WEAVER MCMAHON

OCR A Level History: England 1485-1603 Philip Allan

This is a clear and concise guide to key practical legal skills: interviewing, advising, negotiating, letter writing and advocacy. This revised and updated edition of Practical Legal Skills provides more detailed coverage of advocacy and negotiation skills and has a strong commercial emphasis with the addition of a number of commercially focused exercises and examples. The expanded content maintains all the features of the original edition and meets the practice needs of lawyers in large commercial firms. The broad ethical issues arising from commercial practice are described and discussed.

Instant Notes in Biochemistry Hodder Education

Exam Board: OCR Level: A-level Subject: History First Teaching: September 2015 First Exam: June 2016 This is an OCR endorsed resource Build strong subject knowledge and skills in A Level History using the in-depth analysis and structured support in this tailor-made series for OCR's British period studies and enquiries. - Develops the analytical skills required to succeed in the period study by organising the narrative content around the key issues for students to explore - Enhances understanding of the chosen historical period, supplying a wealth of extracts and sources that offer opportunities to practise the evaluative skills needed for the enquiry - Progressively improves study skills through developmental activities and advice on answering practice exam questions - Helps students to review, revise and reflect on the course material through chapter summaries and revision activities that consolidate topic knowledge - Equips students with transferable critical thinking skills, presenting contrasting academic opinions that encourage A Level historians to make informed judgements on major debates Each title in the OCR A Level History series contains one or two British period studies and its associated enquiry, providing complete support for every option in Unit Group 1. England 1485-1603 This title explores the reigns of the Tudor monarchs from Henry VII to Elizabeth I through two British period studies and one enquiry. It allows an in-depth understanding of the key historical knowledge, terms and concepts relevant to the period studied and encourages the critical use of evidence in investigating and assessing historical questions in the associated enquiry: 'Mid Tudor Crises 1547-1558'. This title covers the following period studies and enquiry: - England 1485-1547 - Mid Tudor Crises 1547-1558 - Elizabethan England

Contracting for Public Services Addison-Wesley

The I. Beritashvili Center of Experimental Biomedicine was established in 2010 on the basis of merging four well-known Georgian research institutes. They are: The I. Beritashvili Institute of Physiology, one of the most prominent research centers of Georgia, where basic and applied research in different fields of neurophysiology has been conducted since 1935; the Institute of Molecular Biology and Biophysics; the Center for Radiology and Radiation Ecology, which for many years operated as departments at the I. Beritashvili Institute of Physiology; and one of the leading research centers for Georgia: The Center of Experimental Neurology. This edited book is the second volume containing chapters constituting the research priorities of the I. Beritashvili Center of Experimental Biomedicine and covers the experimental study of fundamental issues in the functioning of physiological (mainly, neurophysiological) mechanisms during normal and pathological conditions. The first book Cellular and

Molecular Mechanisms of Physiological Functions and Their Disorders published by Nova Science Publishers Inc. in 2015, was also devoted to the same general problems. In the present edited book, particular attention is drawn to the study of extremely important processes underlying the basic mechanisms and disorders of various phenomenon of integrative activity of the brain: General behavior, learning and memory processes, the sleep-wakefulness cycle, regulation of adequate blood supply, hormesis, vision, depression, experimental comatose state, epilepsy, tumor diseases, pain and analgesia, the state of anxiety and aggression. All of the mentioned processes are studied on the molecular, cellular and systemic levels of their organization. It has to be noted herewith that each chapter within the collection of works represents the results of separate, independent studies implemented by different scientific departments of the Center; therefore, the chapters are not directly related to each other and have been arranged alphabetically based on the surnames of the authors. The authors would like to take this opportunity and present to the reader the scientific and institutional infrastructure of the Center, which consists of departments and laboratories. Nowadays, the Center is comprised of seven departments: Neurophysiology, Membranology, Biochemistry, Blood Circulation and Metabolism, Neurotoxicology, Biophysics and Radiobiology and nine laboratories: Behavior and Cognitive Functions, Physiology of Vision, Neurobiology of Sleep-Wakefulness Cycle, Ultra- and Nanoarchitectonics of the Brain, Experimental Neurology, Pain and Analgesia, Bioinformatics, Structure and Function of Genomes, and the Problems of Radiation Safety. In addition to bilateral scientific cooperation with many famous European and American scientific institutions, the Center is a member of the International Science Consortium From Molecular to Cellular Events in Human Pathologies, of which the 2015 Annual Meeting was held in Tbilisi. The authors are sure that readers are fully aware of the theoretical and practical importance of the research related to problems of systemic, cellular and molecular mechanisms of physiological functions and their disorders. The presented collection of works contains the results of relevant research conducted over the last three years (2015-2018). The authors will be very grateful for any feedback, recommendations and suggestions regarding their research for the implementation of which they have invested a lot of effort, time, knowledge and experience.

Financial Accounting for Decision Makers Level 3 BTEC National Business

This Student Book supports the Edexcel BTEC Level 3 National Health and Social Care qualification for the 2010 QCF specification.

Student Edition Glencoe/McGraw-Hill School Publishing Company
This co-edited volume addresses a population of people whose lack of health care access, mistreatment in health care settings, and refusal of health care services are often omitted from discussions about health care disparities and insurance reform. The perspectives and needs of LGBT people should be routinely considered in public health efforts to improve the overall health of every person and eliminate health disparities. Previous research suggests that LGBT people experience worse health outcomes than their heterosexual counterparts. Differences in sexual behavior account for some of these disparities, but others are associated with social and structural inequities. Low rates of health insurance coverage, high rates of stress due to systematic harassment, stigma, and discrimination, and a lack of cultural competency in the health care system frequently manifest in negative health-related behaviors. The lack of data collection on sexual orientation and identity in state and federal health care surveys leads to inadequate information about LGBT populations and impedes the establishment of health programs and public policies that benefit them. This volume's research will increase people's understanding of the social and structural inequalities that LGBT populations experience. With its diverse perspectives, this book will not only benefit LGBT people, but will also more broadly improve the lives of entire communities, medical care, and prevention programs and services. Improvements to our country's health care system should go beyond providing universal insurance and should ensure equitable health care for all.

Cambridge International A and AS Level Geography Revision Guide ePub Routledge

This is a complete learning package for the 2011 specifications supporting both students and tutors to get the best results.
