This volume covers the language situation in Hong Kong, Timor-Leste and Sri Lanka explaining the linguistic diversity, the historical and political contexts and the current language situation, including language-in-education planning, the role of the media, the role of religion and the roles of non-indigenous languages. Two of the authors are indigenou to the situations described while the other has undertaken extensive field work and consulting there. The three monographs contained in this volume draw together the literature on each of the polities to present an overview of the research available about each of them, while providing new research-based information. The purpose of the volume is to provide an up-to-date overview of the language situation in each polity based on a series of key questions in the hope that this might facilitate the development of a richer theory to guide language policy and planning in other polities where similar issues may arise. This book was published as special issues of Current Issues in Language Planning. *Dictionary of Languages* Essential 18000 Medical Words Dictionary In English-Sinhala This invaluable interpretive tool, first published in 1937, is now available for the first time in a paperback edition specially aimed at students of Chinese Buddhism. Those who have endeavoured to read Chinese texts apart from the apprehension of a Sanskrit background have generally made a fallacious interpretation, for the Buddhist canon is basically translation, or analogous to translation. In consequence, a large number of terms existing are employed approximately to connote imported ideas, as the various Chinese translators understood those ideas. Various translators invented different terms; and, even when the same term was finally adopted, its connotation varied, sometimes widely, from the Chinese term of phrase as normally used by the Chinese. For instance, klésa undoubtedly has a meaning in Sanskrit similar to that of, i.e. affliction, distress, trouble. In Buddhism affliction (or, as it may be understood from Chinese, the afflicters, distressers, troublers) means passions and illusions; and consequently fan-nao in Buddhist phraseology has acquired this technical connotation of the passions and illusions. Many terms of a similar character are noted in the body of this work. Consequent partly on this use of ordinary terms, even a well-educated Chinese without a knowledge of the technical equivalent finds himself unable to understand their implications.

With the intrigue of a psychological thriller, Camus's masterpiece gives us the story of an ordinary man unwittingly drawn into a senseless murder on an Algerian beach. Behind the intrigue, Camus explores what he termed "the nakedness of man faced with the absurd" and describes the condition of reckless alienation and spiritual exhaustion that characterized so much of twentieth-

century life. First published in 1946; now in translation by Matthew Ward.
