This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures

through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in

the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

L'ouverture d'un chantier de construction devant ses fenêtres incite le narrateur de *En chantier* à se remettre à son travail de romancier. L'écriture redevient possible et progresse alors au même rythme que le chantier. Jour après jour, avec une régularité obstinée, et une fascination bientôt obsessionnelle. D'un côté un homme qui vit seul, reçoit son fils adolescent une fin de semaine sur deux, et parfois une amante fugitive ; de l'autre, des ouvriers qui travaillent ensemble, exposés aux quatre vents, avec des machines, des camions, et une énergie physique et virile. Au fil du temps, l'écrivain entretient un dialogue

imaginaire avec les hommes du chantier, qui deviennent son unique horizon, en installant sur son balcon un grand tableau sur lequel il note toutes sortes d'informations, jusqu'aux résultats du tour de France dont il les informe étape par étape... Et c'est cette relation impossible entre ces êtres qui, chacun dans leur domaine, construisent une oeuvre, qui donne à ce roman très original toute sa densité. Quand le romancier est contraint d'abandonner son poste d'observation pour partir en vacances avec son fils et pêcher dans les lacs de Haute-Loire, l'écrivain devient alors pleinement un père. Se joue ici une autre relation, celle d'un père avec son garçon, qui s'invente dans une nature et une façon de vivre au plus dépouillé, mais aussi au plus profond. D'une écriture précise, directe et très fluide, *En chantier* est un roman qui interroge ce qui sépare ou unit les hommes, questionne la place du masculin et dit l'impossibilité de communiquer entre différents mondes, dans une société contemporaine rongée par l'enfermement. En plus d'un humour discret, un vrai suspense s'installe au fil des pages habilement construites, puisque la fin du

chantier approche et qu'on se demande comment le narrateur-écrivain va supporter l'idée de réintégrer une vie de solitude.

It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses

many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the European Journal of Social Work.

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also

believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

This is a brilliant examination of the complex processes of the post-1990 transformation in the Czech automotive industry and its selective integration into the West European system. The post-1990 restructuring of the industry is analyzed in the context of its pre-1990 development and in the context of the East European

automobile industry as a whole. Specifically, the book examines the development and post-1990 restructuring of the Czech car, components, and truck industries.

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly

titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).
