Exploring the connection between culture and broader goals of human development, this research focuses on cultural and creative industries in what is commonly referred to as 'developing countries'. Christiaan De Beukelaer offers a thorough exploration of how the concepts of cultural and creative industries are constructed and implemented across African countries and evaluates various policy implications of his findings. Combining an empirical study of the cultural industries of Africa with an understanding towards broader insights regarding global implications of the European debate surrounding creative industries, De Beukelaer's work will greatly benefit our thinking on cultural policy.

Modernism at the Microphone SAGE

For generations, fans and critics have characterized classic American radio drama as a "theater of the mind." This book unpacks that characterization by recasting the radio play as an aesthetic object within its unique historical context. In *Theater of the Mind*, Neil Verma applies an array of critical methods to more than six thousand recordings to produce a vivid new account of radio drama from the Depression to the Cold War. In this sweeping exploration of dramatic conventions, Verma investigates legendary dramas by the likes of Norman Corwin, Lucille Fletcher, and Wyllis Cooper

on key programs ranging from *The Columbia Workshop*, *The Mercury Theater on the Air*, and *Cavalcade of America* to *Lights Out!*, *Suspense*, and *Dragnet* to reveal how these programs promoted and evolved a series of models of the imagination. With close readings of individual sound effects and charts of broad trends among formats, Verma not only gives us a new account of the most flourishing form of genre fiction in the mid-twentieth century but also presents a powerful case for the central place of the aesthetics of sound in the history of modern experience.
