The table of contents of this book was designed to address two main themes. What are the variables that affect how, when, where, and why managers perform their jobs? What theories and techniques are used by successful managers at a variety of organizational levels to achieve and exceed objectives effectively and efficiently throughout their careers? Management is a broad business discipline, and the Organizational Behavior course covers many areas such as individual and group behavior at work, as well as organizational processes such as communication in the workplace and managing conflict and negotiation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Finally, we all made an effort to present a balanced approach to gender and diversity throughout the text in the examples used, the photographs selected, and the use of both male and female in alternating chapters when referring to generic managers or employees.

In *Gender, Work Stress, and Health*, editors Debra L. Nelson and Ronald J. Burke explore how socially defined gender roles affect individuals' experience of stress and health at work. Working with a group of interdisciplinary contributors, they examine the interplay of gender, individual differences, social support, coping skills, family dynamics, and aspects of the work environment and ask how these affect health. This collection draws from the emerging knowledge in the fields of management, psychology, sociology, and epidemiology. Among the questions examined are whether

men and women experience different sources of stress at work, whether they experience different symptoms of distress, whether they benefit equally from social support, how they cope, and what organizations are doing to help. Professionals in human resources management, consulting, training and development, and occupational health will be particularly interested in the effectiveness of prevention and intervention efforts related to corporate culture and flexible workload arrangements and whether family-friendly policies are fulfilling their promise of helping to balance work and family demands. Researchers in management, business, occupational psychology, sociology, and gender studies will find fertile areas for continued exploration within this field.
