on China-Africa relations based on materials from different languages. Part I looks into early historical contact between China and Africa and the historiography of African Studies in China in recent decades. Part II probes the origins, dynamics, challenges and cultural heritage of China's policies towards Africa. Part III explores the issue of development cooperation from both a theoretical and a practical point of view, with a focus on the case of Chinese medical teams in Africa and China's technology transfer to the continent. Part IV illustrates bilateral migration, discussing the history and life of Chinese immigrants in Africa and the African diaspora in China. The insights in this book, as well as real life case studies, will make this work an indispensable reference for academics, students, policy-makers and general readers who are interested in international issues and area studies, especially China-Africa relations, China's rise and African development.

**Power, Politics and Confrontation in Eurasia** W. W. Norton & Company

Finding place and identity in a globalized world

**American Civil-Military Relations** Springer

Eden's Bridge: The Marketplace in Creation and Mission explores a biblically based theology of the marketplace implicit in the creation narrative of Genesis 1-2. The thesis validates the calling and ministry of all marketplace Christians. David Doty invites readers to rethink and redirect the purposes of vocation, trade, and profit toward the purposes of God's Kingdom, as they were revealed in the beginning and are to be restored in Christ's reign. This book is eye-opening and inviting as it explores how God is moving to reclaim the marketplace for His Kingdom, and His redeeming purposes for the world of commerce. The marketplace holds untold potential if business is conducted according to God's plan: poverty can be eradicated, abundant living can be shared among all people, and shalom can prevail. Eden's Bridge offers hope for recovering from the recent collapse of the global economic system by envisioning a new view of how wealth is made and how the marketplace is yet to serve God's purposes in His mission to the world.

*Citizen Support for Democratic and Autocratic Regimes* Routledge

This book combines the two most important typologies of capitalist diversity; Esping-Andersen's welfare regime typology and Hall and Soskice's 'Varieties of Capitalism' typology, into a unified typology of capitalist diversity. The author shows empirically that certain welfare states bundle together with certain production systems.

*Five Minutes a Day Dream-Action Path* W. W. Norton & Company

Prominent scholars and journalists ponder the question of why, at the beginning of the twenty-first century, the world is more divided than ever between the rich and the poor, between those living in freedom and those under oppression.

[Political Order in Changing Societies](#) JHU Press

America was founded by settlers who brought with them a distinct culture including the English language, Protestant values, individualism, religious commitment, and respect for law. The waves of

later immigrants came gradually accepted these values and assimilated into America's Anglo-Protestant culture. More recently, however, national identity has been eroded by the problems of assimilating massive numbers of immigrants, bilingualism, multiculturalism, the devaluation of citizenship, and the "denationalization" of American élites. September 11 brought a revival of American patriotism, but already there are signs that this is fading. This book shows the need for us to reassert the core values that make us Americans.--From publisher description.
