Fundamentals of Nursing Elsevier

The fully updated second edition of Foundations of Nursing gives you all the information you need to successfully complete your nursing curriculum. This single volume includes comprehensive, fundamental content in basic nursing, adult health nursing, and maternal and pediatric nursing. Introductory content covers such topics as the health care

system, communication, nursing processes, and client teaching. Current topics such as HIPAA, West Nile Virus, SARS, and bioterrorism are also discussed. The adult health nursing section is written following the Nursing Process format. The clinical chapters have been revised to include Nursing Management sections for each disorder, emphasizing the nurse's role in providing competent client care. Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) have been identified in each Nursing Care Plan. A Case Study included in each

chapter uses critical thinking questions to assist the user through the nursing process and to develop a customized plan of care for the client in the scenario. The maternal and pediatric section covers topics such as prenatal care, complications of pregnancy, birth, postpartum care, and newborn care. Childrearing is covered from birth through 18 years of age.

**Clinical Skills** Elsevier Health Sciences There's a new fundamentals text in town. One that centers on simple language, active learning, and a fresh new way to help you truly understand, apply, and retain important nursing information and concepts. Introducing the brand new Fundamentals of Nursing text from Yoost and Crawford. Written in a warm and

conversational style, this innovative text starts by guiding you towards a basic understanding of the nursing profession and then logically progresses through the nursing process and into the safe and systematic methods of applying care. Each chapter features realistic case studies and critical thinking exercises woven throughout the content to help you continually apply what you've learned to actual patient care. Conceptual care maps further your ability to make clinical judgments and synthesize knowledge as you develop plans of care after analyzing and clustering related patient assessment data. All of this paired with a wealth of student-friendly learning features and clinically-focused content offers up a fundamentally different - and quite effective - way for you to easily master the fundamentals of nursing. UNIQUE! Active learning approach centers on case studies and critical thinking exercises that are woven throughout each chapter to ensure readers are able to apply chapter content to broader nursing concepts and realistic patient scenarios. UNIQUE! Simple to complex progression of information starts by guiding readers towards a basic

understanding of the nursing profession and then logically progressing through the nursing process and into the safe and systematic methods of applying care. UNIQUE! Warm, conversational style devoid of repetitive discussions and unnecessary information slows down the pace of information to give readers time to critically think and master all fundamental concepts and skills. UNIQUE! Conceptual care maps require readers to develop a plan of care after analyzing and clustering related patient assessment data. This unique learning tool assists readers in recognizing the importance of each type of assessment data and furthers your ability to make clinical judgments and synthesize knowledge about the whole patient. Learning objectives carried throughout the chapter features the objective being showcased at the start of the chapter, tied to headings throughout the chapter, and once again reinforced at the close of the chapter. Nursing Skills sections provide information on the purpose, procedures, evidence-based practice, special circumstances, and more for a variety of important nursing skills - all supported by rationales, photos, and illustrations.

Nursing Care Guidelines highlight information (including background, procedural concerns, documentation concerns, and evidence-based practice) and resources to reduce risk and ensure safety for the patient and nurse. Diverse mix of clinically focused boxes are incorporated throughout each chapter. Collaboration and Delegation boxes stress the importance of effective and accurate communication between the healthcare team about a patient's condition and treatment, as well as the importance of assigning tasks appropriately. Ethical, Legal, and Professional Practice boxes address ethical and legal dilemmas commonly faced in nursing to prepare readers to act in a professional and nonjudgmental manner while protecting patient rights. Patient Education and Health Literacy boxes stress the importance of patient education and how to deliver information in an understandable manner based on the patient's level of health literacy. Health Assessment Questions boxes illustrate how to properly ask and use assessment questions while interviewing patients. Diversity Considerations boxes prepare

readers to care for and communicate with patients of diverse ages, gender, cultural, ethnic, and religious backgrounds as well as various disability and morphological characteristics. Evidence-Based Practice and Informatics boxes provide current research and resources that, combined with clinical expertise, will contribute to improved patient care outcomes. Home Care Consideration boxes highlight issues that pertain specifically to nursing practice in the non-acute care setting. Safe Practice Alert! boxes underscore significant patient safety concerns while providing information to insure both patient and nurse safety. QSEN Focus! boxes illustrate application of the six Quality and Safety Education for Nurses (QSEN) competencies for pre-licensure nursing students: patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics. Five-step nursing process framework is integrated throughout the text and in the clinical skills chapters. Care planning table in each clinical chapter highlights the first nursing diagnosis discussed in the chapter and connects it to the Nursing Outcomes

Classification (NOC) and the Nursing Interventions Classification (NIC). [Do Not Feature] Animations are located throughout the book to enhance student learning. Numerous full-color illustrations and photos show anatomy, procedures, and methods. 10 review questions at the end of every chapter (with an additional 10 online) help readers review what you have learned and evaluate your understanding. End-of-book appendixes cover abbreviations, roots, prefixes, and suffixes; NANDA-I Diagnostic Labels; NCLEX-Style Question Study Tips; and glossary terms.

### Fundamentals of Nursing Elsevier Health Sciences

This innovative text presents nursing fundamentals in a concise, visually attractive format that captures students' attention and addresses dramatic changes taking place in the health care environment. At the heart of this revision is the critical thinking model presented as a practical, clinical decision-making guide and applied to the nursing process throughout. Case studies in all clinical chapters bring this process to life, demonstrating to students how using the combination of critical thinking and the nursing process will help them deliver comprehensive, professional care. Case studies introduce the client, family and nurse, and follow them through synthesizing knowledge and assessment data, planning and evaluating care. It addresses community health care and health promotion by consistently

organizing each implementation section into three main areas: health promotion, acute care, and restorative care. Other themes include delegation, multidisciplinary collaboration, focus on outcomes, cultural sensitivity, gerontologic principles, and client satisfaction. \* Complete coverage of fundamentals in a concise, readable, visually appealing format. \* Five-step nursing process provides a consistent framework in all clinical chapters. \* Hundreds of color photographs and drawings increase educational value while adding visual appeal. \* Client teaching covered in both narrative and boxes to highlight this key nursing role. \* Skills are presented in a clear, two-column format with rationales for all steps. NEW FEATURES: \* Critical thinking model provides a practical, clinical decision-making guide applied to the nursing process. \* Case studies in all clinical chapters include the client, family and nurse, and are developed throughout the chapter to demonstrate the ongoing nature of nursing care. \* Implementation consistently addresses health promotion, acute care, and restorative care to reflect

the current focus on community-based nursing and health promotion. \* Skills include guidelines to assist nurses when delegating to unlicensed assistive personnel, Critical Decision Points, Recording and Reporting, and Home Care Considerations. \* Expanded evaluation includes both the nurse's and client's perspectives to stress today's "customer satisfaction" emphasis. \* Care Plans based on the case studies highlight key assessment data and include client goals and expected outcomes. \* Procedural Guidelines provide step-by-step instructions for performing basic skills in a clear and concise format. \* Cultural focus is reflected throughout and in special boxes to highlight the importance of cultural sensitivity. \* Collaborative care and multidisciplinary problems are addressed in narrative and care paths/maps to reflect current health care focus.
