This exciting new volume covers the most up-to-date advances, theories, and practical applications for non-motorized transportation (NMT) systems, geographic information system-based transportation systems, and signal processing for urban transportation

systems. This book will allow readers to identify traffic and transport problems in cities and to study mass transportation systems, and modes of transportation and their characteristics, focusing on transportation infrastructure which includes green bays, control stations, mitigation buildings, separator lanes, and safety islands. From this, readers will be able to study urban public transport systems and gain some background into intelligent transportation and telemetric systems, including techniques for designing transport telemetric systems and applying them to urban transportation. Applications include

advanced traffic management systems, advanced traveler information systems, advanced vehicle control systems, commercial vehicle operational management, advanced public transportation systems, electronic payment systems, advanced urban transportation, security and safety systems, and urban traffic control. From this, an artificial Intelligence-based transportation system design using genetic algorithms and neural networks is discussed, to show applications in designs. These models and their studies are further extended in signal processing systems and geographic information systems (GIS) to improve

transportation system design, and to apply this to the design of non-motorized transportation models, while ensuring pedestrian safety. All these models are further analyzed for environmental impact assessment, which include structural audits, analysis of site selection procedure, baseline conditions and major concerns, green building and its advantages, the description of potential environmental effects, and many more interesting topics.  For decades performers, instrumentalists, composers, technicians and sound engineers continue to manipulate sound material. They are trying with more or less success to create, to innovate, improve, enhance, restore or modify the musical message. The sound of distorted guitar of Jimi Hendrix, Pierre Henry's concrete music, Pink Floyd's rock psychedelic, Kraftwerk's electronic music, Daft Punk and rap T-Pain, have let emerge many effects: reverb,

compression, distortion, auto-tune, filter, chorus, phasing, etc. The aim of this book is to introduce and explain these effects and sound treatments by addressing their theoretical and practical aspects.

 Après Parrains et Caïds, véritable « Who's who » du grand banditisme, voici le récit de leurs évasions. Un tour de France inédit des « belles » les plus folles, les plus cocasses, les plus dures, les plus kamikazes, les plus sportives, les plus rusées, les plus fraternelles, les plus aériennes et les plus amoureuses de ces trente dernières années. Vous y découvrirez comment

des hommes enfermés à triple tour dans les pénitenciers les plus sûrs parviennent à fausser compagnie à leurs geôliers.

Comment ils jouent leur vie et parfois celle des autres pour échapper à la prison. Comment ils exploitent toutes les failles de l'âme humaine – appât du gain, séduction, terreur – pour abrégier leur isolement. Une enquête qui puise aux meilleures sources, celles de la police judiciaire et de la justice, pour raconter, à la façon du polar, cet instant souvent très bref où tout bascule : celui où le bandit brise les chaînes et s'arrache à son cachot. Un livre au cœur du monde carcéral qui donne un autre goût au mot « liberté ».

Frédéric Ploquin,

auteur de Parrains et caïds, est grand reporter au journal Marianne.

**2007** E Arthur Brown  
À Toulouse, au matin du 22 septembre 2001, Alexandra Richard et Christopher Ross n'ont que quelques minutes pour préparer leur fuite. Le dirigeant de l'organisation Sentinum, Karl Haustein, veut leur peau et rien ne l'arrêtera dans sa quête de vengeance. Le vieillard infatigable animé d'une volonté dévastatrice refuse d'envisager la défaite. Il a lancé sur leurs traces ses plus dangereux agents matricules. De l'Europe à l'Amérique, la chasse est ouverte pour retrouver Alexandra et Christopher. Sur terre,

en mer et dans les airs, tous les coups seront permis. Emportés dans un tourbillon de vérités et de faux-semblants, ils devront démêler le vrai du faux, au risque de perdre ce qu'ils ont de plus précieux: leur amour. À travers l'adversité, ce sentiment intense qui les lie sera mis à rude épreuve. La loyauté et le courage montreront alors leur vrai visage. Ils se rendront compte que leur pire ennemi n'était peut-être pas celui qu'ils croyaient. Dans cet univers où les secrets font la loi, il se pourrait bien que leur salut ait pris naissance en 1417, au château de Sentinum, à Sion, en Suisse. Cette année-là eut lieu la dernière initiation sacrificielle de l'organisation. Une jeune femme

courageuse, Catherine Dinan, fut la première à oser défier Sentinum. En luttant contre la fatalité de son destin, elle ouvrit la voie à une résistance héroïque envers la puissante organisation dont l'écho résonne encore à notre époque.

Now the standardisation work of DAB (Digital Audio Broadcasting) system is finished many broadcast organisations, network providers and receiver manufacturers in European countries and outside of Europe (for example Canada and the Far East) will be installing DAB broadcast services as pilot projects or public services. In addition some value added services (data and video services) are under development or have already started as pilot projects. The new digital broadcast system DAB distinguishes itself from existing conventional broadcast systems, and the various new international standards and related

documents (from ITU-R, ISO/IEC, ETSI, EBU, EUREKA147, and others) are not readily available and are difficult to read for users. Therefore it is essential that a well structured technical handbook should be available. The Second Edition of Digital Audio Broadcasting has been fully updated with new sections and chapters added to reflect all the latest developments and advances. Digital Audio Broadcasting: Provides a fully updated comprehensive overview of DAB Covers international standards, applications and other technical issues Combines the expertise of leading researchers in the field of DAB Now covers such new areas as: IP-

Tunneling via DAB; Electronic Programme Guide for DAB; and Metadata A comprehensive overview of DAB specifically written for planning and system engineers, developers for professional and domestic equipment manufacturers, service providers, as well as postgraduate students and lecturers in communication technology.

In this book, the technical explanation of the nature of analog sound creation is followed by the story of its birth and its subsequent development by various designers, manufacturers and performers. The

individual components of analog sound creation are then examined in detail, with step by step examples of sound creation techniques. Then the modern imitative analog instruments are examined, again with detailed instructions for programming and using them, and the book is completed with appendices listing the major instrument lines available, hints on values and purchasing, other sources of information, and a discography of readily available recordings which give good examples of analog sound synthesis. The CD which accompanies the book gives many examples of analog sound creation basics as well as more advanced techniques,

and of the abilities of the individual instruments associated with classical and with imitative analog sound synthesis.

Un homme est retrouvé mort assassiné, quelque part dans Marseille. On pourrait presque dire que c'est banal. Ce qui l'est moins, c'est qu'on retrouve près de son corps, une pièce de jeu d'échec. Coïncidence ? Humour quelque peu déplacé ou jeu de piste sinistre ? Bruno Ripoll, détective privé, part à la recherche des indices à la demande d'une amie policière. Un mystérieux jeu d'échec, un superbe magasin d'antiquité et

son étrange propriétaire eurasienne, vont donner le ton de cette étrange course poursuite contre la montre, avec comme fil conducteur, une logique implacable et inattendue. Le détective, un peu marginal, percera-t-il l'énigme du jeu d'échec, dans cette voluptueuse cité phocéenne, toujours surprenante et jamais lassante ?
