*Therapeutic Exercise - Alliant Physical
Therapy* Therapeutic Exercise For Physical
Therapy Therapeutic exercise is the
systematic and planned performance of
body movements or exercises which aims

to improve and restore physical function.
Exercise is defined as “activity that is
performed or practiced to develop or
improve a specific function or skill to
develop and maintain physical
fitness Therapeutic Exercise - Alliant
Physical Therapy Exercises are typically
done in the physical therapy clinic, but
they can also be done in the hospital while
you are lying in bed or sitting up in a chair.
Your physical therapist may visit you in

the hospital and work on improving
functional mobility—like moving in bed or
climbing stairs—so you can safely go
home. An Overview of Physical Therapy
Exercises Therapeutic exercise is a great
way to restore function and live a pain-
free life. Many people assume that anyone
participating in physical therapy
treatments is recovering from a recent
surgery. Therapeutic Exercise - Libre
Physical Therapy Therapeutic Exercise.
