Quest Second Edition parallels and accelerates the process native-speaking students go through when they prepare for success in a variety of academic subjects. Quest helps students get "up to speed" in terms of both academic content and language skills. The four Reading and Writing books in the Quest series combine high-interest material from newspapers and magazines with readings from academic textbooks. The Reading and Writing strand includes three to four distinct units, each focusing on a different area of university study - anthropology, art, biology, business, ecology, economics, history, literature, psychology, and sociology. Each chapter contains five parts that blend reading and writing skills within the context of a particular academic area of study. Introduction General Interest Reading Academic Reading The Mechanics of Writing Academic Writing Reading and activities build upon one another and increase in length and difficulty as students work through the five sections of each chapter across the four levels. This is the intermediate to high intermediate student book.

Interactions: A Thematic Reader is designed to help students discover meaning in what they read and to convey meaning in what they write. The text's readings and accompanying apparatus--which have been class tested and proven effective through six previous editions--guide students from a consideration of self to an awareness of how the self interacts with other people and phenomena. The book explains to students the process and interdependence of reading and writing, stressing the connections students can make between their own experiences and what they read. It also introduces them to prewriting techniques such as freewriting, brainstorming, mapping, clustering, and journals. The Seventh Edition includes approximately ninety reading selections,

about one-third of which are new. Selections are organized into thematic units that guide students from a consideration of self to an examination of close human relationships and finally to more abstract topics such as work and society. The selections represent a wide range of voices, topics, and sources, including a balance of male and female authors and significant contributions by culturally diverse writers. This diversity allows students both to encounter new voices and to identify with familiar ones. The readings also provide students with effective models and styles of writing.

Academic Interactions focuses on actual academic speaking events, particularly classroom interactions and office hours, and gives students practice improving the ways that they communicate in a college/university setting. Academic Interactions addresses skills like using names and names of locations correctly on campus, giving

directions, understanding instructors and their expectations, interacting during office hours, participating in class and in seminars, and delivering formal and informal presentations. In addition, advice is provided for communicating via email with professors and working in groups with native speakers (including negotiating tasks in groups). The text uses transcripts from MICASE (the Michigan Corpus of Academic Spoken English) to ensure that students learn the vocabulary and communication strategies that will be most effective in their academic pursuits. Units also feature language use issues like ellipsis, hedging, and apologies.

Why do engineers "report" while philosophers "argue" and biologists "describe"? In the Michigan Classics Edition of *Disciplinary Discourses: Social Interactions in Academic Writing*, Ken Hyland examines the relationships between the cultures of academic communities and their unique discourses. Drawing on discourse analysis, corpus linguistics, and the voices of professional insiders, Ken Hyland explores how academics use language to organize their professional lives, carry out intellectual tasks, and reach agreement on what will count as knowledge. In addition, *Disciplinary Discourses* presents a useful framework for understanding the interactions between writers and their readers in published academic writing. From this framework, Hyland provides practical teaching suggestions and points out opportunities for further research within the subject area. As issues of linguistic and rhetorical expression of disciplinary conventions are becoming more central to teachers, students, and researchers, the careful analysis and straightforward style of *Disciplinary Discourses* make it a remarkable asset. The Michigan Classics Edition features a new preface by the author and a new foreword by John M. Swales.

For undergraduates following any course of study, it is essential to develop the ability to write effectively. Yet the processes by which students become more capable and ready to meet the challenges of writing for employers, the wider public, and their own purposes remain largely invisible. *Developing Writers in Higher Education* shows how learning to write for various purposes in multiple disciplines leads college students to new levels of competence. This volume draws on an in-depth study of the writing and experiences of 169 University of Michigan undergraduates, using statistical analysis of 322 surveys, qualitative analysis of 131 interviews, use of corpus linguistics on 94 electronic portfolios and 2,406 pieces of student writing, and case studies of individual students to trace the multiple paths taken by student writers. Topics include student writers' interaction with feedback; perceptions of genre; the role of disciplinary writing; generality and certainty in student writing; students' concepts of voice and style; students' understanding of multimodal and digital writing; high school's influence on college writers; and writing development after college. The digital edition offers samples of student writing, electronic portfolios produced by student writers, transcripts of interviews with students, and explanations of some of the analysis conducted by the contributors. This is an important book for researchers and graduate students in multiple fields. Those in writing studies get an overview of other longitudinal studies as well as key questions currently circulating. For linguists, it demonstrates how corpus linguistics can inform writing studies. Scholars in higher education will gain a new perspective on college student development. The book also adds to current understandings of sociocultural theories of literacy and offers prospective teachers insights into how students learn to write. Finally, for high school teachers, this volume will answer questions about college writing.
