Das grundlegende Werk von Darwin On the Origin of Species liegt hier in der originalen Übersetzung durch Julius Victor Carus vor, erweitert durch zahlreiche Erläuterungen, aussagekräftige Abbildungen sowie wichtige historische Bezüge. Die Entstehung der Arten von Darwin ist für die heutige Leserschaft häufig schwierig zu verstehen. Eine hilfreiche Unterstützung erfolgt durch die farbliche Hervorhebung entscheidender Textstellen und viele fachliche Erklärungen. Darwins Analysen und Bewertungen aus den Gebieten der Botanik, Zoologie, Verhaltenslehre, Paläontologie und Entwicklungsbiologie werden in acht Beiträgen namhafter Fachwissenschaftler im Licht der gegenwärtigen Forschung beleuchtet und so wird erst die ungeheure Bedeutung und Weitsicht seines Werkes offensichtlich. Endlich liegen jetzt die Übersetzungen der beiden ebenso bahnbrechenden Aufsätze von Alfred Russel Wallace vor: der Sarawak- und Ternate-Essay. Wallace war neben Darwin der bedeutendste Evolutionsforscher seiner Zeit. Seine Arbeiten zur Evolutionsbiologie, die im Angelsächsischen hoch geschätzt sind, können als durchaus gleichrangig zu Darwins berühmtester Schrift angesehen werden. Ulrich Kutschera eröffnet das Buch mit einem Geleitwort und Reinhold Leinfelder schließt es mit einem Ausblick zur Bedeutung der Evolutionstheorie für die Zukunft des Menschen ab. Das Buch ist daher nicht nur eine unverzichtbare Lernhilfe für Schüler und Studenten, die sich mit der Evolutionsbiologie beschäftigen, sondern zusätzlich auch eine spannende weiterführende Lektüre für alle Leser mit Interesse an Wissenschaftsgeschichte.

This book examines the organizational change of the wind sector in the course of product and

value chain modularization. The methodology developed here analyzes modularization using standardized variables, and allows a classification of value chains at company and component levels. Necessary adaptation and learning processes change externalities and location requirements, which leads to a reorganization of relationships between components-as well as companies-and creates an organizational discontinuity. This leads ultimately to a new spatial configuration of the industry and its value chains. The author works as Export Advisor for Wind Energy at the Consulate General of Denmark in Hamburg. Dissertation. (Series: Geography / Geographie, Vol. 26) [Subject: Energy Studies, Organizational Change, Business & Management, Economics]
