A stunning, unprecedented collection of photographs and essays that goes behind the scenes at NASA, in which the humanity of the astronauts, engineers, scientists, technicians, and ground crews that contributed in saving the Hubble Space Telescope are revealed. Michael Soluri has been photographing the people and places of space exploration for more than fifteen years. With the support of Discover magazine, NASA, and the astronaut crew, he was able to gain unfettered access to the multiple worlds of the historic, one-of-a-kind shuttle mission and tools that saved the Hubble Space Telescope. His friendship with the crew grew out of a chance meeting with Mike Massimino, one of the seven astronauts selected for the last-ever servicing mission to the Hubble. Intrigued by the possibilities, Soluri asked Massimino: "What is the quality of light really like in space?" While astronauts take photos in space all the time, Soluri was asked to coach this crew into making photographs that better communicate their experiences in space the way an artist does: as expressions of human curiosity and ambition, and the infinite worlds to which humankind aspires in exploring the universe. Infinite Worlds is an exclusive and unscripted photographic documentary inside the world of three NASA flight centers in Maryland, Texas, and Florida. With the closing of the shuttle program, this is the first and last book of its kind. Designed with more than 400 gorgeous full-color and black & white photographs, it is woven with essays written by eighteen individuals from the human and robotic spaceflight labor force

that participated in STS 125/SM4. Infinite Worlds will appeal not only to the space history buff and photography connoisseur, but also to the armchair astronomer, and families wanting an insightful and beautiful keepsake of the space shuttle and Hubble Space Telescope era.

Photographer Michael Clark provides an inside look at the reality of working in extreme conditions to capture and process his breath-taking images. He offers start-to-finish details of some of his most demanding assignments—rock climbing, big wave surfing, sky diving, and mountain biking—sharing his personal shooting expertise, on-the-fly problem solving skills, and photography post-processing techniques in Adobe Photoshop Lightroom and Adobe Photoshop (including Lightroom 4 and Photoshop CS6). This gorgeous guide for intermediate to advanced DSLR shooters is packed with practical tips, detailed lighting setups, and behind-the-scenes stories from a variety of Clark's most challenging adventure photography assignments. With an engaging writing style and cliffhanger details, the author allows you to tag along with him to improve your skills and find inspiration to create images instead of just taking them. He also covers the important business aspects of working as a professional shooter. A DVD-ROM with 149-minutes of video shows the author's post-processing workflow using Lightroom 4

and Photoshop CS6 for 16 of the images featured in the book. He also includes a how-to primer on these software programs, as well as provides a primer on color management. Clark's valuable insights and tips will guide professional and aspiring photographers interested in turning their passion into a profession as well as amateur photographers looking to improve their skills.

“What a fantastic book! It’s about color management for photographers. Sam explains why color management is essential for achieving accurate colors in photos and how to go about it. Neither in my printing technology lectures nor on the Internet have I found this topic explained as well as it is here. In fact, I found that after an enjoyable hour reading, I had learned quite a lot, and gained a far deeper understanding of the topic. If you don’t believe that Sam can put across this rather dry material with a smile in his eye, then just turn to page 15.” Birgit Engelhardt Photographer and enthusiastic reader of this book *My Hero Academia: Vigilantes, Vol. 11* Taylor & Francis Fully revised and updated!
