From the #1 New York Times bestselling author of *The 48 Laws of Power* comes the definitive new book on decoding the behavior of the people around you Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense.

Its a troubled world we live in. It was meant to be utopia, yet we are busy messing it up. At all levels of government we seem to do our best to throw a monkey wrench at the system we devised for our good, not our own hurt. The legislators are ever busy opposing each other, yet expect to run the day-to-day affairs smoothly. The American fathers of the constitution chose the least of evil of all forms of government, but the element of human nature seems to make it, at best, a dysfunctional system on many levels. Without an agreed upon system of values, accepted by all members of society, its impossible to run a smooth government as it is prerequisite for the function of life. Since education is the basis that determines the outcome of life, we shall concentrate on this dimension that leads to either success or failure in all areas. To begin our search for the causes that create a utopian society, we shall address first roll of the parents, especially the mother, in the success or failure of a human beings. Next, we shall go to the school system the surrogate parent and examine its roll in molding the young plants our children. Finally, we shall address the roll of the society at large. In these three areas we shall find the causes of success and failures of life. Then, we shall proceed to the solutions that will insure the way to success in all areas the dreamed of utopia. Utopia is possible! We dont have to be ridden with the ills of society, with crime, with violence, with wars, with political corruption. In the beginning it was not so, in the end it can, and will, be different if we are willing to submit to the process of re-education, all is possible.

First developed twenty years ago by Vianna Stibal, ThetaHealing is essentially applied quantum physics. Using a theta brain wave, which until now was believed to be accessible only in deep sleep or yogi-level meditation, the practitioner is able to connect with the energy of All That Is - the energy in everything - to witness healings of the physical body, and to identify and change limiting beliefs. This book is for those who have already started to experience the magic of this energy healing modality, and wish to deepen their understanding of the Seven Planes of Existence - the philosophy behind the creation of ThetaHealing. Vianna presents exciting new information to help you take your skill with this work to the next level, and brings the reader into dimensions that she believes to be the beginnings of life itself, on a journey that leads outward, past the universe, to transform beliefs, showing that with a theta state of mind it is possible to connect to a Divine Energy before it becomes anything in this universe.
