It is now held that writing influences and is influenced by the discipline where it occurs. The representations that writers employ to produce and comprehend texts are said to be sensitive to the specificities of their disciplinary discourse communities. This exposes writers to divergent disciplinary demands and expectations on what counts as good and appropriate writing in terms of generic structure, discourse features, and stylistic preferences, reflecting dissimilar practices. Because of such exigencies, academic writing seems at times to be very challenging, especially for novice scholars. Thus, any attempt to perceive the function of academic writing in higher education or to evaluate its quality should not discard the shaping force of the disciplines. Teaching Academic Writing as a Discipline-Specific Skill in Higher Education is a critical scholarly resource that

examines the role of writing within academic circles and the disciplinary practices of writing in scholastic environments. The book will also explore the particular difficulties that confront writers in the disciplines as well as the endeavors of educational institutions to develop discipline-specific writing traditions among practicing and novice scholars. Featuring a range of topics such as blended learning, data interpretation, and knowledge construction, this book is essential for instructors, academicians, administrators, professors, researchers, and students.

In this much needed resource, Maryellen Weimer—one of the nation's most highly regarded authorities on effective college teaching—offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. *Learner-Centered Teaching* shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.
